XK0-006 Reliable Exam Test & XK0-006 Testing Center

We provide online customer service to the customers for 24 hours per day and we provide professional personnel to assist the client in the long distance online. If you have any questions and doubts about the CompTIA Linux+ Certification Exam guide torrent we provide before or after the sale, you can contact us and we will send the customer service and the professional personnel to help you solve your issue about using XK0-006 Exam Materials. If the clients have any problems or doubts about our XK0-006 exam materials you can contact us by sending mails or contact us online and we will reply and solve the client's problems as quickly as we can.

CompTIA Linux+ Certification Exam Sample Questions (Q79-Q84):

NEW QUESTION # 79
An average of one out of three users in a company cannot reach the company website. A Linux administrator determines that one of the three website servers is down. The administrator inspects the DNS configuration for the website and notices the following entry:

```
www     IN  A   5.5.5.1
        IN  A   5.5.5.2
        IN  A   5.5.5.3
```

Which of the following accurately explains the issue?

- A. The DNS configuration is missing corresponding AAAA records and PTR records, and this is causing clients to fail the hostname translation.
- B. The administrator has incorrectly configured the DNS server to be an iterative resolver instead of an authoritative resolver.
- C. One of the DNS records has not been signed with a DNSSEC-supported key, and this is causing some web browsers to reject the DNS response.
- D. DNS returns all three records in a different order each time, and the browser typically uses the first address in the DNS response.

Answer: D

Explanation:
With multiple A records, DNS performs simple round-robin ordering and returns the records in a different sequence on each query. Most clients try the first address returned-so when the downed server's IP appears first (about one in three times), those users cannot connect.

NEW QUESTION # 80
Which of the following best describes the role of initrd?

- A. It contains basic kernel modules and drivers required to start the system.
- B. It contains trusted certificates and secret keys of the system.
- C. It is required to initialize a random device within a Linux system.
- D. It is required to connect to the system via SSH.

Answer: A

Explanation:
initrd (initial ramdisk) provides essential kernel modules and drivers (e.g., for storage and filesystems) needed during the early boot process before the root filesystem is mounted.

NEW QUESTION # 81
A DevOps engineer made some changes to files on a local repository. The engineer realizes that the changes broke the application and the changes need to be reverted back. Which of the following commands is the best way to accomplish this task?

- A. git rebase
- B. git reset
- C. git stash
- D. git pull

Answer: B

Explanation:
The git reset command reverts changes in the local repository to a previous commit, effectively discarding the problematic modifications and restoring the application to a working state.

NEW QUESTION # 82
An administrator has generated an RSA SSH key pair to log in to a remote server. After copying the public key and attempting to log in, the administrator sees the following message:
admin@192.168.10.50: Permission denied (publickey,password)
After seeing the message, the administrator attempts to connect using ssh -v admin@192.168.10.50 and notices the following debug output:
debug1: send_pubkey_test: no mutual signature algorithm
Which of the following actions should the administrator take first to remediate this issue?

- A. Issue systemctl restart sshd on the local server.
- B. Update permissions on the /home/admin/.ssh directory to 700 on the remote server.
- C. Create a new key pair by running ssh-keygen -t ecdsa.
- D. Set PermitRootLogin yes in the /etc/ssh/sshd_config file.

Answer: C

Explanation:
The "no mutual signature algorithm" error means the RSA/SHA-1 key type (ssh-rsa) isn't supported by both client and server. Generating a new key with a modern algorithm (e.g., ssh- keygen -t ecdsa) ensures a mutually supported signature method.

NEW QUESTION # 83
A Linux administrator receives reports that an application hosted in a system is not completing tasks in the allocated time. The administrator connects to the system and obtains the following details:

```
# uptime
12:47:43 up 22:17, 2 users, load average: 7.75, 5.72, 5.17

# nproc
4

# vmstat -w 1 3
[...]
r b   swpd   free      buff  cache   si   so    bi    bo   in   cs  us sy id wa st gu
8 0 671563760 3481036 71476    0    0    0    0 40 901 386 100  0  0  0  0  0
8 0 671563760 3481036 71476    0    0    0    0 40 761 389 100  0  0  0  0  0
8 0 671563760 3481036 71476    0    0    0    0 40 761 389 100  0  0  0  0  0

# free -h
              total        used        free      shared  buff/cache   available
Mem:          3.8Gi       334Mi       3.6Gi        20Mi        70Mi       3.5Gi
Swap:         7.8Gi        65Mi       7.8Gi
```

Which of the following actions can the administrator take to help speed up the jobs?

- A. Increase the amount of swap space available to the system.
- B. Increase the amount of free memory available to the system.
- C. Increase the amount of disks available to the system.
- D. Increase the amount of CPU resources available to the system.

Answer: D

Explanation:
The uptime output shows a load average of 7.75, 5.72, 5.17 on a system with only 4 processors (nproc = 4). This indicates CPU saturation since the load averages are significantly higher than the number of available CPUs. Memory and swap usage are minimal, and vmstat shows no I/O waits, so the bottleneck is CPU. Increasing CPU resources will help speed up the jobs.

NEW QUESTION # 84
.....

Useful XK0-006 exam prep is subservient to your development. To add up your interests and simplify some difficult points, our experts try their best to design our XK0-006 training material and help you understand the XK0-006 study guide better. And our experts generalize the knowledge of the exam into our products showing in three versions: the PDF, the Software and the APP online. You can choose your most desirable way to practice our XK0-006 Preparation engine on the daily basis.

XK0-006 Reliable Exam Test: https://www.exam-killer.com/XK0-006-valid-questions.html

The XK0-006 Exam dumps have been gratified in the PDF format which can certainly be retrieved on all the digital devices, including, CompTIA Practice XK0-006 Exam Fee All exam dumps and patterns are made to follow the style of actual exam dumps, For there are some problems with those still in the incubation period of strict control, thus to maintain the XK0-006 quiz guide
