Pass Guaranteed Quiz High Pass-Rate SAP - C-SEC-2405 - Practice SAP Certified Associate - Security Administrator Engine

The content of our hree versions of C-SEC-2405 exam questions is the absolute same, just in different ways to use. Therefore, you do not worry about that you get false information of C-SEC-2405 guide materials. According to personal preference and budget choice, choosing the right goods to join the shopping cart. The 3 formats of C-SEC-2405 Study Materials are PDF, Software/PC, and APP/Online. Each format has distinct strength and advantages to help you pass the exam.

SAP C-SEC-2405 Exam Syllabus Topics:

Topic	Details

Topic 1	• Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.
Topic 2	• Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.
Topic 3	• Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
Topic 4	• Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.
Topic 5	• SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.

SAP Certified Associate - Security Administrator Sample Questions (Q11-Q16):

NEW QUESTION # 11
What is the correct configuration setting in table PRGN_CUST for user assignments when transporting roles within a Central User Administration scenario?

- A. SET_IMP_LOCK_USERS = NOO
- B. USER_REL_IMPORT = NO
- C. SET_IMP_LOCK_USERS = YES
- D. USER_REL_IMPORT = YES

Answer: B

Explanation:
* Context:When transporting roles in a Central User Administration (CUA) scenario, certain configurations in table PRGN_CUST affect user assignments.
* Solution Explanation:
* SettingUSER_REL_IMPORT = NOensures that user assignments are not transported along with roles, maintaining assignment control in the target system.
SAP Security References:
* SAP CUA Role Transport Documentation
* SAP PRGN_CUST Configuration Guide

NEW QUESTION # 12
When planning an authorization concept for your SAP S/4HANA Cloud Public Edition implementation, what rules must you consider? Note: There are 2correct answers to this question.

- A. SAP Fiori apps, dashboards, and displays can be assigned directly to a business role.
- B. Business catalogs can be assigned directly to a business role.
- C. Business roles can be assigned directly to a business user.
- D. Business catalogs can be assigned directly to a business user.

Answer: B,C

Explanation:
* Context:SAP S/4HANA Cloud Public Edition requires careful planning of the authorization concept to ensure proper access control.
* Solution Explanation:
* C:Business roles serve as containers for catalogs and can be assigned directly to users.
* D:Business catalogs are assigned to business roles, defining the scope of access.
SAP Security References:
* SAP Fiori Role and Catalog Management Guide
* SAP Help Portal for Business Role Management

NEW QUESTION # 13
What are some disadvantages of a Composite Role? Note: There are 2 correct answers to this question.

- A. Changes to the authorizations can only be made using the included roles.
- B. Menus from the included roles cannot be mixed.
- C. Transactions that are deleted from the Composite Role menu are also removed from the included roles.
- D. Changes to the included roles are not immediately visible in the composite role menu, requiring a renewed import.

Answer: A,D

Explanation:
Composite roles in SAP systems group multiple single roles to simplify user assignment, but they have notable disadvantages. One disadvantage is that changes to the included single roles, such as adding or removing transactions, are not immediately visible in the composite role's menu, requiring a renewed import to update the composite role's structure. This delay can lead to inconsistencies during role maintenance, complicating administration. Another disadvantage is that changes to authorizations within a composite role can only be made through the included single roles, as composite roles do not allow direct authorization maintenance. This restriction limits flexibility and requires administrators to modify each single role individually, increasing effort and potential for errors. Menus from included roles can be mixed in the composite role, making option B incorrect, and deleting transactions from the composite role menu does not affect the included roles, ruling out option D. These limitations highlight the need for careful planning when using composite roles to ensure efficient and secure role management.

NEW QUESTION # 14
Which of the following allow you to control the assignment of table authorization groups? Note: There are 2 correct answers to this question.

- A. V_BRG_54
- B. SSM_CUST
- C. V_DDAT_54
- D. PRGN_CUST

Answer: A,C

Explanation:
In SAP systems, table authorization groups are controlled using views V_DDAT_54 and V_BRG_54.
V_DDAT_54 is a maintenance view that allows administrators to assign tables to authorization groups, defining which groups protect specific tables and ensuring that access is restricted to authorized users.
V_BRG_54 is another view used to manage table authorization groups, particularly for assigning and maintaining group definitions that link to authorization objects like S_TABU_DIS. These views enable granular control over table access, supporting data security and compliance. PRGN_CUST is a customizing table for role and authorization settings, not specifically for table authorization groups, and SSM_CUST is related to system settings, not table access control. By using V_DDAT_54 and V_BRG_54, SAP provides a structured approach to managing table authorizations, ensuring that sensitive data in tables is protected against unauthorized access while allowing efficient administration of access controls.

NEW QUESTION # 15
Which user type in SAP S/4HANA Cloud Public Edition is used for API access, system integration, and scenarios where automated

data exchange is required?

- A. SAP Technical User
- B. SAP Communication User
- C. SAP Administrative User
- D. SAP Support User

Answer: B

NEW QUESTION # 16

......

What we provide for you is the latest and comprehensive C-SEC-2405 exam dumps, the safest purchase guarantee and the immediate update of C-SEC-2405 exam software. Free demo download can make you be rest assured to buy; one-year free update of C-SEC-2405 Exam software after payment can assure you during your preparation for the exam. What's more, what make you be rest assured most is that we develop the exam software which will help more candidates get C-SEC-2405 exam certification.
