2V0-17.25 Lead2pass & New 2V0-17.25 Exam Fee

Nowadays, everyone lives so busy every day, and we believe that you are no exception. If you want to save your time, it will be the best choice for you to buy our 2V0-17.25 study torrent. Because the greatest advantage of our study materials is the high effectiveness. If you buy our VMware Cloud Foundation 9.0 Administrator guide torrent and take it seriously consideration, you will find you can take your exam after twenty to thirty hours' practice. So come to buy our 2V0-17.25 Test Torrent, it will help you pass your exam and get the certification in a short time that you long to own.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q12-Q17):

NEW QUESTION # 12
An administrator must replace a component's certificate in VCF with an external CA-signed certificate. What format must be used when creating the certificate?

- A. P7B
- B. PEM
- C. PFX
- D. DER

Answer: B

Explanation:
VCF supports only certificates in PEM format when replacing system component certificates with those signed by an external Certificate Authority.
PEM is the standard Base64 format with .crt and .key files. PFX (PKCS#12) is used for Windows stores but not supported in VCF automation. P7B is for certificate chains, while DER is binary encoding. Thus, the required format for certificates in VCF is PEM.

NEW QUESTION # 13
When installing ESXi hosts in a large-scale environment, which are best practices or beneficial approaches?

- A. Storing host logs on a remote syslog server
- B. Manually configuring each host to ensure uniqueness
- C. Using scripted installations or Auto Deploy
- D. Configuring multiple vmkernel ports for dedicated vMotion and management

Answer: A,C,D

Explanation:
Automated deployment (A) saves time in large environments. Off-host log storage (C) enhances troubleshooting and compliance, and separate vmkernel ports (D) for management/vMotion optimize performance and security. Manual host configuration (B) is prone to errors and not scalable.

NEW QUESTION # 14
When considering standardization in VMware environments, which of the following are aligned with industry or regulatory best practices?

- A. Regular audits and patching guided by ITIL processes
- B. CO2 emission compliance
- C. Hardening guides that align with NIST standards
- D. Role-based access control following ISO 27001 principles

Answer: A,C,D

Explanation:
NIST-based hardening guides, ISO 27001-aligned RBAC, and ITIL-driven audits and patching all intersect with VMware security and operational best practices. CO2 emissions (C) are environmental considerations, not typically covered under VMware's security/operational standards.

NEW QUESTION # 15
DRAG DROP
Arrange the steps in the correct order to resolve host connectivity issues.
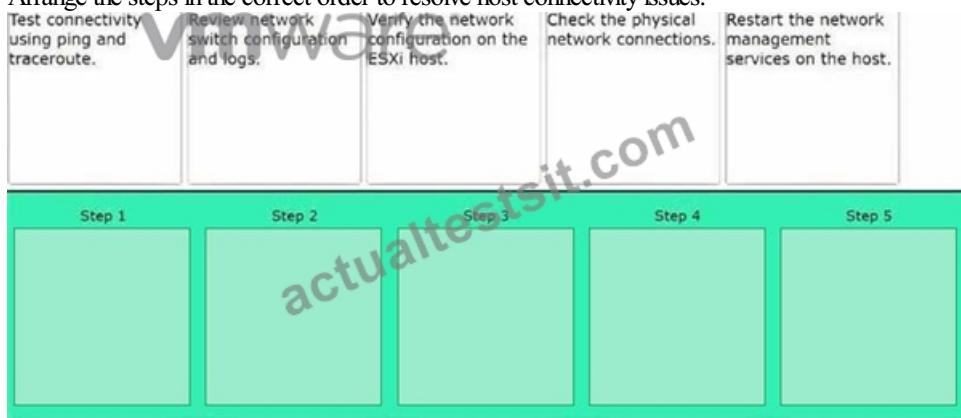

Answer:

Explanation:
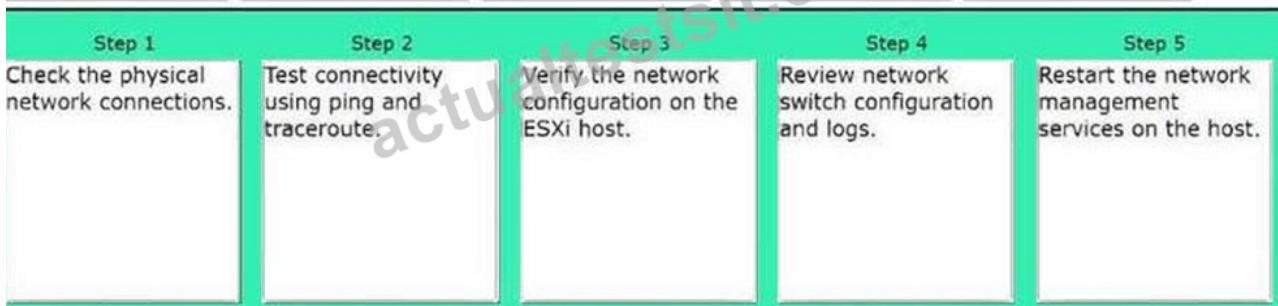

NEW QUESTION # 16

A VM is encountering continuous reboots due to guest OS crashes.
Which initial action in vSphere helps preserve diagnostic information while minimizing downtime?

- A. Take a snapshot before each reboot
- B. Configure a VM core dump collector
- C. Migrate the VM to another host via vMotion
- D. Enable VMware Tools logging

Answer: B

Explanation:
A VM core dump collector captures critical debug info that can help diagnose OS crashes. Taking frequent snapshots (B) can bloat storage, vMotion (D) won't fix the OS crash, and VMware Tools logging (A) is limited compared to a memory dump.

NEW QUESTION # 17

......

Once our professionals find the relevent knowledge on the 2V0-17.25 exam questions, then the whole research groups will pick out the knowledge points according to the test syllabus. Also, they will also compile some questions about the 2V0-17.25 practice materials in terms of their experience. Now, we have successfully summarized all knowledge points in line with the 2V0-17.25 outline. And meanwhile, we keep a close eye on the changes of the exam to make sure what you buy are the latest and valid.
