As technology continues to advance, the need for network video surveillance has become increasingly important. With this rise in demand for security, Axis Communications has created the Axis Network Video Exam (ANVE), designed to measure an individual's understanding and knowledge of network video surveillance.

Axis Network Video Exam Sample Questions (Q250-Q255):

NEW QUESTION # 250

In environments with rain or snow, an Axis bullet camera has which benefit?

- A. The built-in IR immediately melts any snow landing on the front side
- **B. The weather shield is tilted with the camera, protecting the glass front**
- C. The built-in wipers automatically removes any drops blocking the view
- D. The camera can vibrate to shake off any drops from the glass front

Answer: B

Explanation:

In environments with rain or snow, an Axis bullet camera benefits from having a weather shield that tilts with the camera. This shield helps protect the camera's glass front from raindrops and snow, ensuring clear visibility and reducing the need for frequent cleaning. The design helps maintain optimal image quality in various weather conditions. References: Axis Communications Bullet Camera Features

NEW QUESTION # 251

The camera sensors in Axis' multidirectional cameras can be

- A. added or removed.
- **B. individually adjusted.**
- C. moved only as one unit.
- D. stitched for a seamless image.

Answer: B

Explanation:

The camera sensors in Axis' multidirectional cameras can be individually adjusted. This flexibility allows each sensor to be positioned independently, enabling optimal coverage of the desired areas. Such adjustability ensures that a single camera unit can cover multiple directions or areas, enhancing the efficiency and effectiveness of the surveillance setup. Axis' multidirectional camera specifications and manuals provide detailed information on this feature.

NEW QUESTION # 252

What type of camera is recommended to be used in an extremely hot environment?

- A. Cameras that end with -V
- **B. Cameras that end with -C**
- C. Cameras that end with -E
- D. Cameras that end with -R

Answer: B

NEW QUESTION # 253

Axis recommends shielded cables for outdoor installations primarily to ensure

- A. Image quality.
- B. Life time of cable installations.
- **C. Surge protection.**
- D. Conformity with SMPTE standard.

Answer: C

Explanation:

Axis recommends shielded cables for outdoor installations primarily to ensure surge protection. Shielded cables help to protect the system against electrical surges and electromagnetic interference, which can cause damage to the cameras and other connected devices. By using shielded cables, the integrity and reliability of the surveillance system are maintained, even in environments prone to electrical disturbances. [Reference:

NEW QUESTION # 254

A customer wants to minimize the risk of losing recordings if there is a disconnect between the camera and the server. What is recommended?

- A. UPS
- B. Co-location
- C. RAID
- **D. Failover recordings**

Answer: D

Explanation:

To minimize the risk of losing recordings if there is a disconnect between the camera and the server, failover recordings are recommended. This involves having a secondary recording location, such as an SD card in the camera, that can store video footage temporarily until the connection to the server is restored. This ensures continuous recording and prevents data loss. Axis Communications' documentation on system reliability and failover solutions supports this recommendation.
