Precise Interactive DA0-002 EBook bring you First-Grade Valid DA0-002 Exam Cram for CompTIA CompTIA Data+ Exam (2025)

If you are going to buy DA0-002 training materials online, the security of the website is important. We have technicians to examine the website every day, if you chose us, we provide you with a clean and safe online shopping environment. In addition, DA0-002 exam materials are compiled by professional experts, and therefore the quality can be guaranteed. We offer you free demo to have a try before buying, so that you can have a deeper understanding of what you are going to buy. DA0-002 Training Materials contain also have certain number of questions, and if will be enough for you to pass the exam. We have online and offline chat service stuff, if you have any questions, you can consult us.

Once you pass the exam and obtain the DA0-002 certificate, your life will take place great changes. On one hand, your job career will become more promising. All tasks will be finished excellently and efficiently because you have learned many useful skills from our DA0-002 training guide. On the other hand, you will get more opportunities to be employed by the big company and get a brighter future with the DA0-002 certification.

Exact Inside Interactive DA0-002 EBook Questions and Answers

We abandon all obsolete questions in this latest DA0-002 exam torrent and compile only what matters toward actual real exam. Without voluminous content to remember, our DA0-002 quiz torrent contains what you need to know and what the exam will test. So the content of our DA0-002 quiz torrent is imbued with useful exam questions easily appear in the real condition. We are still moderately developing our latest DA0-002 Exam Torrent all the time to help you cope with difficulties. All exam candidates make overt progress after using our DA0-002 quiz torrent. By devoting ourselves to providing high-quality practice materials to our customers all these years, we can guarantee all content are the essential part to practice and remember. Stop dithering and make up your mind at once, DA0-002 test prep will not let you down.

CompTIA Data+ Exam (2025) Sample Questions (Q69-Q74):

NEW QUESTION # 69
A company reports on seven years of data in a sales dashboard. The dashboard pulls from a sales database that has 30 years of data. The dashboard performance is slow. Which of the following is the best way to improve the dashboard's performance?

- A. Checking network connectivity
- B. Performing a code review
- C. Adding more RAM and rerunning
- D. Filtering to include only relevant data

Answer: D

Explanation:
This question falls under theData Governancedomain, focusing on optimizing data quality and performance in dashboards. The dashboard is slow because it pulls from a large database (30 years) but only needs seven years of data.
* Performing a code review (Option A): A code review might identify inefficiencies, but it's not the most direct solution for this scenario.
* Checking network connectivity (Option B): Network issues might cause delays, but the primary issue is the data volume, not connectivity.
* Filtering to include only relevant data (Option C): Filtering the data to include only the last seven years reduces the dataset size, directly improving performance by minimizing the data processed.
* Adding more RAM and rerunning (Option D): Adding RAM might help, but it's a hardware solution that doesn't address the root cause of excessive data.
The DA0-002 Data Governance domain includes "data quality control concepts," such as optimizing performance by filtering data to improve efficiency.

NEW QUESTION # 70
A data analyst team needs to segment customers based on customer spending behavior. Given one million rows of data like the information in the following sales order table:
Customer_ID
Region
Amount_spent
Product_category
Quantity_of_items
00123
East
20000
Baby
4
00124
West
30000
Home
6
00125
South
40000
Garden
7
00126
North
50000
Furniture
8
00127
East
60000
Baby
10
Which of the following techniques should the team use for this task?

- A. Standardization
- B. Concatenate
- C. Appending
- D. Binning

Answer: D

Explanation:

This question falls under the Data Analysis domain, focusing on techniques for segmenting data. The task is to segment customers based on spending behavior, which involves grouping numerical data (Amount_spent) into categories.
* Standardization (Option A): Standardization scales numerical data to a common range (e.g., z-scores), but it doesn't segment customers into groups.
* Concatenate (Option B): Concatenation combines text fields, not numerical data for segmentation.
* Binning (Option C): Binning involves grouping numerical data into discrete intervals (e.g., low, medium, high spending), which is ideal for segmenting customers based on spending behavior.
* Appending (Option D): Appending combines datasets vertically, not relevant for segmentation.
The DA0-002 Data Analysis domain includes "applying the appropriate descriptive statistical methods," and binning is a common method for segmenting numerical data like spending amounts.

NEW QUESTION # 71

A data analyst is generating a custom report for a Chief Executive Officer's executive meeting. Later, the analyst learns that other custom reports will be required for future executive meetings. Which of the following delivery methods should the analyst use?

- A. Self-service
- B. Ad hoc
- C. Recurring
- D. Real-time

Answer: C

Explanation:
This question falls under the Visualization and Reporting domain of DA0-002, which involves selecting appropriate delivery methods for reports. The scenario describes a need for custom reports for future executive meetings, implying a scheduled, repeated delivery.
* Ad hoc (Option A): Ad hoc reports are generated on-demand for one-time use, not suitable for ongoing needs.
* Real-time (Option B): Real-time delivery provides live data updates, which isn't necessary for scheduled executive meetings.
* Recurring (Option C): Recurring delivery involves scheduling reports to be generated and delivered at regular intervals (e.g., weekly or monthly), which fits the need for future executive meetings.
* Self-service (Option D): Self-service allows users to generate reports themselves, but the scenario implies the analyst will create the reports.
The DA0-002 Visualization and Reporting domain includes understanding "the appropriate visualization in the form of a report" with delivery methods , and recurring delivery aligns with scheduled reporting needs.

NEW QUESTION # 72

A data analyst is analyzing the following dataset:
Transaction Date
Quantity
Item
Item Price
12/12/12
11
USB Cords
9.99
11/11/11
3
Charging Block
8.89
10/10/10
5
Headphones
50.15
Which of the following methods should the analyst use to determine the total cost for each transaction?

- A. Compressing
- B. Deriving

- C. Parsing
- D. Scaling

Answer: B

Explanation:
This question falls under theData Analysisdomain, focusing on calculating new values from existing data.
The task is to determine the total cost per transaction, which involves multiplying Quantity by Item Price.
* Parsing (Option A): Parsing involves breaking down data (e.g., splitting a string), not calculating totals.
* Scaling (Option B): Scaling adjusts numerical values to a common range (e.g., normalization), not relevant for calculating totals.
* Compressing (Option C): Compressing reduces data size, not applicable to calculating costs.
* Deriving (Option D): Deriving involves creating new data fields by performing calculations on existing ones (e.g., Total Cost = Quantity × Item Price), which fits the task.
The DA0-002 Data Analysis domain includes "applying the appropriate descriptive statistical methods," such as deriving new fields through calculations to analyze data.

NEW QUESTION # 73
Which of the following best describes the method used to combine files, software, and libraries for use on various operating systems and environments?

- A. Virtual machine
- B. Package manager
- C. Code repository
- D. Containerization

Answer: D

Explanation:
This question pertains to theData Concepts and Environmentsdomain, focusing on methods for managing software and data environments. The task is to identify a method that combines files, software, and libraries for use across different systems.
* Package manager (Option A): Package managers (e.g., npm) manage software dependencies but don't combine files and libraries for cross-system use.
* Code repository (Option B): Code repositories (e.g., GitHub) store code but don't package it for deployment across environments.
* Virtual machine (Option C): Virtual machines emulate entire operating systems, which is heavier than needed for combining files and libraries.
* Containerization (Option D): Containerization (e.g., Docker) packages files, software, and libraries into a container that can run consistently across different operating systems and environments, making it the best choice.
The DA0-002 Data Concepts and Environments domain includes understanding "data environments," and containerization is a standard method for ensuring consistency across systems.
