NEW QUESTION # 238
Which one of the following is true regarding Application Scope?

- A. Developers can choose the prefix for a scope's namespace
- B. All applications are automatically part of the Global scope
- C. Any developer can edit any application
- D. Applications downloaded from 3rd party ServiceNow application developers cannot have naming conflicts

Answer: D

Explanation:
https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/concept/c_Applicatio The correct statement regarding Application Scope is that applications downloaded from 3rd party ServiceNow application developers cannot have naming conflicts. Application Scope is a feature that identifies and isolates applications and their related artifacts from other applications. Each scoped application has a unique namespace identifier that consists of a prefix and a scope name. This prevents cross-application name collisions and ensures that only authorized scripts can access or modify data in a scoped application.
