# Prepare Exam With Latest Juniper JN0-481 Exam Questions

Our JN0-481 training quiz will be your best teacher who helps you to find the key and difficulty of the exam, so that you no longer feel confused when review. Our JN0-481 study materials will be your best learning partner and will accompany you through every day of the review. Our JN0-481 Exam Quiz will help you to deal with all the difficulties you have encountered in the learning process and make you walk more easily and happily on the road of studying.

Our JN0-481 practice materials comprise of a number of academic questions for your practice, which are interlinked and helpful for your exam. So their perfection is unquestionable. As a result, JN0-481 real exam win worldwide praise and acceptance. Our JN0-481 practice materials are determinant factors giving you assurance of smooth exam. The sooner you make up your mind, the more efficient you will win.

Ace Your Juniper JN0-481 Exam with Online Practice Test Engine Designed by Experts

The JN0-481 study materials are in the process of human memory, is found that the validity of the memory used by the memory method and using memory mode decision, therefore, the JN0-481 training materials in the process of examination knowledge teaching and summarizing, use for outstanding education methods with emphasis, allow the user to create a chain of memory, the knowledge is more stronger in my mind for a long time by our JN0-481 study engine. Firmly believe in an idea, the JN0-481 exam questions are as long as the user to follow our steps to obtain the certificate.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q47-Q52):

NEW QUESTION # 47
What is the purpose of using a routing zone inside Juniper Apstra software?

- A. A routing zone is used to enable the communication between two VNIs within a VRF.
- B. A routing zone is defined to secure the routing protocols.
- C. A routing zone is used to enable L4-L7 inspection inside the fabric.

- D. A routing zone defined at the Apstra manager level requires firewalls to be deployed.

Answer: A

Explanation:
A routing zone is an L3 domain, the unit of tenancy in multi-tenant networks. You create routing zones for tenants to isolate their IP traffic from one another, thus enabling tenants to re-use IP subnets. In addition to being in its own VRF, each routing zone can be assigned its own DHCP relay server and external system connections. You can create one or more virtual networks within a routing zone, which means a tenant can stretch its L2 applications across multiple racks within its routing zone. For virtual networks with Layer 3 SVI, the SVI is associated with a Virtual Routing and Forwarding (VRF) instance for each routing zone isolating the virtual network SVI from other virtual network SVIs in other routing zones.

NEW QUESTION # 48
In the Juniper Apstra Ul. which two resource types would be created in the Resources menu?
(Choose two.)

- A. ASN pools
- B. DHCP pools
- C. IP pools
- D. bridge domain identifier (BDI)

Answer: A,C

Explanation:
The Resources menu in the Juniper Apstra UI allows you to create and manage various types of resources that are assigned to different elements of the network.
Resources include the following types:
- IPv4 (including Host IPv4)
- IPv6 (including Host IPv6)
- ASN (autonomous system number)
- VNI (virtual network identifier)
- VLAN (virtual local area network)
Integer (used for pool type VLAN in local pools in Freeform blueprints) Therefore, the correct answer is C and D. ASN pools and IP pools are two types of resources that can be created in the Resources menu. Bridge domain identifier (BDI) and DHCP pools are not applicable in this scenario, because they are not part of the resources types supported by Juniper Apstra.

NEW QUESTION # 49
You connect two single-homed servers using Juniper Apstra as shown in the exhibit. You are using the ERB design blueprint with two virtual networks in a common routing zone. In this scenario, which two types of VXLAN tunnels will be automatically created by the EVPN control plane? (Choose two.)

- A. EVPN signaled route Type-8 VXLAN tunnels
- B. EVPN signaled route Type-6 VXLAN tunnels
- C. EVPN signaled route Type-3 VXLAN tunnels

- D. EVPN signaled route Type-2 VXLAN tunnels

Answer: C,D

Explanation:
EVPN route Type-3 is used to advertise the IP address of the VTEP and the VNIs that it supports.
This allows the VTEPs to discover each other and form VXLAN tunnels for the VNIs that they have in common. EVPN route Type-2 is used to advertise the MAC and IP addresses of the hosts connected to the VTEPs. This allows the VTEPs to learn the MAC-to-IP bindings and the MAC-to- VTEP mappings for the hosts in the same VNI. Therefore, these two types of VXLAN tunnels will be automatically created by the EVPN control plane when using Juniper Apstra with the ERB design blueprint and two virtual networks in a common routing zone.

NEW QUESTION # 50

What is the purpose of a Juniper Apstra rack?

- A. It stores information on how pods connect to super spines.
- B. It stores IP address and ASN pool information.
- C. It stores device port data rates and vendor information.
- D. It stores information on how leaf nodes connect to generic devices

Answer: D

Explanation:
A Juniper Apstra rack is a physical entity that contains one or more network devices, such as leaf nodes, access switches, or generic systems. A rack is used to organize and manage the network devices in the Apstra software application. A rack has the following characteristics:
It stores information on how leaf nodes connect to generic devices. This is because a rack can include generic systems, which are devices that are not managed by Juniper Apstra, but are connected to the network. A generic system can be a server, a firewall, a load balancer, or any other device that has a network interface. A rack stores the information on how the leaf nodes, which are the devices that provide access to the end hosts, connect to the generic devices, such as the port number, the link speed, the LAG mode, and the roles.
It has a rack type, which defines the type and number of leaf devices, access switches, and/or generic systems that are used in the rack. A rack type is a resource that is created in the data center design phase, and it does not specify the vendor or the model of the devices. A rack type can be predefined or custom-made, and it can be used to create multiple racks with the same structure and configuration.
It has a rack build, which assigns the specific vendor and model of the devices to the rack. A rack build is created in the staged phase, and it uses the rack type as a template. A rack build can also assign the resources, such as the IP addresses, the ASNs, and the VNIs, to the devices in the rack. It has a rack deployment, which applies the network configuration and services to the devices in the rack. A rack deployment is performed in the active phase, and it uses the rack build as a reference. A rack deployment can also monitor the network performance and compliance of the devices in the rack.

NEW QUESTION # 51

Which fabric type should be chosen in a template to create a five-stage Clos?

- A. pod-based
- B. collapsed
- C. circuit switched
- D. rack-based

Answer: A

Explanation:
A five-stage Clos architecture allows for large-scale topologies with an additional aggregation layer that interconnects multiple pods into a single fabric. A pod is a group of racks that share the same spine devices. A rack is a group of leaf devices that connect to the same servers. To create a five-stage Clos network using Juniper Apstra, you need to choose the pod-based fabric type in the template creation wizard. This will allow you to specify the number of pods, planes, spines, and leaves for your network design.

NEW QUESTION # 52

......

As long as you get to know our JN0-481 exam questions, you will figure out that we have set an easier operation system for our candidates. Once you have a try, you can feel that the natural and seamless user interfaces of our JN0-481 study materials have grown to be more fluent and we have revised and updated JN0-481 Study Materials according to the latest development situation. In the guidance of teaching syllabus as well as theory and practice, our JN0-481 training guide has achieved high-quality exam materials according to the tendency in the industry.

New JN0-481 Test Online: https://www.braindumpsqa.com/JN0-481_braindumps.html

If you are worry about the coming JN0-481 study materials, our study materials will help you solve your problem, We can assure you that you can pass the exam as well as getting the related certification in a breeze with the guidance of our JN0-481 test torrent, Juniper JN0-481 Exam Collection Pdf We make your money count by seeing you through to success, And we can help you get success and satisfy your eager for JN0-481 certificate.

Advice on Being the Only Woman or Minority, The OpenBoot Architecture, If you are worry about the coming JN0-481 Study Materials, our study materials will help you solve your problem.

We can assure you that you can pass the exam as well as getting the related certification in a breeze with the guidance of our JN0-481 test torrent, We make your money count by seeing you through to success.

JN0-481 Study Materials & JN0-481 Exam collection & JN0-481 Actual Lab Questions

And we can help you get success and satisfy your eager for JN0-481 certificate, Since we went to school, varieties of tests chase after us and we are headache and agitated.
