Salesforce Certified OmniStudio Consultant Sample Questions (Q126-Q131):

NEW QUESTION # 126

A business is creating an agent console with FlexCards to provide a 360° view of their customers. The business wants the following information displayed:

- * Account information including account name, phone, and website
- * Active opportunities related to the account
- * Active contracts related to the account
- * The ability to view and renew contracts

An Integration Procedure will be used to retrieve Account, Opportunity, and Contract data.

How should the consultant design the FlexCards to meet these requirements?

- A. Parent FlexCard with multiple Child and different Card States
- B. Parent FlexCard with single Child and Card Actions
- **C. Parent FlexCard with multiple Child and Card Actions**
- D. Parent FlexCard with single Child and multiple Card States

Answer: C

Explanation:

Explanation

The consultant should design the FlexCards using a Parent FlexCard with multiple Child and Card Actions to meet these requirements. A Parent FlexCard is a FlexCard that can display data and actions in a card format, and also contain one or more Child FlexCards. The consultant can use a Parent FlexCard to display the account information, including account name, phone, and website. A Child FlexCard is a FlexCard that can display data and actions in a card format within a Parent FlexCard. The consultant can use multiple Child FlexCards to display the active opportunities and contracts related to the account. A Card Action is a button or a link that can invoke an OmniScript or an Integration Procedure from a FlexCard. The consultant can use multiple Card Actions

to enable the user to view and renew contracts

NEW QUESTION # 127

A customer needs to create an OmniScript to capture payment Information. In the first step of the process, it user selects a payment type such as credit card, debit card, or direct bank account payment. Each payment t should display with a different icon. The process should check to see if the customer has any saved payment information of that type, and if there is, no further action is required. If there is no saved payment informatic then the user should be allowed to enter the information, and the process should save It.

Which three OmniScript elements should be used to meet these requirements?

Choose 3 answers

- A. DataRaptor Transform Action
- B. Radio
- C. DataRaptor Post Action
- D. Select
- E. DataRaptor Extract Action

Answer: B,C,E

NEW QUESTION # 128

A business wants to add typeahead functionality to an existing OmniScript. The business wants the user to begin entering the name of a contact in Salesforce. and allow the user to select the contact once it has found a match. Once the contact has been selected, the OmniScript should retrieve the contact's email address for use in a later step of the process.

What data source is needed when using the TypeAhead element?

- A. DataRaptor Post Action
- B. Integration Procedure Action
- C. HTTP Action
- D. DataRaptor Extract Action

Answer: D

Explanation:

Explanation

The data source that is needed when using the TypeAhead element is DataRaptor Extract Action. A TypeAhead element is an element that can display a list of suggestions for the user to select from, as they type in a text field. A DataRaptor Extract Action is an action that can retrieve data from a Salesforce object or invoke a Salesforce API, using SOQL queries or Apex methods. The consultant can use a DataRaptor Extract Action as a data source for the TypeAhead element, to get the contact names from Salesforce and display them as suggestions

NEW QUESTION # 129

What is the purpose of the Messaging element in OmniScript?

- A. Display a custom styled message
- B. Trigger an event to external data sources based on logical conditions
- C. Send email/text to users based on logical conditions
- D. Display a warning to users based on logical conditions

Answer: D

NEW QUESTION # 130

A company begins a project to unify its customer data across the enterprise. After completing the discovery t analysis phases of the project, the project team recommends FlexCards as the primary solution. The stakeho of the project are excited to move forward with this recommendation. However, IT is concerned that creating FlexCards will require custom coding and advanced technical skills they do not have on their team.

Which two features should the consultant highlight to address IT's concerns?

Choose 2 answers

- A. Lightning web components used in FlexCards
- B. The FlexCard Wizard
- C. The FlexCard Designer
- D. Newport Design System used in FlexCards

Answer: C,D
