You can feel exam pace and hold time to test with our ASIS ASIS-PSP Dumps Torrent. You should take advantage of the time and opportunities you have to do the things you want. Our ASIS-PSP dumps torrent files provide you to keep good mood for the test.

ASIS-PSP (Physical Security Professional) certification exam is a globally recognized credential for professionals who specialize in physical security. Physical Security Professional Exam certification is awarded by ASIS International, the largest organization for security management professionals worldwide. The ASIS-PSP Certification is designed to validate and recognize the expertise of individuals who have the skills and knowledge required to implement and manage physical security programs.

ASIS-PSP exam is recognized as one of the most comprehensive and rigorous certification programs for physical security professionals. It is designed to test an individual's knowledge and expertise in areas such as security risk assessment, security management, and business operations. Physical Security Professional Exam certification is highly regarded in the industry and is seen as an essential qualification for those looking to advance their careers in the field of physical security.

ASIS Physical Security Professional Exam Sample Questions (Q302-Q307):

NEW QUESTION # 302

What focus on legal principles and theories along with cases in which such principles predominate?

- A. Encyclopedias
- B. None of the above
- C. Legal document
- D. Formal memorandum

Answer: A

NEW QUESTION # 303

A system in which a badge or pass coded for authorization to enter specific areas is issued to an employee, who keeps it until the authorization id changed or until he or she leaves the company is called:

- A. Contractive pass system
- **B. Single pass system**
- C. Pass-exchange system
- D. None of the above

Answer: B

Explanation:

A Single Pass System issues a unique, coded pass or badge to an employee, which is retained for continued use during employment. The pass allows access to predefined areas and is typically updated if access rights change or when employment ends.

NEW QUESTION # 304

Security services in which the security force is hired and controlled directly by the protected organization are called:

- A. Pilferage
- B. Security enforcement
- **C. Proprietary**
- D. Contract security services

Answer: C

Explanation:

Proprietary security services are those in which the security personnel are hired, trained, and managed directly by the organization they protect. They are part of the company's staff and are not outsourced from external firms. Proprietary security typically ensures tighter integration with company culture and policies and offers better control over personnel and procedures.

Contract security services (Answer D) involve third-party firms providing personnel who are not employees of the protected organization.

Security enforcement (Answer B) is a general term, not a specific classification.

Pilferage (Answer C) refers to theft and is unrelated to service type.

Implementation of Physical Security Measures

NEW QUESTION # 305

A voluntary and intentional violation by a legally competent parson of a legal duty that commands or prohibits an act for the protection of society is known as:

- A. Corruption
- B. Fault
- **C. Crime**
- D. Law-breaking

Answer: C

Explanation:

A crime is defined as a voluntary and intentional violation of a law by someone who is legally competent. It involves breaking a legal duty meant to protect society. This can include actions that are prohibited or omissions where action was legally required.

Corruption (A) is a specific type of crime involving abuse of power.

Law-breaking (B) is a general, non-legal term.

Fault (C) is too broad and often used in civil contexts.

NEW QUESTION # 306

Lux is defined as a/an:

- A. Luminaire
- B. Electric arc along the length of a tube
- C. Measurement of illumination
- **D. Measure of light on a surface**

Answer: D

Explanation:

Comprehensive Detailed Explanation:

Lux is the SI unit of illuminance and is used to measure the amount of light that falls on a surface. It quantifies how much luminous flux is spread over a given area. One lux equals one lumen per square meter. It is critical in physical security when designing lighting for surveillance, perimeter control, or safety.

A is too general.

C (Luminaire) refers to a complete lighting unit.

D refers to fluorescent tube operation, not illumination measurement.
