NEW QUESTION # 105

Which platform feature or option should you use for the demonstration?

- **B. Copilot**
- C. AI Builder
- D. Power Automate
- E. Start from an image

Answer: B

Explanation:

Use Copilot to create and understand Power Fx as well as rich data models Some developers want to use low-code to automate the mundane aspects of building an app.

Others inherit low-code apps from colleagues and need to quickly get up to speed. Regardless of the circumstance, Copilot in Microsoft Power Apps is now your intelligent companion that explains any formula you select, right in the formula bar.

Coders can copy and insert the explanation as a code comment or share it with others who are working on the same app.

Developers can also write comments in natural language and have Copilot suggest a formula in Power Fx directly in the typing loop, in a similar fashion to GitHub Copilot.
