Salesforce Certified Development Lifecycle and Deployment Architect Sample Questions (Q189-Q194):

NEW QUESTION # 189

Universal Containers (UC) is hiring offshore agile development teams to decrease costs and enhance UC's capability of delivering new features to its customers. However, the CTO is not able to follow or measure the work of those teams. What should an architect recommend to increase transparency?

- **A. A Request the offshore teams to share their work in progress in a virtual Kanban board tool.**
- B. Request the offshore teams to send daily emails to the CTO with the progress of the teams.
- C. Ask the offshore teams to add their progress and status in a shared spreadsheet.
- D. Schedule a daily stand-up meeting with representatives of all offshore teams to share the progress of the teams.

Answer: A

Explanation:

A virtual Kanban board tool is a good way to increase transparency and collaboration among agile development teams, as it allows them to visualize their work, track their progress, and identify any bottlenecks or issues. A daily stand-up meeting, a daily email, or a shared spreadsheet are not as effective or efficient as a Kanban board tool.

NEW QUESTION # 190

What are two advantages of using an Agile Project Management tool? Choose 2 answers

- **A. Increased visibility into sprint and project status**
- B. Better relationships with business stakeholders
- **C. Consolidate project artifacts to a common repository**
- D. Improve governance with gate steps in development

Answer: A,C

Explanation:

Explanation

A and C are the advantages of using an Agile Project Management tool, as they provide visibility into the project progress and status, and consolidate the project artifacts in a common repository. B is not an advantage of using an Agile Project Management tool, as it depends on the communication and collaboration skills of the team members and stakeholders. D is not an advantage of using an Agile Project Management tool, as it is more related to the governance framework and methodology of the project.

NEW QUESTION # 191

Universal Containers (UC) is using Salesforce for their sales organization. The sales users have created several dashboards using multiple running users. The admins have also added a few workflow rules that send email notifications to some sales users. What should an Architect consider while planning the deployment of such components? Choose 2 answers

- A. If the username in the source org doesn't exist in the target org, the deployment will stop until the usernames are resolved or removed.
- B. User fields are ignored during metadata deployments and all such users need to be manually created in the target org before starting the deployment.
- C. If the username in the source org doesn't exist in the target org, the deployment will continue and Salesforce will automatically create the username in the target org.
- D. User Fields are preserved during metadata deployments and Salesforce attempts to locate a matching user in the target org during deployment.

Answer: A,D

Explanation:

Explanation

User fields are preserved during metadata deployments and Salesforce attempts to locate a matching user in the target org during deployment. If the username in the source org doesn't exist in the target org, the deployment will stop until the usernames are resolved or removed.

NEW QUESTION # 192

Universal Containers operates from North America and does business within North America. UC has just acquired a local company in Asia to start operating from Asia. Currently, these two business units operate in two different languages. Both units have different sales processes and have to comply strictly with local laws. During the expansion phase, UC would like to focus on innovation over standardization. What should an architect recommend given the scenario?

- A. Opt for Multi-org strategy, standardized sales process, common rules, and same locale across orgs.
- B. Opt for Multi-org strategy, each org have its own sales process, common rules and operate in locale
- C. Opt for Single-org strategy, standardized sales process, common rules, and business unit-specific locale
- D. Opt for Single-org strategy, standardized sales process, common rules, and same locale for all business units.

Answer: B

NEW QUESTION # 193

Northern Trail Outfitter's development team has built new features for its sales team in the Asia-Pacific region. While testing the Apex classes, the developers are constantly hitting the governor limits.

What should the architect recommend during the review to address this issue?

- A. Use the auto reset property to automatically reset governor limits during off-hours.
- B. Use `test.setLimit()` and `test.resetLimit()` methods to reset governor limits.
- C. Use an AppExchange product which can temporarily increase the governor limits.
- D. Use `test.startTest()` and `test.stopTest()` methods to reset governor limits.

Answer: D

NEW QUESTION # 194
