Three Best Veeam VMCE_v12 Exam Dumps Formats - Pass Exam With Ease

As mentioned earlier, DumpsReview solves all problems that you face while locating updated Veeam Certified Engineer v12 (VMCE_v12) exam questions. We know that as an applicant for the test, you have excessive pressure to pass the Veeam Certification Exam. DumpsReview is here to help you earn the highly sought-after Veeam Certified Engineer v12 (VMCE_v12) certification on the first attempt. Don't wait to get help from our Veeam VMCE_v12 real exam dumps to crack the test quickly. You can better comprehend DumpsReview's Veeam Certified Engineer v12 (VMCE_v12) exam questions if you know about the three formats described here.

Veeam Certified Engineer v12 Sample Questions (Q147-Q152):

NEW QUESTION # 147

What describes an RPO?

- A. To clarify how many restore points need to be recovered at the same time
- **B. To confirm the data loss tolerance of a Business Unit or Organization**
- C. To determine the maximum length of time a workload or application can be down
- D. To confirm at what point a backup should be migrated to Object Storage

Answer: B

Explanation:

Recovery Point Objective (RPO) refers to the maximum acceptable amount of data loss measured in time. It is essentially the age of the files that must be recovered from backup storage for normal operations to resume after a failure or disaster. In other words, it defines the data loss tolerance of a business unit or organization. If an RPO is set to one hour, the system must back up at least every hour to meet the RPO.

NEW QUESTION # 148

Which of the following scenarios properly applies the 3-2-1 rule to backup jobs?

- A. Use backup jobs to back up directly to tape; ship the tapes off site
- B. Use a backup job to back up to a Scale-out Backup Repository configured with capacity tier using AWS S3 and enable move mode
- C. Use a backup job to back up to a local repository; perform a backup copy job to a repository in another location
- **D. Use a backup job to back up to a local repository; perform a backup copy job to the same repository**

Answer: D

NEW QUESTION # 149

A Veeam backup administrator is working with a VMware environment. Their company has an application that uses a contact database. Customers can be added to a "Do not contact" list. This server needs to be restored from yesterday's backup. What restore process allows for custom scripting to be run automatically to ensure the "Do not contact" list is updated before the server is returned to production?

- A. Instant VM Recovery
- B. Instant Desk Recovery
- **C. Staged Restore**
- D. Secure Restore

Answer: C

Explanation:

NEW QUESTION # 150

There is a company-wide mandate to migrate operations off corporate datacenters and over to AWS, Azure, and GCE. The Veeam engineer has backups of VMware, Hyper-V, and Nutanix VMs stored in on-premises repositories. The performance of a test restore was not satisfactory.

Which solution should the engineer deploy?

- A. Caching servers on premises and in the cloud
- **B. Helper appliance in the cloud**
- C. Veeam Wan Accelerators on premises and in the cloud
- D. Upgraded bandwidth to the Internet

Answer: B

Explanation:

NEW QUESTION # 151

A healthcare company is running a critical clinical application on a Red Hat server that must run on bare-metal hardware. The server is backed up with Veeam Agent for Linux. The server has to be recovered completely due to a software error.

Which of the following is the correct recovery method to restore the entire server?

- A. Perform a full recovery using the Veeam Backup & Replication interface.
- **B. Boot from the Veeam Recovery Media and then restore the whole server.**
- C. Reinstall Red Hat and restore the volumes from the Linux Agent backups.
- D. Export the backup files as a virtual disk and mount to an existing Linux virtual machine.

Answer: B
