With SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management C-TS414-2023 Learning Materials, you only need to spend half your money to get several times better service than others.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q34-Q39):

NEW QUESTION # 34

Which categories of defects can be created using standard SAP Fiori apps? Note: There are 3 correct answers to this question.

- A. Warehouse defect
- B. Generic defect
- C. Customer defect
- D. Supplier defect
- E. Production defect

Answer: C,D,E

Explanation:

Standard SAP Fiori apps (e.g., "Record Defects," App ID F2175) support defect categories tied to QM processes:

- * Supplier Defect (A): Linked to procurement (e.g., inspection type 01), recordable via apps for supplier- related issues.
- * Production Defect (B): Tied to production lots (e.g., type 03/04), a standard category in Fiori defect recording.
- * Customer Defect (D): Associated with customer complaints (e.g., notification type Q1), supported in apps.
- * Generic Defect (C): Not a specific standard category; defects are context-specific.
- * Warehouse Defect (E): Typically stock-related (type 08), not a distinct Fiori category.

Thus, "Supplier defect," "Production defect," and "Customer defect" are the correct answers. References: SAP Help Portal - "Defect Recording Fiori Apps"; SAP S/4HANA QM User Guide - "Defect Categories".

NEW QUESTION # 35

Your customer requires the lab to use quantitate characteristics during a production result recording. Which result confirmation control indicators are available for quantitative results

- A. Single value
- B. Class confirmation
- C. Tolerance keys
- D. Mean value
- E. Summarized

Answer: A,B,E

NEW QUESTION # 36

You want to block purchasing of a material from a supplier due to quality reasons. In which business object would you do this?

- A. Material
- B. Purchase order item
- C. Business partner
- D. Quality info record: Procurement

Answer: D

Explanation:

Blocking purchasing from a supplier for quality reasons is managed in:

- * Quality Info Record: Procurement (C): In the quality info record (transaction QI01), you can set the "Block" indicator or use a status profile (e.g., "Blocked") to prevent purchasing from a supplier for a specific material. This is the standard QM object for supplier-material quality control (SPRO > QM > Quality Inspection > Quality Info Record > Define Status).
- * Material (A): The material master can block overall procurement but not supplier-specific QM issues.
- * Business Partner (B): Blocking a supplier globally is possible (e.g., via MM06), but not material-specific for quality reasons in QM.
- * Purchase Order Item (D): POs can't enforce a quality block; they reflect existing restrictions.

Thus, "Quality info record: Procurement" is the correct answer. References: SAP Help Portal - "Blocking Suppliers in QM"; SAP S/4HANA QM User Guide - "Quality Info Record".

NEW QUESTION # 37

The valuation mode defines the rules for accepting/rejecting inspection characteristics during the inspection results recording. Which valuation mode can be used for a qualitative inspection characteristic? Note: There are 2 correct answers to this question.

- A. Variable inspection s-method
- B. Mean value within tolerance range
- C. Manual valuation
- D. Attributive inspection nonconforming units

Answer: C,D

Explanation:

Valuation modes (set in the sampling procedure, transaction QDV1) for qualitative characteristics include:

- * Attributive Inspection Nonconforming Units (A): Used for qualitative characteristics (e.g., pass/fail), counting nonconforming units against a sample to determine acceptance (e.g., ANSI/ASQ Z1.4).
- * Manual Valuation (C): Allows manual acceptance/rejection of qualitative results (e.g., "Good" or "Bad"), a flexible option for subjective assessments.
- * Variable Inspection s-Method (B): Applies to quantitative characteristics using statistical variance, not qualitative ones.
- * Mean Value Within Tolerance Range (D): Specific to quantitative data, not applicable to qualitative characteristics.

Thus, "Attributive inspection nonconforming units" and "Manual valuation" are the correct answers.

References: SAP Help Portal - "Valuation Modes for Qualitative Characteristics"; SAP S/4HANA QM User Guide - "Sampling Procedures".

NEW QUESTION # 38

Your customer automatically create inspection lot for general deliveries in sales and distribution process for its production If QM not started result recording what does the system do in response to a change in the material quality.....

- A. Change the quality of the current inspection lot
- B. Create a new inspection lot with the different quantity
- C. Block the current inspection lot from processing
- D. Cancel the current inspection lot and create a new one

Answer: D

NEW QUESTION # 39

.....
