## Certified Health Care and CHFM Exam Flash Cards. Questions with Verified Answers 2024.

Fire protection for a new construction sleeping suite not exceeding 7500 sqft - **Correct answer** The room must have a sprinkler system and complete smoke detection OR sprinkler system with QRS or residential sprinklers

Fire protection for a new construction sleeping suite greater than 7500 sqft - **Correct answer** The room must have direct supervision AND total coverage automatic smoke detection and sprinkler system protection with QRS or residential sprinkler

Fire protection for existing construction not exceeding 5000 sqft. - **Correct answer** The room must have automatic smoke detection

Fire protection for existing construction up to 10,000 sqft - **Correct answer** Additional fire protection - Sprinkler protection and smoke partitions.

Fire protection for a non sleeping suite up to 12,500 sqft - **Correct answer** The facility must have either quick response sprinklers or completed smoke detection

Fire protection for a non sleeping suite up to 15,000 sqft. - **Correct answer** The facility must have BOTH quick response sprinklers and complete smoke detection

Where can you store up to 300 cubic feet of medical gas (12 E Cylinders) - **Correct answer** They can be stored in a smoke zone without separation.

Fire protection for a medical gas storage room with 300 cubic feet to 3000 cubic feet worth of Medical Gas - **Correct answer** It is permitted in a non rated room with sprinkler protection and clearance from combustibles

Fire protection for a medical gas storage room with greater than 3000 cubic feet worth of Medical Gas - **Correct answer** Permitted in 1 hour FRR enclosure with vents

A hospital and a business occupancy can be separated by this FRR - **Correct answer** 2 hour FRR

A ambulatory care facility and a business occupancy can be separated by this FRR - **Correct answer** 1 hour FRR

How far can a space be in a room from an exit corridor - **Correct answer** 100 feet (Please note that it has to be 150/200 feet from the actual exit or smoke door)

The free demos do honor to the perfection of our latest CHFM exam torrent, and also a performance of our considerate after sales services. Those demos serve as epitomes of real CHFM quiz guides for your reference. In our demos, some examples or question points were enumerated as some representatives of our CHFM Test Prep. How convenient and awesome of it! By the free trial services you can get close realization with our CHFM quiz guides, and know how to choose the perfect versions before your purchase.

In addition, our CHFM test prep is renowned for free renewal in the whole year. As you have experienced various kinds of exams, you must have realized that renewal is invaluable to study materials, especially to such important CHFM exams. And there is no doubt that being acquainted with the latest trend of exams will, to a considerable extent, act as a driving force for you to pass the exams and realize your dream of living a totally different life. So if you do want to achieve your dream, buy our CHFM practice materials.

## Reliable Medical Professional CHFM Test Vce, Reliable CHFM Real Test

We have the CHFM Questions and answers with high accuracy and timely update. Our professional team checks CHFM answers and questions carefully with their professional knowledge. We also have the latest information about the exam center, and will update the version according to the new requirements. Pass guarantee and money back guarantee are also our principles, and if you have any questions, you can also consult the service staff.

## Medical Professional Certified Healthcare Facility Manager (CHFM) certification exam Sample Questions (Q106-Q111):

### NEW QUESTION # 106

Which of the following types of injuries is most likely to occur during an MRI scanning process?

- A. visual impairment
- B. radiation overexposure
- C. missile projection
- D. permanent hearing loss

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

MRI (Magnetic Resonance Imaging) scanners do not use ionizing radiation; instead, they use powerful magnetic fields and radiofrequency energy. The primary safety hazard is the projectile effect (missile effect), where ferromagnetic objects are pulled violently into the scanner bore. This is one of the most well- documented risks in MRI safety and is a leading cause of MRI accidents.

\* Correct Answer (D. missile projection): Strong magnetic fields can accelerate ferromagnetic objects, causing serious patient/staff injury or equipment damage.

\* Incorrect Options:

\* A. visual impairment: Not a recognized risk from MRI scanning itself.

\* B. radiation overexposure: MRI does not use ionizing radiation, unlike CT or X-ray.

\* C. permanent hearing loss: While MRI noise can be damaging without ear protection, the most likely injury of those listed is projectile accidents.

Relevance to CHFM: This falls under Compliance and Safety domains. Facility managers must ensure MRI safety zones, access control, ferromagnetic detection systems, and staff training to prevent accidents.

References:

ACR (American College of Radiology): MRI Safety Guidelines - Projectile/missile effect identified as the greatest risk.

NFPA 99: Health Care Facilities Code, Chapter 15 - MRI safety environment requirements.

CHFM Candidate Handbook - Compliance with clinical safety codes and standards.

### NEW QUESTION # 107

Which project delivery method leaves contractor input out of the design phase?

- A. Design Build (DB)
- B. Construction Management at Risk (CMAR)
- C. Integrated Delivery Project (IDP)
- D. Design Bid Build (DBB)

**Answer: D**

Explanation:

Design-Bid-Build (DBB) is the traditional project delivery method where the architect/engineer completes design before contractors bid. The contractor has no input in the design phase.

IDP, DB, and CMAR all include contractor involvement earlier.

References: AIA Project Delivery Handbook; CHFM Handbook - Planning, Design, and Construction.

### NEW QUESTION # 108

"Guidelines for Preventing the Transmission of Mycobacterium Tuberculosis in Healthcare Facilities" is a document produced by the

- A. OSHA.
- B. CDC.
- C. FDA.
- D. EPA.

**Answer: B**

Explanation:

The Centers for Disease Control and Prevention (CDC) published the document "Guidelines for Preventing the Transmission of Mycobacterium Tuberculosis in Healthcare Facilities". These guidelines provide infection control practices for healthcare facilities, including engineering controls, ventilation requirements, and personal protective equipment (PPE) to minimize the risk of TB transmission.

Correct: CDC (B) - Responsible for publishing this guideline.

Incorrect:

A). FDA - Regulates drugs and medical devices.

C). EPA - Oversees environmental protection and pollutants, not healthcare infection prevention.

D). OSHA - Issues workplace safety standards, but this TB guideline is from CDC.

References:

CDC: Guidelines for Preventing the Transmission of Mycobacterium Tuberculosis in Healthcare Facilities.

CHFM Candidate Handbook - Compliance domain: infection prevention and regulatory guidance.

### NEW QUESTION # 109

An NFPA document using the word "shall" indicates that the item is a

- A. recommendation.
- **B. mandate.**
- C. guideline.
- D. performance standard.

**Answer: B**

Explanation:

NFPA uses mandatory language to indicate requirements:

"Shall" = mandatory requirement (must comply).

"Should" = advisory or recommended practice.

Therefore, when NFPA states "shall," it represents a mandate.

D). mandate (Correct): Required compliance.

A). recommendation / B. guideline: NFPA uses "should" for recommendations.

C). performance standard: Not the intent of "shall" language.

References:

NFPA Manual of Style for NFPA Technical Committee Documents - Terminology definitions.

NFPA 101: Life Safety Code, Preface and style guide on the use of "shall" and "should." AHA/CHFM Candidate Handbook - Compliance domain (interpretation of NFPA codes).

### NEW QUESTION # 110

Fire drills in healthcare occupancies shall include the

- A. evacuation of patients to areas of refuge and evacuation of staff from the building.
- B. evacuation of bedridden and infirmed patients to the adjacent smoke compartment.
- C. transmission of a fire alarm signal and audible alarms on each shift.
- **D. transmission of the fire alarm signal and simulation of emergency fire conditions.**

**Answer: D**

Explanation:

NFPA 101 (Life Safety Code, Chapter 18/19.7.1.4) requires healthcare fire drills to include transmission of the fire alarm signal and a simulation of emergency fire conditions, ensuring staff are trained to carry out emergency duties. Full evacuation of patients is not required during drills.

References: NFPA 101, Sections 18/19.7.1.4; The Joint Commission EOC standards.

### NEW QUESTION # 111

.....

On each attempt, the Medical Professional CHFM practice test questions taker will provide a score report. With this report, one

can find mistakes and remove them for the final attempt. A situation that the web-based test creates is similar to the CHFM Real Exam Questions. Practicing in this situation will help you kill Certified Healthcare Facility Manager (CHFM) certification exam (CHFM) exam anxiety. The customizable feature of this format allows you to change the settings of the Certified Healthcare Facility Manager (CHFM) certification exam (CHFM) practice exam.
