

Positive 1Z0-771 Feedback: Oracle APEX Cloud Developer Professional - High-quality Oracle 1Z0-771 Real Questions

2025 Latest Itcertmaster 1Z0-771 PDF Dumps and 1Z0-771 Exam Engine Free Share: https://drive.google.com/open?id=1av6aeDIsOnzRG_ExQTC52fR30oSFYvgF

As the saying goes, an inch of gold is an inch of time. The more efficient the study guide is, the more our candidates will love and benefit from it. It is no exaggeration to say that you can successfully pass your 1Z0-771 exams with the help our 1Z0-771 learning torrent just for 20 to 30 hours even by your first attempt. And to cater to our customers' different study interests and hobbies, we have multiple choices on the 1Z0-771 Exam Materials versions for you to choose: the PDF, the Software and the APP online.

In recent years, some changes are taking place in this line about the new points are being constantly tested in the 1Z0-771 real exam. So our experts highlights the new type of questions and add updates into the 1Z0-771 practice materials, and look for shifts closely when them take place. At the same time, as we can see that the electronic devices are changing our life day by day, our 1Z0-771 study questions are also developed to apply all kinds of electronic devices.

Itcertmaster Oracle 1Z0-771 Exam Questions are Available in Three Different Formats

You will get your hands on the international 1Z0-771 certificate you want. Perhaps you can ask the people around you that 1Z0-771 study engine have really helped many people pass the exam. Of course, you can also experience it yourself. Next, allow me to introduce our 1Z0-771 Training Materials. First, our 1Z0-771 practice briandumps have varied versions as the PDF, software and APP online which can satisfy different needs of our customers. Secondly, the price is quite favourable.

Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details
Topic 1	Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 2	Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.

Topic 3	Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 4	Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 5	Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.
Topic 6	Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Topic 7	Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.
Topic 8	Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Topic 9	Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Topic 10	Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
Topic 11	Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 12	Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Topic 13	Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Topic 14	Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Topic 15	Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
Topic 16	Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.

Oracle APEX Cloud Developer Professional Sample Questions (Q39-Q44):

NEW QUESTION # 39

At what level does a developer enable push notifications so that end users can receive them on their devices from an APEX application?

- A. Application
- B. Page
- C. Region
- D. Instance

Answer: A

Explanation:

Push notifications in Oracle APEX are enabled at the application level. This allows the application to register with the Progressive Web App (PWA) framework and manage subscriptions for all end users. Once enabled in the Application Definition under "Progressive Web App" settings, APEX handles the subscription process, and developers can use APIs like APEX_PWA.SEND to send notifications. Enabling at the region, page, or instance level is not supported for this feature.

NEW QUESTION # 40

Which two are valid evaluation points for Authorization Schemes?

- A. Once per session
- B. Once per page view
- C. Never
- D. Once per user

Answer: A,B

Explanation:

Authorization Schemes in APEX can be evaluated at:

Once per page view: Checks authorization each time a page is rendered.

Once per session: Checks once per user session, caching the result.

Once per user and Never are not valid evaluation points in the Authorization Scheme settings.

NEW QUESTION # 41

Which statement is true about the Link Column attributes of an Interactive Report?

- A. If you select Link Column, it is always displayed as the last column in the report.
- B. A Link Column cannot be sorted, hidden, or moved by an end user.
- C. It is not possible to include a custom target in Link Column.
- D. It is not possible to exclude Link Column.

Answer: D

Explanation:

The Link Column in an Interactive Report adds a clickable link to each row. The true statement is:

It is not possible to exclude Link Column: Once defined in the report attributes, the Link Column is mandatory and cannot be hidden or excluded via end-user controls (e.g., Column Management). It's always rendered unless removed by the developer.

Custom target: False; custom targets (e.g., URLs, pages) can be defined.

Always last column: False; its position is configurable.

Cannot be sorted/hidden/moved: False; end users can sort or move it, though hiding is restricted.

This behavior ensures consistent navigation in reports.

NEW QUESTION # 42

Which statement is true about importing an existing application into your workspace?

- A. The import process does not import the supporting objects defined during the export.

- B. You cannot change the application ID during the import process.
- **C. You cannot import an APEX application exported from the latest APEX version to an old APEX version.**

Answer: C

Explanation:

Importing an APEX application involves transferring its definition (exported as a .sql file):

C . You cannot import an APEX application exported from the latest APEX version to an old APEX version: APEX enforces backward compatibility limits. An app exported from 23.2 (latest features like AI Assistants) can't import into 19.2, as older versions lack support for newer metadata (e.g., APEX_AI tables). The import wizard checks the version and rejects incompatible files.

A . You cannot change the application ID: False; the import wizard prompts for a new ID if there's a conflict or if you choose to override.

B . Supporting objects not imported: False; if included in the export (via "Include Supporting Objects"), they're imported (e.g., tables, triggers), unless skipped explicitly.

Technical Insight: Export files contain a version check (e.g., apex_version := '23.2');, causing rejection if the target instance's APEX_VERSION is lower.

Use Case: Moving an app from a dev instance (23.2) to prod (23.2) works, but not to an outdated test instance (19.1).

Pitfall: Always match versions or upgrade the target instance first.

NEW QUESTION # 43

Which client credentials are used for authentication during the 'Check Syntax' process?

- A. APEX Workspace Admin credentials
- B. APEX Developer credentials
- **C. Database schema credentials**

Answer: C

Explanation:

The "Check Syntax" process in APEX, typically used in SQL Workshop or when validating code, authenticates using Database schema credentials. These are the credentials of the schema associated with the APEX workspace (e.g., username/password of the schema like "HR"). This ensures the process has access to parse and validate SQL or PL/SQL against the database objects in that schema.

APEX Workspace Admin credentials: These are for managing workspaces, not executing database-level syntax checks.

APEX Developer credentials: These authenticate developers into the APEX IDE, not the database runtime environment.

This design aligns with APEX's security model, where database operations are tied to the schema, ensuring accurate validation and error reporting (e.g., missing privileges or invalid objects).

NEW QUESTION # 44

.....

If you want to pass your 1Z0-771 exam, we believe that our learning engine will be your indispensable choices. More and more people have bought our 1Z0-771 guide questions in the past years. These people who used our products have thought highly of our 1Z0-771 Study Materials. If you decide to buy our products and take it seriously consideration, we can make sure that it will be very easy for you to simply pass your exam and get the 1Z0-771 certification in a short time.
