Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q293-Q298):

NEW QUESTION # 293

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is automating manual processes in the Dynamics 365 finance and operations apps. The company has the following batch groups and priorities configured:

Batch Group Name	Priority
BATCHGROUP1	Normal
BATCHGROUP2	High
BATCHGROUP3	Critical
BATCHGROUP4	Reserved

The batch processes run during the following times of day:

Batch Active Period	Active From (local time)	Active To (local time)
LUNCHBREAK	12:00 PM	1:00 PM
AFTERHOURS	5:00 PM	8:00 AM

The company requires a process that meets the following requirements:

- * Runs every weekday.
- * Runs outside of work hours.
- * Runs with at least a high priority.

You need to automate the manual process.

Solution: Create a batch job to have an active period of AFTERHOURS and a recurrence of Daily. Select the Every Weekday setting, and set the batch job to run as part of BATCHGROUP2.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION # 294

A company uses Dynamics 365 Finance.

You create a new extension for a standard table.

You need to add a new method in the extension.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Set the class as internal.

Create a new project in Visual Studio.

Add a new class to the Visual Studio project with the _Extension suffix.

Set the class as final.

Decorate the class with the [ExtensionOf(tableStr(TableName))] attribute.

Add a new method to the class and implement it.

Answer area

Create a new project in Visual Studio.

Add a new class to the Visual Studio project with the _Extension suffix.

Set the class as final.

Decorate the class with the [ExtensionOf(tableStr(TableName))] attribute.

Add a new method to the class and implement it.

Answer:

Explanation:

Actions

Set the class as internal.

Create a new project in Visual Studio.

Add a new class to the Visual Studio project with the _Extension suffix.

Set the class as final.

Decorate the class with the [ExtensionOf(tableStr(TableName))] attribute.

Add a new method to the class and implement it.

Answer area

Create a new project in Visual Studio.

Add a new class to the Visual Studio project with the _Extension suffix.

Set the class as final.

Decorate the class with the [ExtensionOf(tableStr(TableName))] attribute.

Add a new method to the class and implement it.

Explanation:

Actions

Set the class as internal.

Answer area

1	Create a new project in Visual Studio.
2	Add a new class to the Visual Studio project with the _Extension suffix.
3	Set the class as final.
4	Decorate the class with the [ExtensionOf(tableStr(TableName))] attribute.
5	Add a new method to the class and implement it.

NEW QUESTION # 295

You need to configure models for the project.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Modify the DefaultModelForNewProject setting in the DefaultConfig.xml file and name the model FinanceExt.
- B. Overlay the existing FinanceExt model and populate the solution definition.
- C. Extend the existing FinanceExt model and populate the project model definition.
- D. Create a new model that extends the existing FinanceExt model.

Answer: B,C

Explanation:

All new and extended objects must be located in an existing model named FinanceExt. The creation of new models is not permitted.

Plan Architecture and Solution Design

Question Set 3

NEW QUESTION # 296

D18912E1457D5D1DDCBD40AB3BF70D5D

You are a Dynamics 365 Finance and Operations developer.

You need to deploy a new report in a development environment.

From which two locations can you deploy the report? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Application Explorer
- B. Build project
- C. Build Models options
- D. Solution Explorer
- E. Package deployment

Answer: D,E

Explanation:

A: An AOT package is a deployment and compilation unit of one or more models that can be applied to an environment. It includes model metadata, binaries, reports and other associated resources.

D:
