

Practice 3V0-21.23 Mock - High 3V0-21.23 Passing Score

3V0-21.23	
Exam Code:	3V0-21.23
Duration:	145 minutes
Number of Questions:	60
Format:	Multiple choice and scenario-based questions
Passing Score:	300 out of 500
Language:	English

For the peace of your mind, you can also try a free demo of VMware 3V0-21.23 Dumps practice material. You will not find such affordable and latest material for VMware certification exam anywhere else. Don't miss these incredible offers. Order real VMware 3V0-21.23 Exam Questions today and start preparation for the certification exam.

VMware 3V0-21.23 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers differentiating between business and technical requirements, as well as conceptual, logical, and physical design. A key skill measured is "Designing System Availability."
Topic 2	<ul style="list-style-type: none">Plan and Design the VMware Solution: This part targets Solution Designers, evaluating their ability to gather business objectives, create conceptual models based on these objectives, develop logical designs, and translate them into physical designs that meet specific requirements like manageability or security.
Topic 3	<ul style="list-style-type: none">VMware Products and Solutions: Targeting VMware Engineers, this section describes VMware Cloud Foundation architecture, its components like vSphere and NSX, benefits such as automation and scalability, and use cases like hybrid cloud environments. It assesses understanding of VMware Validated Solutions.

People who appear in the test of the VMware vSphere 8.x Advanced Design (3V0-21.23) certification face the issue of not finding up-to-date and real exam dumps. ActualTestsIT is here to resolve all of your problems with its actual and latest VMware 3V0-21.23 Questions. You can successfully get prepared for the VMware vSphere 8.x Advanced Design (3V0-21.23) examination in a short time with the aid of these test questions.

VMware vSphere 8.x Advanced Design Sample Questions (Q65-Q70):

NEW QUESTION # 65

An architect is discussing recoverability considerations for a new vSphere solution as part of a requirements workshop. The customer has informed the architect that the company policy is to not perform backups of ESXi hosts due to their selected backup software not supporting the ESXi software. In the past, when hosts have experienced failures, the hosts have been reinstalled from the VMware provided ESXi image and manually configured by an administrator. The customer asks the architect to design a solution that will reduce the manual effort required by the administrator to return a failed host to service. What could the architect include in the design to meet the customer's request?

- A. Create a custom iso image of ESXi and update it each time VMware releases a new update
- B. Use the ESXi command line to perform backups of the ESXi hosts to a central location
- C. Configure ESXi hosts with RAID1 boot volumes
- **D. Configure a host profile per cluster**

Answer: D

Explanation:

A Host Profile in vSphere allows for standardized host configurations across a cluster. Once a profile is created and configured for a cluster, it can be applied to any host in that cluster, ensuring that the configuration is consistent and easily replicated. In case of a host failure, the failed host can be reinstalled from the VMware ESXi image, and the Host Profile can be applied automatically to bring the host back to the desired configuration. This reduces the manual steps required for host recovery, as the configuration will be automatically applied to the reinstalled host.

NEW QUESTION # 66

Which design decision must be included in a design to allow for the deployment of a minimum supported configuration of vCenter High Availability (HA)?

- A. The vCenter HA network will support a latency of less than 50 ms
- **B. A new subnet will be provisioned for vCenter HA services**
- C. A vSphere cluster will consist of more than three nodes
- D. The deployed vCenter Server will be Tiny

Answer: B

NEW QUESTION # 67

An architect is tasked with planning the design of a new vSphere environment. When commissioned, this environment will be used to migrate an existing set of virtual machines.

An inventory of the existing infrastructure, including configured vCPU, RAM and storage sizes has been provided.

In order for each virtual machine to be migrated, which two data sources with peak and average utilization data are required for sizing- (Choose two.)

- A. %Ready
- **B. IOPS**
- C. Disk Write latency
- D. Ballooned memory
- **E. CPU**

Answer: B,E

Explanation:

For each system, capture peak and average utilization for the following items:

- CPU
- RAM
- IOPS
- Network utilization

NEW QUESTION # 68

Application owners require support of a Microsoft Windows Server Failover Cluster (WSFC).

Their current environment consists of the following components:

- vSphere 7.0 and vSAN 7.0
- External array supporting NFS 3.0/4.1, Server Message Block (SMB) 2.1
- 10 GbE storage connectivity for all devices

The solution architect is tasked with coming up with a solution to meet this requirement while utilizing their existing investments.

Which two recommendations could the architect make- (Choose two.)

- A. Use the SMB 2.1 protocol for sharing disks

- B. Use raw device mapping (RDM)
- C. Run WSFC on vSAN iSCSI Target Service
- D. Use NFS 4.1 shares for quorum and shared disk
- E. Use vSAN native support for WSFC

Answer: B,E

Explanation:

Only Clustered VMDKs, vVols and RDMs allowed for Microsoft Windows Server Failover Cluster (WSFC).

NEW QUESTION # 69

Which requirement would be classified as a functional requirement within the application design documentation?

- A. The application must be capable of handling 200 transactions per second.
- B. Administrators must monitor the network traffic of the desired systems.
- C. The application must be hosted with redundancy levels of N+1 or better.
- D. Penetration testing must be executed quarterly with a pass rate of 80% or higher.

Answer: B

NEW QUESTION # 70
