

# Prepare for sure with 2V0-17.25 free update dumps & 2V0-17.25 dump torrent

## Updated VMware 2V0-21.20PSE Exam Dumps - Prepare With Advanced Material

Enhance your skills by using the top 2V0-21.20PSE exam dumps and reach one of the most evaluated score inside the Professional VMware vSphere 7.x certification exam through the guidance from the professionals. The VCP-DCV 2020 2V0-21.20PSE dumps pdf usually help you too and you will conveniently finish all the Professional VMware vSphere 7.x exam demands as well. The **VMware 2V0-21.20PSE pdf questions** are checked by the specialists so it is possible to easily and comfortably prepare by way of this. The authorities will always enable you to through the preparation on the 2V0 21 20 PSE new questions so you'll be able to get the top aid since they may be incredibly kind to their authorities. It is possible to smoothly boost your expertise and get a deep understanding of your preparation material. Acquire the top leads to the VMware certification exam and go much more around the career path.

**Updated Exam Dumps**  
Pass Your Certification Exam with Ease

Secure Payment Methods: PayPal, VISA, MasterCard, American Express

You hardly have to worry about whether or not you can pass the exam with our 2V0-17.25 exam braindumps. Many users of 2V0-17.25 exam prep can use your own achievements to prove to you that under the guidance of our 2V0-17.25 Study Materials, you must pass the exam. Don't hesitate anymore. What you should treasure now is time! Just come and buy our 2V0-17.25 learning guide, you will never feel regret!

## VMware 2V0-17.25 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.</li></ul> |
| Topic 2 | <ul style="list-style-type: none"><li>Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.</li></ul>      |

|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 3 | <ul style="list-style-type: none"> <li>VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.</li> </ul>                                                                                                                                                                                                                                                                                                  |
| Topic 4 | <ul style="list-style-type: none"> <li>Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.</li> </ul> |

## Valid 2V0-17.25 Test Review | 2V0-17.25 Study Plan

Actual4Labs has designed VMware Cloud Foundation 9.0 Administrator which has actual exam Dumps questions, especially for the students who are willing to pass the VMware 2V0-17.25 exam for the betterment of their future. The study material is available in three different formats. VMware Practice Exam are also available so the students can test their preparation with unlimited tries and pass VMware Cloud Foundation 9.0 Administrator (2V0-17.25) certification exam on the first try.

## VMware Cloud Foundation 9.0 Administrator Sample Questions (Q14-Q19):

### NEW QUESTION # 14

As part of the preparation for deploying VMware Aria Suite Lifecycle, an administrator needs to create Application Virtual Networks (AVNs).

Which three steps are necessary to complete the configuration of AVNs? (Choose three.)

- A. Setup routing policies for AVNs.
- B. Assign AVNs to specific ESXi hosts.
- C. Enable AVNs in the vCenter Server.
- D. Configure the AVNs in the NSX Manager.
- E. Define the IP address ranges for the AVNs.

**Answer: B,D,E**

Explanation:

Configure the AVNs in the NSX Manager: AVNs (Application Virtual Networks) are configured within NSX Manager to define the network segments and ensure proper network segmentation for workloads.

Assign AVNs to specific ESXi hosts: After configuring the AVNs in NSX Manager, they need to be assigned to the appropriate ESXi hosts to ensure they are properly mapped to the compute resources.

Define the IP address ranges for the AVNs: Each AVN must have an associated IP address range to provide network addressing for the workloads deployed on them.

### NEW QUESTION # 15

Which distributed switch feature can detect configurations that might cause a network mismatch, such as VLAN tagging errors or MTU inconsistencies?

- A. Link Aggregation Control Protocol (LACP)
- B. Port Security
- C. Network I/O Control (NIOC)
- **D. Health Check**

**Answer: D**

Explanation:

The Distributed Switch Health Check can identify VLAN, MTU, and teaming inconsistencies. NIOC manages traffic bandwidth, port security is a concept in physical networking, and LACP forms link- aggregated groups but doesn't check for VLAN or MTU mismatches.

#### **NEW QUESTION # 16**

An administrator is deciding on a storage solution to create the first management workload domain for a new VMware Cloud Foundation (VCF) instance. Which three storage solutions can be used as principal storage? (Choose three.)

- **A. NFSv3**
- **B. vSAN OSA**
- C. Virtual Volumes (vVols)
- **D. VMFS on Fibre Channel (FC)**
- E. NVMe/TCP

**Answer: A,B,D**

Explanation:

The VCF 9.0 Architecture Guide outlines valid principal storage options for the management domain. It states: "The management domain must be deployed using vSAN, NFS, or Fibre Channel (FC). Supported protocols include NFSv3 and VMFS on FC." vSAN (including OSA) is the default recommended option, but NFSv3 and VMFS on FC are also supported for environments where external storage arrays are required.

NVMe/TCP and vVols are not supported for the initial management domain's principal storage. vVols may be used in workload domains after deployment, but they are not a supported foundation for the management domain. Therefore, the three correct storage solutions for the first management workload domain are: VMFS on FC, NFSv3, and vSAN OSA.

#### **NEW QUESTION # 17**

A VMware administrator wants to automate certain vCenter tasks. Which tools or features can facilitate automated operations?

- **A. REST-based vSphere API**
- **B. PowerCLI for scripting**
- **C. Scheduled Tasks in the vSphere Client**
- D. Snapshots at the VM BIOS level

**Answer: A,B,C**

Explanation:

vSphere APIs (A), PowerCLI (B), and Scheduled Tasks (D) all allow automation. VM BIOS-level snapshots (C) are not a standard vSphere feature.

#### **NEW QUESTION # 18**

An organization is implementing a downtime avoidance solution and wants to ensure continuous availability of applications across separate sites that are connected via a high bandwidth/low latency link. Which two VMware Cloud Foundation components support this capability with stretched clusters? (Choose two.)

- A. vVOL
- B. vSphere Replication
- **C. vSAN**
- D. NSX Firewall
- **E. vSphere**
