UiPath-ADPv1 New Braindumps Ebook | UiPath-ADPv1 Latest Exam Review

Our UiPath-ADPv1 practice torrent offers you more than 99% pass guarantee, which means that if you study our UiPath-ADPv1 materials by heart and take our suggestion into consideration, you will absolutely get the UiPath-ADPv1 certificate and achieve your goal. Meanwhile, if you want to keep studying this course, you can still enjoy the well-rounded services by UiPath-ADPv1 Test Prep, our after-sale services can update your existing UiPath-ADPv1 study materials within a year and a discount more than one year.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q104-Q109):

NEW QUESTION # 104

A developer wants to add items to a list of strings using the Invoke Method activity. The list is declared as follows:

The Invoke Method activity has the following properties:

The Parameters property is as follows:

Based on the information shown in the exhibits what is the outcome of the Invoke Method activity?

- A. An exception will be thrown.
- B. Colors will contain an item with the value "Colors: Yellow".
- C. Colors will contain an item with an empty value.
- D. Colors will contain an item with the value "Yellow".

Answer: D

Explanation:

The Invoke Method activity is used to invoke a method of a class or an object. In this case, the developer wants to add items to a

list of strings using the Invoke Method activity. The list is declared as follows:

Dim Colors As New List(Of String)

This means that the list is named Colors and it can store strings. The Invoke Method activity has the following properties:

TargetType: System.Collections.Generic.List`1[System.String]. This means that the target type is a generic list of strings.

TargetObject: Colors. This means that the target object is the list named Colors.

MethodName: Add. This means that the method name is Add, which is a method of the list class that adds an item to the end of the list.

Parameters: In, String, Yellow. This means that the parameter direction is In, which means that the value is passed to the method.

The parameter type is String, which means that the value is a string. The parameter value is Yellow, which means that the value is the string "Yellow".

Based on the information shown in the exhibits, the outcome of the Invoke Method activity is that Colors will contain an item with the value "Yellow". This is because the Invoke Method activity will add "Yellow" to the list of strings declared as Colors.

NEW QUESTION # 105

What actions must be manually selected in the App/Web Recorder before recording a step?

- A. Click on buttons, links, and other clickable elements such as icons or images. Type text in a text area such as a text box. Select or clear a check box. Send keyboard shortcuts using your keyboard. Select an item from a drop-down.
- B. Select or clear a check box. Send keyboard shortcuts using your keyboard. Select an item from a drop-down.
- C. Copy text using the Get Text activity. Hover over an element using the Hover activity. Highlight an element using the Highlight activity.
- D. Copy text using the Get Text activity. Hover over an element using the Hover activity. Click on buttons, links, and other clickable elements such as icons or images. Type text in a text area such as a text box. Select or clear a check box.

Answer: A

Explanation:

In UiPath's App/Web Recorder, certain actions need to be selected or indicated before they can be recorded.

These include:

*Clicking on buttons, links, and other interactive elements.

*Typing text into input fields.

*Selecting or clearing checkboxes.

*Sending keyboard shortcuts.

*Selecting items from drop-down menus.

Based on these common actions that are typically used in UiPath recording, the answer that best fits is:

A: Click on buttons, links, and other clickable elements such as icons or images. Type text in a text area such as a text box. Select or clear a check box. Send keyboard shortcuts using your keyboard. Select an item from a drop-down.

These are the actions that you would manually select or perform during the recording process to automate interactions with a UI.

NEW QUESTION # 106

The provided exhibit displays the representation of the "Deadline" field using the yyyy-mm-dd format.

Queue Item Name	Deadline	Priority
EmployeeID1		Normal
EmployeeID2	2050-01-01	High
EmployeeID3	2050-01-02	High
EmployeeID4	2050-01-01	Normal
EmployeeID5	2050-01-02	Low
EmployeeID6		High
EmployeeID7	2050-01-01	Low
EmployeeID8	2050-01-01	Normal
EmployeeID9		Low

In what order should the Queue Items be processed by a single robot executing a Performer workflow?

Queue Item			Order to be Processed	
EmployeeID1	EmployeeID2	EmployeeID3	1st	
EmployeeID4	EmployeeID5	EmployeeID6	2nd	
EmployeeID7	EmployeeID8	EmployeeID9	3rd	
			4th	
			5th	
			6th	
			7th	
			8th	
			9th	

Answer:

Explanation:

Queue Item			Order to be Processed	
EmployeeID1	EmployeeID2	EmployeeID3	1st	EmployeeID2
EmployeeID4	EmployeeID5	EmployeeID6	2nd	EmployeeID6
EmployeeID7	EmployeeID8	EmployeeID9	3rd	EmployeeID7
			4th	EmployeeID1
			5th	EmployeeID4
			6th	EmployeeID8
			7th	EmployeeID3
			8th	EmployeeID5
			9th	EmployeeID9

Order to be Processed

1st	EmployeeID2
2nd	EmployeeID6
3rd	EmployeeID7
4th	EmployeeID1
5th	EmployeeID4
6th	EmployeeID8
7th	EmployeeID3
8th	EmployeeID5
9th	EmployeeID9

NEW QUESTION # 107

A developer has created a string array variable as shown below:

```
UserNames = {"Jane", "Jack", "Jill", "John"}
```

Which expression should the developer use in a Log Message activity to print the elements of the array separated by the string ","?

- A. `String.Concat(UserNames, ",")`
- B. `String.Join(", ", UserNames)`
- C. `String.Join(UserNames, ", ")`
- D. `String.Concat(", ", UserNames)`

Answer: B

Explanation:

To print the elements of a string array separated by a specific string, the `String.Join` method is used in C#.

This method takes two parameters: the first is the separator string and the second is the array to join into a single string.

Given the options and the requirement to separate array elements with a comma and a space (", "), the correct expression to use in a Log Message activity would be:

```
C: String.Join(", ", UserNames)
```

This will produce a single string with each element of the UserNames array separated by ", " (a comma followed by a space).

NEW QUESTION # 108

Which of the following credentials stores have built in support in Orchestrator?

- A. CyberArk CCP, Cisco, Google Credentials, CyberArk, Azure Key Vault.
- B. CyberArk CCP, Azure Key Vault, Google Credentials, Amazon Security Services.
- C. Cisco, Amazon Security Services, Google Credentials, Microsoft SCS, IBM Vault.
- D. Azure Key Vault, CyberArk CCP, HashiCorp Vault, Thycotic Secret Server, BeyondTrust, CyberArk.

Answer: D

Explanation:

UiPath Orchestrator provides integration capabilities with various credential stores to securely store and manage credentials such as usernames and passwords, API keys, and other secrets. The built-in support for credential stores in Orchestrator includes:

*Azure Key Vault: A cloud service provided by Microsoft that safeguards cryptographic keys and other secrets used by cloud applications and services.

*CyberArk Credential Provider (CCP): CyberArk's enterprise-grade solution designed to secure, manage, and monitor privileged accounts and credentials.

*HashiCorp Vault: A tool for secrets management, encrypting sensitive data, and access control across dynamic infrastructure.

*Thycotic Secret Server: An enterprise-level solution for privileged account management and protection of critical enterprise passwords and secrets.

*BeyondTrust: A privileged access management platform that secures and manages access to critical assets, passwords, and endpoints.

*CyberArk: In addition to the CCP, Orchestrator supports integration with other CyberArk solutions for secure credential management.

These integrations allow Orchestrator to retrieve credentials securely at runtime for use in automation workflows, enhancing the security posture by avoiding hard-coded or plaintext credentials in automation scripts.
