

Practice Test 3V0-21.23 Pdf - 3V0-21.23 Test Score Report

P.S. Free & New 3V0-21.23 dumps are available on Google Drive shared by DumpsMaterials: <https://drive.google.com/open?id=1FSyvFRwwbsbHI8lkNCYDWSi5tRiHsvdP>

Our 3V0-21.23 study braindumps are comprehensive that include all knowledge you need to learn necessary knowledge, as well as cope with the test ahead of you. With convenient access to our website, you can have an experimental look of free demos before get your favorite 3V0-21.23 prep guide downloaded. You can both learn useful knowledge and pass the exam with efficiency with our 3V0-21.23 Real Questions easily. We are on the way of meeting our mission and purposes of helping exam candidates to consider the exam as a campaign of success and pass the exam successfully.

VMware 3V0-21.23 Exam Syllabus Topics:

Topic	Details
Topic 1	IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers differentiating between business and technical requirements, as well as conceptual, logical, and physical design. A key skill measured is "Designing System Availability."
Topic 2	Plan and Design the VMware Solution: This part targets Solution Designers, evaluating their ability to gather business objectives, create conceptual models based on these objectives, develop logical designs, and translate them into physical designs that meet specific requirements like manageability or security.

Topic 3	VMware Products and Solutions: Targeting VMware Engineers, this section describes VMware Cloud Foundation architecture, its components like vSphere and NSX, benefits such as automation and scalability, and use cases like hybrid cloud environments. It assesses understanding of VMware Validated Solutions.

Avail Pass-Sure Practice Test 3V0-21.23 Pdf to Pass 3V0-21.23 on the First Attempt

You may be in a condition of changing a job, but having your own career is unbelievably hard. Then how to improve yourself and switch the impossible mission into possible is your priority. If you want to pass 3V0-21.23 exam, here come our 3V0-21.23 exam prep giving you a helping hand. Our company has the highly authoritative and experienced team to help you pass the 3V0-21.23 Exam. You can not only get the most helpful and valid 3V0-21.23 exam questions, but also you can get according suggestions on how to pass the 3V0-21.23 exam.

VMware vSphere 8.x Advanced Design Sample Questions (Q34-Q39):

NEW QUESTION # 34

A customer defines a requirement to minimize the vMotion migration time during a maintenance period. The servers being used are equipped with eight 1 GbE network adapters.

Per the defined logical network configuration, there are two network adapters each used for:

- Management traffic
- vMotion traffic
- iSCSI traffic
- Virtual machine traffic

Which design decision should the architect make to meet the customer requirement?

- A. Combine vMotion and Management traffic to make use of four adapters.
- B. Use Network I/O Control to define a reservation for vMotion traffic.
- C. Implement Multi-NIC vMotion by adding additional vMotion VMkernels.
- D. Configure a dedicated TCP/IP stack for vMotion traffic.

Answer: C

Explanation:

We maintain the 2 x 1 GbE network adapters for vMotion and then configure multiple VMkernel interfaces using the same NIC and network. Each time you add a VMkernel adapter and enable it for vMotion, you create a new stream. With more streams, there is greater bandwidth utilization.

NEW QUESTION # 35

What do risks in the context of design refer to?

- A. The specific tasks and operations the design must perform.
- B. Constraints imposed by industry regulations and standards.
- C. Potential events or circumstances that could negatively impact the design's success.
- D. Assumptions about the hardware and infrastructure requirements.

Answer: C

NEW QUESTION # 36

A Cloud Service Provider wants to introduce backup as a service for a customer's vSphere-based virtual machines.

The following information is noted:

- They have a single four-port (2 × 10 GbE and 2 × 1 GbE) NIC per ESXi host
- All top-of-rack (ToR) switches are 10 GbE and fully populated

- The backup traffic must not impact existing services

Which two recommendations should the architect make to help the customer incorporate the service- (Choose two.)

- **A. Enable and tag traffic on the backup distributed port group**
- B. Replace the existing NIC with a two-port 25 GbE NIC per ESXi host
- **C. Match the Class of Service (CoS) and Differentiated Services Code Point (DSCP) values to the physical network**
- D. Add a new two-port 10 GbE NIC per ESXi host
- E. Create a new virtual switch using the 1 GbE uplinks

Answer: A,C

Explanation:

Assign priority tags to traffic, such as VoIP and streaming video, that has higher networking requirements for bandwidth, low latency, and so on. You can mark the traffic with a CoS tag in Layer 2 of the network protocol stack or with a DSCP tag in Layer 3.

<https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.networking.doc/GUID-84207BEA-986E-443E-94B0-B1EC66C56598.html>

NEW QUESTION # 37

During a requirements gathering workshop to design a physical to virtual migration, the customer provides the following information:

- There is no physical firewall in the data center with no anticipated plans for a future network refresh.
- Leveraging the virtual infrastructure to mitigate the lack of network security must be addressed in the design.
- All physical servers to be migrated exist on the same VLAN.

Which recommendation should the architect make to address the customer requirement with regard to virtual networking?

- **A. Split the virtual machines into several VLANs**
Use tag actions
- B. Enable traffic filtering and marking
Use allow or drop actions
- C. Create port groups with different names and same VLAN IDs
Enable traffic shaping for ingress and egress traffic
- D. Disable traffic filtering and marking
Use tag actions

Answer: A

Explanation:

"...All physical servers to be migrated exist on the same VLAN..."

Split the virtual machines into several VLANs

NEW QUESTION # 38

An architect is tasked with designing a greenfield VMware software-defined data center (SDDC) solution that will be used to deliver a private cloud service for a customer.

During the initial meeting with the service owner and business sponsor, the customer has provided the following information to help inform the design:

- The solution must support the concurrent running of 1,000 virtual machines
- The production environment must be delivered across two geographically dispersed data centers
- All virtual machines must be capable of running in either data center.
- The two data centers are currently connected to each other through a single but diversely routed, high bandwidth and low latency link.
- The link between the two data centers is capable of supporting a round-trip time (RTT) of 150 ms
- The existing server hardware standard document states that all virtual infrastructure hosts must be deployed using vSAN ReadyNodes
- The service owner has stated that it is critical to ensure the availability target of 99.9%
- All virtual machine backups must be completed using the existing backup service
- The recovery time objective (RTO) for the service is five minutes
- The recovery point objective (RPO) of the service is four hours

Which two elements represent risks to the successful delivery of this solution? (Choose two.)

- A. The RTT on the link between the two data centers
- **B. The use of the existing backup service**
- C. The use of vSAN ReadyNodes
- **D. The network connectivity between data center sites**
- E. The use of only two data centers

Answer: B,D

NEW QUESTION # 39

.....

A good brand is not a cheap product, but a brand that goes well beyond its users' expectations. The value of a brand is that the 3V0-21.23 exam questions are more than just exam preparation tool -- it should be part of our lives, into our daily lives. Do this, therefore, our 3V0-21.23 question guide has become the industry well-known brands, but even so, we have never stopped the pace of progress, we have been constantly updated the 3V0-21.23 real study dumps. The most important thing is that the 3V0-21.23 exam questions are continuously polished to be sold, so that users can enjoy the best service that our products bring. Our 3V0-21.23 real study dumps provide users with comprehensive learning materials, so that users can keep abreast of the progress of The Times.
