## Platform-App-Builder Exam Testking - Salesforce Platform-App-Builder Reliable Exam Syllabus: Salesforce Certified Platform App Builder Pass Success

The only use of the internet is to validate the product license for the Platform-App-Builder practice exam software. If you are not online, you can still practice for the Salesforce Platform-App-Builder exam questions thanks to this feature of Actual4Dumps's Platform-App-Builder Exam simulation software. As a result, the Platform-App-Builder desktop-based practice test software is a particularly useful option for customers who do not constantly have access to the internet.

### Salesforce Certified Platform App Builder Sample Questions (Q28-Q33):

#### NEW QUESTION # 28

An app builder installs an unmanaged package in a full copy sandbox that is an exact match for production, and now they are ready to install it in production. When the app builder attempts to install the package in production, it fails. Why did the package fail to install?

- A. Object limits exceeded
- **B. Apex unit test failures**
- C. Incorrect license types
- D. Package features not compatible

**Answer: B**

Explanation:

Explanation

Apex unit test failures can cause a package installation to fail. According to the Salesforce documentation, "If your package contains Apex code, all tests must complete successfully for your package to install." Incorrect license types, package features not compatible, and object limits exceeded are not valid reasons for a package installation failure.

#### NEW QUESTION # 29

An Alexa Skill Builder submitted a child-directed skill for certification that lists the nearest skateboard parks.

The Builder ensured that

- \* The skill does not link to an external account
- \* The skill stored the child's preference by userId
- \* The skill has a valid privacy policy link in the skill Distribution page Given this information, why will the skill fail certification?

- A. The skill should not be child-directed as it can be used by children over 13 years old.
- B. Child-directed skills cannot use location information
- **C. The child's userId cannot be used because of Personally Identifiable Information (PII) restrictions.**
- D. The Builder did not upload a privacy policy document

**Answer: C**

#### NEW QUESTION # 30

Universal Containers uses a custom picklist called Account\_Region\_\_c on the Account object. The vice president of sales has asked that the value of this field is visible on Opportunities.

How should an app builder create this solution?

- A. Lookup field
- B. Field history tracking
- C. Field-level security
- **D. Cross-object formula field**

**Answer: D**

Explanation:

Explanation

A cross-object formula field is a formula field that references fields from another object. This can be used to display the value of the

Account\_\_Region\_\_c field on Opportunities, as long as there is a relationship between the two objects. Option A, B, and C are not relevant for this requirement.

### NEW QUESTION # 31

At Ursa Major Solar there is a requirement for a new field called Planet Details on the Planet object where users can write detailed descriptions that can include pictures and links.

What field type should the app builder utilize to fulfill this requirement?

- **A. Rich Text Area**
- B. Multi-Select Picklist
- C. URL
- D. Long Text Area

**Answer: A**

Explanation:

Ursa Major Solar requires a new field called Planet Details on the Planet object, where users can write detailed descriptions that can include pictures and links. The Rich Text Area field type is the best fit for this requirement.

\* Option B (Rich Text Area): A Rich Text Area field allows users to enter text with formatting options such as bold, italics, bullets, and numbering. Additionally, it supports inserting images and hyperlinks, which matches the requirement of including pictures and links in the description.

Rich Text Area Fields

Option A (Long Text Area): A Long Text Area field allows for lengthy text input but does not support formatting or embedding of images and links, which are necessary in this case.

Option C (Multi-Select Picklist): A Multi-Select Picklist allows users to select multiple values from a list but is not suitable for detailed descriptions or embedding images and links.

Option D (URL): A URL field is used to store and display a link but does not support text input or embedding images.

In summary, the Rich Text Area field type should be used because it allows formatted text, images, and links, which are required for the Planet Details field.

Reference: Rich Text Area Field Documentation

### NEW QUESTION # 32

Universal Containers would like to embed a chart of all related Opportunities, by stage, on the Account detail page.

What type of report should an app builder create to add to the Account page layout?

- A. A tabular report on the Opportunity object.
- B. A tabular report on the Account object.
- **C. A summary report on the Opportunity object.**
- D. A summary report on the Account object.

**Answer: C**

### NEW QUESTION # 33
