Oracle Cloud Fusion Analytics Warehouse 2023 Implementation Professional Sample Questions (Q54-Q59):

NEW QUESTION # 54
Which is a prerequisite for creating a data pipeline for any functional area?

- A. Completing data security assignments
- B. Setting up the Pipeline parameters
- C. Configuring single sign-on

Answer: B

Explanation:
Explanation
The prerequisite for creating a data pipeline for any functional area is setting up the pipeline parameters. The pipeline parameters define the global settings for the data pipeline, such as the source application URL, credentials, notification email, incremental refresh frequency, and retention period4. Configuring single sign-on and completing data security assignments are not prerequisites for creating a data pipeline, but they are recommended for securing access to FAW and Fusion Applications5

NEW QUESTION # 55
You are aware that a new FAW version just became available.
What is the best practice for upgrading a FAW instance to the latest version?

- A. Open an SR with Oracle.
- B. Wait until Oracle upgrades the instance.
- C. Schedule the upgrade through the FAW console.

Answer: B

Explanation:
Explanation
The best practice for upgrading a FAW instance to the latest version is to schedule the upgrade through the FAW console. You can use the Upgrade option on the Console page to select the available version and schedule a date and time for the upgrade. You can also view the status and history of your upgrades on the same page1. You do not need to open an SR with Oracle or wait until Oracle upgrades the instance for this purpose.

NEW QUESTION # 56
You have reviewed out-of-the-box data security through the configuration of context assignment. You need to create custom data security to meet your data security requirements.
Which FAW settings provide this functionality?

- A. A combination of steps in Security Console and the Security Configurations in the Semantic Model Extensions available at the FAW Console provides this functionality.
- B. You need to modify the Data Security Assignment file with the values you want for the users.
- C. The Security Configurations available in the Semantic Model Extensions through the FAW Console provide this functionality

Answer: A

Explanation:
Explanation
To create custom data security to meet your data security requirements, you need a combination of steps in Security Console and the Security Configurations in the Semantic Model Extensions available at the FAW Console. The Security Console allows you to create custom data roles and assign them to users or groups5. The Security Configurations allow you to define custom security filters and apply them to dimensions, facts, or subject areas6. You do not need to use only the Security Configurations or modify the Data Security Assignment file for this purpose.

NEW QUESTION # 57
You have recently provisioned a new Fusion Analytics Warehouse (FAW) instance and want to enrich yourSubject Areas with Descriptive Flexfields (DFF).
In your custom application, you have created aDFF page and added/selected allthe required attributes. How would you activate them to enable data loading?

- A. Activating is a two-step process: first, you need to generate the DFF custom application, and second, you need to deploy for the DFFs to be visible in Subject Areas.
- B. After selecting the required attributes in the DFF custom application, you need to build a semantic model extension and wait for the next incremental upload for the DFFs to be visible in Subject Areas.
- C. After selecting the required attributes in the DFF custom application, you need to refresh the functional areas or wait for the next incremental upload for the DFFs to be visible in Subject Areas.

Answer: A

Explanation:
Explanation
To enable data loading for descriptive flexfields (DFFs) in Fusion Analytics Warehouse (FAW), you need to follow a two-step process. First, you need to generate the DFF custom application by clicking the Generate button on the Data Augmentation page. This will create a custom application with the selected attributes from the DFF page. Second, you need to deploy the DFF custom application by clicking the Deploy button on the Data Augmentation page. This will deploy the custom application and make the DFFs visible in the subject areas

NEW QUESTION # 58
You are performing data validation from the FAW console.
What is the first thing you should ensure as a user undertaking the data validation activity?

- A. Ensure that you have the same data security privileges in the FAW instance and the Oracle ynal Business Intelligence instance.
- B. Ensure that you have access to all data in the FAW instance.
- C. Ensure that you have the administrator privilege in the Oracle Transactional Business Intelligence (OTBI) instance.

Answer: A

Explanation:
Explanation
To perform data validation from the FAW console, you need to ensure that you have the same data security privileges in the FAW instance and the Oracle Transactional Business Intelligence (OTBI) instance. This will allow you to compare the metrics between the two instances and verify their accuracy1. You do not need to have access to all data in the FAW instance or have the administrator privilege in the OTBI instance to perform data validation.
