Which of the following is a mandatory field to create a purchase order for consumables?

- A. Purchase Info Record
- B. Item Category
- C. Material Number
- D. Account Assignment Category

**Answer: D**

Explanation:

When creating a purchase order for consumables in SAP S/4HANA Cloud Public Edition, the Account Assignment Category is a mandatory field. Below is an explanation of the correct answer:

\* Account Assignment Category (B): Consumable materials (e.g., office supplies, maintenance materials) are not inventory-managed and require an account assignment to determine how costs will be allocated (e.g., cost center, project, or asset). The account assignment category ensures proper financial accounting for these items.

\* Material Number (A): For consumables, the material number is optional because consumable materials may not always have a material master record. Instead, they can be procured using a short description.

\* Item Category (C): The item category is automatically determined based on the account assignment category and procurement type, so it is not manually entered.

\* Purchase Info Record (D): A purchase info record is not mandatory for consumables, as pricing and conditions can be entered directly in the purchase order.
