Realistic Practice C-S4EWM-2023 Questions Provide Prefect Assistance in C-S4EWM-2023 Preparation

If you want to make one thing perfect and professional, then the first step is that you have to find the people who are good at them. In this C-S4EWM-2023 exam braindumps field, our experts are the core value and truly helpful with the greatest skills. So our C-

S4EWM-2023 practice materials are perfect paragon in this industry full of elucidating content for exam candidates of various degrees to use for reference. Just come to buy our C-S4EWM-2023 study guide!

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q17-Q22):

NEW QUESTION # 17

When creating new document types, what must you keep in mind about system profiles?

- **A. That the profiles are predefined and not changeable**
- B. That you have to define your own profiles for your specific processes
- C. That you should use the profiles created by Business Configuration Sets (BC Sets)
- D. That the profiles have to be assigned to your new document type

Answer: A

NEW QUESTION # 18

Which of the following objects can you assign to a resource? Note: There are 2 correct answers to this question.

- A. Bin access type
- B. Handling unit type
- **C. Resource type**
- **D. Resource group**

Answer: C,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In SAP EWM, resources (e.g., forklifts, workers) are assigned attributes for task execution. Option A ("Resource type") is correct as it defines the resource's capabilities (e.g., forklift), and option C ("Resource group") is correct because it groups resources for assignment rules, both configured in SPRO: SCM Extended Warehouse Management > Resource Management > Define Resource Type and Define Resource Group. Option B (bin access type) is bin-related, and option D (handling unit type) is HU-specific, neither directly assigned to resources.

NEW QUESTION # 19

For what type do you define the replenishment method?

- A. Material type
- B. Warehouse process type
- C. Document type
- **D. Storage type**

Answer: D

Explanation:

The replenishment method in SAP EWM is defined for:

* D. Storage Type:

* Storage types are the fundamental units in warehouse structure where replenishment methods are defined.

* The method specifies how replenishment is triggered and processed for a given storage type.

Incorrect Options:

* A: Warehouse process types define task execution rules but do not govern replenishment.

* B: Document types are unrelated to replenishment.

* C: Material types pertain to product categorization, not replenishment.

References:

* SAP Help Portal: Replenishment Configuration in Storage Types

* SAP EWM Documentation: Storage Type-Specific Replenishment Methods

NEW QUESTION # 20

Using embedded EWM, what options do you have for the goods receipt posting for external procurement?

Note: There are 2 correct answers to this question.

- A. Use synchronous goods receipt where you post the GR in ERP.
- **B. Use the EWM Inbound Delivery to post goods receipt.**
- **C. Use the ERP Inbound Delivery to post goods receipt.**
- D. Use synchronous goods receipt where you post the GR in EWM.

Answer: B,C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In embedded EWM within SAP S/4HANA Cloud, Private Edition, goods receipt (GR) for external procurement can be posted using two primary methods. Option B ("Use the ERP Inbound Delivery to post goods receipt") is correct because the ERP inbound delivery (created in SAP ERP/S/4HANA MM) serves as the reference document, which is then replicated to EWM for warehouse processing. Option C ("Use the EWM Inbound Delivery to post goods receipt") is also correct because the inbound delivery in EWM, derived from the ERP document, is where the actual GR is confirmed and posted back to ERP via integration.

Synchronous GR (options A and D) is not a standard feature in embedded EWM for external procurement, as the process relies on asynchronous communication between ERP and EWM via queued remote function calls (qRFC). The GR posting is finalized in ERP based on EWM confirmation, ensuring inventory alignment.

NEW QUESTION # 21

What determines the source bin of a product in an inbound delivery? Note: There are 2 correct answers to this question.

- A. Warehouse task
- B. Storage process
- **C. Staging area and door determination**
- **D. Warehouse process type**

Answer: C,D

NEW QUESTION # 22

.....

As we all know, respect and power is gained through knowledge or skill. The society will never welcome lazy people. Do not satisfy what you have owned. Challenge some fresh and meaningful things, and when you complete C-S4EWM-2023 exam, you will find you have reached a broader place where you have never reach. There must be one that suits you best. Your life will become more meaningful because of your new change, and our C-S4EWM-2023 question torrents will be your first step.
