Reliable AD0-E724 Test Objectives | Question AD0-E724 Explanations

If you want to get promotions or high-paying jobs in the Adobe sector, then it is important for you to crack the Commerce Developer Professional (AD0-E724) certification exam. The Adobe AD0-E724 certification has become the best way to validate your skills and accelerate your tech career. AD0-E724 Exam applicants who are doing jobs or busy with their other matters usually don't have enough time to study for the test.

Adobe Commerce Developer Professional Sample Questions (Q31-Q36):

NEW QUESTION # 31
How should a grid or form be included in an admin page layout using the Ul Component?

- A. <referenceContainername='content''> q <uiComponentname="example_listing.xml7> </referenceContainer>
- B. <referenceContainername='content'> q <uiComponent name="example_listing7> </referenceContainer>
- C. <referenceContainername='content''>
  <uiComponentname="Vendor_Module::ul_component/example_listing.xml7> </referenceContainer>

Answer: B

Explanation:
To include a grid or form in an admin page layout using the UI Component, the correct approach is to use the< uiComponent name="example_listing"/>within a<referenceContainer name='content'>block of the layout XML file. This method directly references the UI component's configuration file (e.g.,example_listing.
xml) which defines the structure andfunctionality of the UI component, such as grids or forms. This configuration file is located under theview/adminhtml/ui_componentdirectory of the corresponding module.

NEW QUESTION # 32

An Adobe Commerce developer is tasked to add a file field to a custom form in the administration panel, the field must accept only .PDF files with size less or equal than 2 MB. So far the developer has added the following code within the form component xml file, inside the fieldset node:

```xml
<field name="pdf_file" formElement="fileUploader">
    <formElements>
        <fileUploader>
            <settings>
                <uploaderConfig>
                    <param xsi:type="string" name="url">myvendor_mymodule/customForm/uploadPdf</param>
                </uploaderConfig>
            </settings>
        </fileUploader>
    </formElements>
</field>
```

How would the developer implement the validations?

A)

Add the Validations Within the HyVendor\MyModule\Controller\Adminhtml\CustomEntity\UploadPdf Controller

```php
public function execute()
{
    $file = $this->fileUploaderFactory->create($this->getRequest()->getPdfFile());
    if($file->getExtexsion() == 'pdf') {
        throw new InvalidFileException(__('The file must be PDF.'));
    }
    if($file->getSize() >= '2048000') {
        throw new InvalidFileException(__('The file size must be less or equal than 2MB'));
    }

    return $this->resultFactory->create(ResultFactory::TYPE_PAGE);
}
```

B)

Add a virtual type forMyvendor\MyModuie\Model\customPdfupioader specifying the aiiowedExtensions and the maxFiiesize for the constructor, within the module's di.xml:

```xml
<type name="MyVendor\MyModule\Model\CustomPdfUploader">
    <arguments>
        <argument name="allowedExtensions" xsi:type="string">pdf</argument>
        <argument name="maxFileSize" xsi:type="number">2048000</argument>
    </arguments>
</type>
```

C)

Add the following code inside the<settings> node:

```xml
<allowedExtensions>pdf</allowedExtensions>
<maxFileSize>2048000</maxFileSize>
```

- A. Option B
- B. Option C
- C. Option A

Answer: B

Explanation:
To add file upload validation for a custom form field in the Adobe Commerce admin panel, which should restrict the file type to .pdf and limit the file size to 2 MB, the recommended approach is to include the validation parameters directly within the <settings> node in the form'sXML configuration. This ensures that the validation occurs on the client-side as well as server-side, providing immediate feedback to users before submission.
Option C is correct for the following reasons:
* Adding Validation Inside <settings>:By placing the <allowedExtensions> and <maxFileSize> tags within the <settings> node of the XML configuration, the system will enforce these restrictions directly within the form component. This method leverages Magento's built-in support for validation settings, which ensures that only files matching the specified criteria (.pdf files of 2 MB or smaller) are accepted by the form.
* Explanation: Magento UI components allow for client-side validation through the <settings> node, where attributes such as allowedExtensions and maxFileSize are used to control file upload constraints. This approach not only validates the file size and type but also integrates seamlessly with Magento's front-end validation mechanisms.

NEW QUESTION # 33

Which Adobe Commerce table stores all cron data?

- A. schedule
- B. cron_schedule
- C. cronjob

Answer: B

Explanation:

The Adobe Commerce table that stores all cron job data iscron_schedule. This table maintains records of all scheduled cron tasks, including their statuses, execution times, and any messages related to their execution. It plays a central role in Magento's scheduling system, allowing for themanagement and monitoring of background tasks that are essential for various system functions and integrations.

NEW QUESTION # 34

In which two directories are third-party modules located by default? (Choose two.)

- A. app/modules/
- B. app/code/
- C. vendor/
- D. app/packages/

Answer: B,C

Explanation:

By default, third-party modules are located in vendor/ or app/code/ directories. The vendor/ directory contains modules that are installed using Composer, while the app/code/ directory contains modules that are manually copied or cloned from a repository. Third-party modules in Magento 2 are typically located in two directories by default: thevendor/directory and theapp/code/directory. Thevendor/directory is used for modules that are installed via Composer, Magento's dependency manager, which includes both Magento's core modules and third-party modules. Theapp/code/ directory is used for custommodules developed specifically for the project or for third-party modules that are manually installed without Composer. These conventions provide a structured approach to managing Magento modules, whether they are part of Magento's core functionality, contributed by the community, or developed for specific projects.

NEW QUESTION # 35

A developer needs to extend the existing jQuery widget. Which jQuery function is used for this purpose?

- A. $.widget
- B. $.ui
- C. $.mage

Answer: A

Explanation:

To extend an existing jQuery widget in Adobe Commerce, the$.widgetfunction is used. This function is part of jQuery UI's widget factory and is a powerful tool for creating stateful plugins with a consistent API. It allows developers to create a new widget that inherits from an existing widget, enhancing or modifying its functionality, making option C the correct answer.

NEW QUESTION # 36

......

The pass rate is 98% for AD0-E724 exam bootcamp, if you choose us, we can ensure you that you can pass the exam just one time. In addition, we offer you free demo to have a try before buying, so that you can know what the complete version is like. In order to strengthen your confidence for AD0-E724 training materials, we are pass guarantee and money back guarantee, and we will refund your money if you fail to pass the exam. We have a professional service team and they have the professional knowledge for AD0-E724 Exam Bootcamp, if you have any questions, you can contact with them.
