Plat-Admn-202 test braindumps & Plat-Admn-202 exam questions & Plat-Admn-202 exam guide

Begin to learn the Plat-Admn-202 exam questions and memorize the knowledge given in them. Only ten days is enough to cover up the content and you will feel confident enough that you can answer all Plat-Admn-202 Questions on the syllabus of Plat-Admn-202 certificate. Such an easy and innovative study plan is amazingly beneficial for an ultimately brilliant success in exam.

Salesforce Certified Platform App Builder Sample Questions (Q110-Q115):

NEW QUESTION # 110

DreamHouse Realty wants to track how many lifts are being installed into customer garages. The To Be Installed custom checkbox field on the custom Lift object should be checked and an external system should be notified via an outbound message the next day when a lift is sold.

What automation tool should be used to complete this task?

- A. Process Builder
- B. Approval process
- C. Workflow
- D. Flow**

Answer: D

Explanation:

As of the Winter '24 release, Salesforce introduced the ability to send outbound messages directly from Flow. This makes Flow the best choice for automating the notification to an external system when a lift is sold, fulfilling the need for both checking the custom To Be Installed checkbox and sending the notification the next day.

Flow: With this new functionality, Flow is now the most versatile automation tool for this use case. You can:

Create a scheduled path that triggers the next day after the lift is sold (e.g., when a record meets the criteria such as the checkbox

being checked).

Send the outbound message to notify the external system about the lift installation.

Perform all of this declaratively, replacing the need for Workflow, which previously was the go-to for outbound messages.

Why not Workflow anymore? Although Workflow still supports outbound messages, Flow is the preferred tool now, as Salesforce is deprecating Workflow rules and Process Builder in favor of Flow. Flow also allows for more complex logic and actions, providing flexibility in future-proofing automation.

Winter '24 Flow Outbound Message

NEW QUESTION # 111

DreamHouse Realty wants to display a weather map component on a Lightning record page when a house is scheduled for a showing.

How should the app builder meet the requirement?

- A. Component visibility
- B. Field-level security
- C. Field-level field
- D. Sharing rules

Answer: A

Explanation:

To display a weather map component on a Lightning record page conditionally:

A . Component visibility should be used. This feature in the Lightning App Builder allows components on a Lightning page to be displayed based on specific criteria, such as field values or user attributes. In this case, the app builder can set the visibility of the weather map component to only appear when a house is scheduled for a showing based on the relevant field values.

For more details on setting up conditional component visibility, review the guide on Dynamic Lightning Pages.

NEW QUESTION # 112

Universal Containers has Public Read/Write as the Account organization-wide default (OWD) setting. Visitors to the customer community site report that they can see all of the company's account records.

How should an app builder configure Account sharing so that community users only see their own Account?

- A. Define a permission set for external accounts.
- B. Define an owner-based sharing rule for external accounts.
- C. Set the account external OWD to private.
- D. Create an account record type for external accounts.

Answer: C

Explanation:

The best way to configure Account sharing so that community users only see their own Account is to set the account external OWD to private. This will restrict the access to Account records for external users based on the sharing rules and criteria. Creating an account record type, defining an owner-based sharing rule, or defining a permission set will not prevent community users from seeing other accounts.

NEW QUESTION # 113

Cloud Kicks is redefining its entire business process to convert the Manager Notes field from a long text area field. The goal is to encourage managers to be more concise in their comments and stay at 255 characters or less. There is preexisting information in the Manager Notes field that often is well beyond the character limit.

What would happen to any existing information if the app builder tries to convert a preexisting long text area field to text area?

- A. Preexisting information will truncate to the first 255 characters.
- B. Preexisting information will remain even if it was over 255 characters.
- C. Preexisting information in the field will be completely lost.
- D. Preexisting information will cause a- e-r0- -essace to poo up.

Answer: A

Explanation:

If the app builder tries to convert a preexisting long text area field to text area, preexisting information will truncate to the first 255 characters. This means that any information beyond 255 characters will be lost. Option B is incorrect because preexisting information will not remain if it was over 255 characters. Option C is incorrect because preexisting information will not cause an error message to pop up. Option D is incorrect because preexisting information in the field will not be completely lost, only truncated.

NEW QUESTION # 114

The services manager wants to make sure the team enters case priority consistently.

What feature can an app builder use to accomplish this?

- A. Flow
- B. In-App Guidance
- **C. Path**
- D. Next Best Action

Answer: C

Explanation:

The best feature to use to ensure consistent case priority entry is Path. Path allows users to see key fields and guidance for each stage of a process, such as a case lifecycle. Path can also enforce data quality by making certain fields required at each stage. See [this article] for more information on Path.

NEW QUESTION # 115

.....

Normally IT workers have two purposes to test for certification: one is just for certification as of job demand; two is setting one goal for striving. Why do you try our Plat-Admn-202 new exam guide materials? Our products are valid tested by more than 6000 candidates and can help you clear exam certainly. Forget your puzzled and distressed mood, choosing our Salesforce Plat-Admn-202 new exam guide materials will help you success without any doubt.
