This is very important for your career. And this TrainingDumps offers 365 days updates. The price is affordable. You can download it conveniently

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q23-Q28):

NEW QUESTION # 23

Custom partner bundles can be leveraged to share and apply baselines in which deployment scenario?

- A. Bluefield
- **B. Greenfield**
- C. Grayfield
- D. Brownfield

Answer: B

Explanation:

Custom partner bundles are predefined baseline configurations provided by SAP or implementation partners and are primarily used in Greenfield deployments, where a new SAP Ariba solution is being implemented from scratch. These bundles help accelerate deployment by applying standard best-practice settings and templates as a starting point in the Test environment.

In Bluefield or Brownfield deployments, which involve migration or upgrade of existing systems, incremental or selective configuration migration is more typical, and partner bundles are less relevant. Grayfield is not a recognized SAP Ariba deployment scenario.

Using partner bundles in Greenfield supports standardized setups and reduces manual configuration errors early in the project lifecycle, enabling faster time to value.

NEW QUESTION # 24

While working on a customer project, the customer asks if specific details can be captured and made available in reporting for a sourcing project or contract that doesn't fit the standard fields. What is the recommended way to handle this scenario?

- **A. Configure as many custom fields as possible for data capture purposes.**
- B. Create a Microsoft Form from the Actions menu for managing all the requirements.
- C. Create a dynamic form (dform) where common data can be synced with the project header through customization.
- D. Suggest the customer put a Word document on the template and capture all information in that document.

Answer: A

Explanation:

The recommended approach is to configure custom fields for capturing non-standard data in sourcing projects or contracts. Custom fields allow structured data capture directly within SAP Ariba, which can then be fully included in reporting and analytics.

Documents like Word files (A) are unstructured and not reportable. Dynamic forms synced with project headers (B) are not supported as standard functionality. External tools like Microsoft Forms (C) do not integrate with SAP Ariba's reporting capabilities. Custom fields can include picklists, validation rules, translations, and help tips, enabling flexible, maintainable data collection aligned with reporting and compliance needs.

NEW QUESTION # 25

Which of the following data elements must be manually loaded into the Production environment after full configuration migration is completed using the Intelligent Configuration Manager (ICM)? Note: There are 2 correct answers to this question.

- **A. Enumerations**
- **B. Relation and Relation Entries**
- C. User to Group Mapping
- D. Units of Measure

Answer: A,B

NEW QUESTION # 26

You have defined a custom field to have a default value based on another field. You have verified that the defaulting happens correctly the first time. However, when the dependent field changes value, your custom field does not change. What scenarios could cause this? (Select 3 correct answers)

- A. The parameter Application.Base.RecomputeValueOnFieldChange is not enabled
- B. Your dependent field does not have the property Refresh screen on value change enabled
- C. The custom field has the property Lock Initial value enabled, which prohibits a field to be changed once it's set
- D. Your custom field has the property Respect User Value enabled, and the user has manually entered another value into the field
- E. The defaulting Expression sets a value that violates the custom field Validity Condition

Answer: A,B,D

Explanation:

* B: If the dependent field isn't configured to refresh the UI when its value changes (no "Refresh screen on value change" enabled), the defaulting logic won't retrigger.

* C: The global parameter Application.Base.RecomputeValueOnFieldChange must be enabled so that dependent default expressions recalculate on field changes; otherwise, they won't update automatically.

* E: The "Respect User Value" property, when enabled, means that if a user manually overrides the default, the system will not recalculate or overwrite the field even if dependencies change. Lock Initial Value (A) prevents edits after first default but doesn't affect recomputation, and violating validity (D) would trigger an error, not silently block updates.

NEW QUESTION # 27

How can you set the order of your custom Contract Workspace fields? Note: There are 2 correct answers to this question.

- A. Select Field Configuration and under the advanced tab select property Sequence. Fields are sorted by this field in the UL. Once all changes are performed, publish all changes via Customizing Publish.
- B. Select Field Configuration, find the class, and select the Layout tab. Here you can drag and drop the order of the fields. Once all changes are performed, publish all changes via Customizing Publish.
- C. The fields are presented in alphabetical order of the field label. By carefully choosing the
- D. Navigate to the UI where the class is presented, select Customize in the banner, select Edit, and drag and drop the fields in the order they should be presented. Once all changes are performed, publish all changes via Customizing → Publish

Answer: B,D

NEW QUESTION # 28

.....

There have many shortcomings of the traditional learning methods. If you choose our C_ACDET_2506 test training, the intelligent system will automatically monitor your study all the time. Once you study our C_ACDET_2506 certification materials, the system begins to record your exercises. Also, the windows software will automatically generate a learning report when you finish your practices of the C_ACDET_2506 Real Exam dumps, which helps you to adjust your learning plan. It is crucial that you have formed a correct review method. The role of our C_ACDET_2506 test training is optimizing and monitoring your study. Sometimes you have no idea about your problems. So you need our C_ACDET_2506 real exam dumps to promote your practices.
