

# Practice H12-323\_V2.0 Test Engine - H12-323\_V2.0 Free Study Material

Download Huawei H12-323\_V2.0-ENU Exam Dumps for best preparation

1. The CloudCampus APP mainly includes two functional modules: network and tools.

Which of the following descriptions of the functions under the tool module is wrong?

- A. Check terminal: obtain information about illegally accessed terminals
- B. Wi-Fi status: You can view the current Wi-Fi status information, such as signal strength, channel, negotiation rate, etc.
- C. Game test: Test network jitter and packet loss rate
- D. Test network speed: only supports Internet speed test

**Answer: D**

2. A user views the domain management template information on WAC as follows. Which of the following descriptions is wrong?

- A. The current 4.9G frequency band is not enabled
- B. The current country code is China's country code. If you want to change it, you can use the command country-code to configure it.
- C. The current 5G RF tuning bandwidth is 20 MHz
- D. The current channel loading mode is outdoor mode

**Answer: A**

3. When there are many users in the WLAN network, such as in high-density scenarios, as the number of online users increases, the fierce competition for channels between users leads to poor Internet access quality for each user. In order to ensure the Internet access experience of online users, the user connection admission control (CAC) function can be deployed.

Which of the following descriptions about the user CAC function is wrong?

- A. CAC uses two thresholds to control the access of new users and roaming users respectively.
- B. When a roaming user accesses the radio, the roaming user can access the radio as long as the roaming user threshold is not reached.
- C. When most users use the same service type and the service traffic is average, it is recommended to use the user CAC function based on terminal SNR
- D. When a new user accesses, the AP checks whether the current number of users or the terminal signal-to-noise ratio reaches the threshold for new users. If so, the new user's access is denied and the SSID can be hidden.

**Answer: C**

4. CampusInsight supports application analysis, monitors network-wide applications, and visualizes overview data such as application numbers and traffic. This function relies on the device reporting traffic statistics to CampusInsight, which supports two types of traffic statistics reporting: NetStream-based reporting and application-based reporting.

When selecting application-based reporting, which of the following functions needs to be enabled on the wireless controller?

- A. DFI
- B. RF Tuning
- C. SAC
- D. DA channel scan

**Answer: C**

Since IT certification examinations are difficult, we know many candidates are urgent to obtain valid preparation materials to help them clear exam success. Now we offer the valid H12-323\_V2.0 test study guide which is really useful. If you are still hesitating about how to choose valid products while facing so many different kinds of exam materials, here is a chance, our Huawei H12-323\_V2.0 Test Study Guide is the best useful materials for people.

Huawei H12-323\_V2.0 Exam is a challenging test that requires candidates to have a solid understanding of wireless networking concepts and technologies. Candidates are expected to have hands-on experience working with WLANs and should be familiar with industry-standard tools and techniques for network planning, optimization, and troubleshooting. They should also have a good understanding of the latest trends and developments in the field of wireless networking.

Huawei H12-323\_V2.0 certification exam covers a wide range of topics, such as WLAN fundamentals, WLAN access, WLAN service deployment, WLAN troubleshooting, and WLAN security. HCIP-WLAN V2.0 certification exam is designed to assess the candidate's proficiency in WLAN technologies, including WLAN architecture, WLAN standards and protocols, WLAN devices, and WLAN management. Passing the HCIP-WLAN V2.0 certification exam demonstrates to employers that the candidate has the knowledge and skills required to design, deploy, and maintain WLAN networks that meet business requirements and provide optimal user experience.

## H12-323\_V2.0 Free Study Material, H12-323\_V2.0 Online Training Materials

The HCIP-WLAN V2.0 (H12-323\_V2.0) practice test questions prep material has actual HCIP-WLAN V2.0 exam questions for our customers so they don't face any hurdles while preparing for Huawei H12-323\_V2.0 certification exam. The study material is made by professionals while thinking about our users. We have made the product user-friendly so it will be an easy-to-use learning material. We even guarantee our users that if they couldn't pass the Huawei H12-323\_V2.0 Certification Exam on the first try with their efforts, they can claim a full refund of their payment from us (terms and conditions apply).

Huawei H12-323\_V2.0 Certification Exam is an advanced-level certification that is suitable for professionals who are seeking to advance their careers in the field of wireless networking. HCIP-WLAN V2.0 certification is designed to help professionals gain a deeper understanding of Huawei technologies and to demonstrate their expertise in wireless networking.

### Huawei HCIP-WLAN V2.0 Sample Questions (Q295-Q300):

#### NEW QUESTION # 295

In WLAN networking, which of the following descriptions about GI are correct? (Multiple choice)

- A. GI can be divided into normal GI and Short GI. When there are few interference factors in the indoor environment, it is recommended to use Short GI.
- B. The larger the GI, the stronger the anti-interference ability
- C. GI refers to the protection interval between symbols, which is used to reduce the impact of interference.
- D. The smaller the GI, the higher the transmission efficiency

**Answer: A,B,C,D**

#### NEW QUESTION # 296

Which of the following options are correct about the wireless health assessment function of CampusInsight intelligent operation and maintenance platform? (Multiple choice)

- A. The wireless health report is sent to users in the corresponding user group in PDF format. The report includes analysis of indicators such as access success rate, access time, throughput compliance rate, capacity health, signal and interference, and roaming compliance rate.
- B. Detailed disclosure and diagnosis of key experience indicators, including the health of the experience indicator and various factors affecting the indicator.
- C. Ranking different networks or different regions of the same network based on comprehensive experience evaluation to identify networks or regions with low overall health or low rankings in certain key indicators
- D. The evaluation is mainly based on the following key indicators: access success rate, access time, coverage and interference, roaming compliance rate, capacity compliance rate, throughput compliance rate, AP forwarding efficiency

**Answer: A,B,C**

#### NEW QUESTION # 297

In a high-density WLAN scenario, the signal-to-noise ratio detected by the terminal must reach at least () dB to ensure a balance between bandwidth rate and signal coverage.

**Answer:**

Explanation:

30

#### NEW QUESTION # 298

The WLAN network of a certain enterprise headquarters adopts WAC+FIT AP networking mode, and the branch adopts Leader

AP networking mode. Now the headquarters is required to uniformly manage the WLAN network of the branch, so the Leader AP of the branch needs to be switched to FIT AP.

- A. False
- **B. True**

**Answer: B**

#### NEW QUESTION # 299

As shown in the figure, which of the following descriptions of the CampusInsight interface is correct?

- **A. Engineers checking performance experience**
- B. Engineers are checking the service topology
- C. Engineers are checking the health of wireless users
- D. Engineer looking at the wireless user journey

**Answer: A**

#### NEW QUESTION # 300
