## ServiceNow Certified Implementation Specialist - Hardware Asset Management Sample Questions (Q172-Q177):

### NEW QUESTION # 172

Populating CMDB tables using import sets can inadvertently result in duplicate configuration items (CIs). To minimize this duplication, you can apply what process to the import sets?

- A. Manual reconciliation
- B. Transformation map consolidation
- C. Import set prioritization
- D. Identification and reconciliation

**Answer: D**

Explanation:

The Identification and Reconciliation process in ServiceNow ensures that configuration items (CIs) are correctly matched during the

import process. This prevents duplication by validating unique identifiers, such as serial numbers or UUIDs, ensuring CMDB integrity.

Reference: CMDB Data Reconciliation Practices (ServiceNow CMDB guide).

### NEW QUESTION # 173

What are the main purposes of transfer order line tasks? (Choose two.)

- A. To automate reordering of consumables as they are consumed by users
- B. To move transfer order lines from one stage to another
- C. To move transfer orders from one stage to another
- D. To help track service levels and the time frame needed to complete a transfer order
- E. To help track the total number of assets moved from one stockroom to another

**Answer: B,D**

Explanation:

According to the ServiceNow Product Documentation on Transfer Orders<sup>1</sup>, transfer orders are records that define the movement of assets from one stockroom to another<sup>1</sup>. They can be used to replenish the stock of assets, fulfill asset requests, or relocate assets<sup>1</sup>.

According to the ServiceNow Product Documentation on Transfer Order Line Tasks<sup>2</sup>, transfer order line tasks are records that define the actions that need to be performed for each transfer order line<sup>2</sup>. A transfer order line is a record that defines the quantity and model of the assets that are being transferred<sup>1</sup>.

The main purposes of transfer order line tasks are<sup>2</sup>:

To help track service levels and the time frame needed to complete a transfer order: Transfer order line tasks have a due date and a state that indicate the progress and completion of the transfer order line. They also have a priority and an assignment group that determine the urgency and the responsibility of the transfer order line.

These fields help users to monitor and manage the service levels and the time frame needed to complete a transfer order.

To move transfer order lines from one stage to another: Transfer order line tasks have a type that defines the action that needs to be performed for the transfer order line, such as pick, pack, ship, or receive. As transfer order line tasks are completed, the transfer order line moves from one stage to another, such as requested, in transit, or received. These stages reflect the status and location of the assets that are being transferred.

### NEW QUESTION # 174

How do you calculate residual value?

- A. Subtract storage and lease cost from the cost of the asset
- B. Subtract the salvage value from the cost of the asset
- C. Subtract the depreciation from the cost of the asset
- D. Subtract the amortized value from the cost of the asset

**Answer: B**

### NEW QUESTION # 175

What are the main purposes of transfer order line tasks? (Choose two.)

- A. To automate reordering of consumables as they are consumed by users
- B. To move transfer order lines from one stage to another
- C. To move transfer orders from one stage to another
- D. To help track service levels and the time frame needed to complete a transfer order
- E. To help track the total number of assets moved from one stockroom to another

**Answer: B,D**

Explanation:

According to the ServiceNow Product Documentation on Transfer Orders<sup>1</sup>, transfer orders are records that define the movement of assets from one stockroom to another<sup>1</sup>. They can be used to replenish the stock of assets, fulfill asset requests, or relocate assets<sup>1</sup>.

According to the ServiceNow Product Documentation on Transfer Order Line Tasks<sup>2</sup>, transfer order line tasks are records that define the actions that need to be performed for each transfer order line<sup>2</sup>. ## NEW QUESTION # 176

What is the primary goal of the Inventory tab of the Hardware Asset Management dashboard?

- A. Help the stock manager process transfer orders
- **B. Show the value from maintaining inventory**
- C. Show the value from bulk purchasing
- D. Help the asset manager generate reports
- E. Help the asset manager process purchase orders

**Answer: B**

Explanation:

According to the ServiceNow Hardware Asset Management documentation, the Inventory tab of the Hardware Asset Management dashboard provides a comprehensive view of the inventory functions, such as asset audits, disposal orders, stock orders, and shipments. The primary goal of this tab is to show the value from maintaining inventory, such as reducing costs, improving service delivery, and optimizing asset utilization.

The Inventory tab also helps users to take inventory-related actions, such as creating or managing stock orders, disposal orders, or shipments, scanning assets with a mobile device, and assigning assets to pallets. References:
