PRINCE2 Agile Foundation Sample Questions (Q61-Q66):

NEW QUESTION # 61

What describes essential aspects of project management that must be applied consistently and throughout the project lifecycle?

- A. The project context
- B. The PRINCE2 processes
- C. The people element
- **D. The PRINCE2 practices**

Answer: D

Explanation:

The PRINCE2 practices represent the essential aspects of project management that must be applied consistently from start to finish in every project. These practices cover key areas such as managing risks, issues, quality, plans, progress, and change. They provide structured guidance and tools to ensure the project remains viable, controlled, and aligned with business objectives.

While processes define the stages and flow of activities, and the people element refers to roles and skills, practices are the ongoing activities and controls embedded throughout the project lifecycle. The project context shapes how practices and processes are tailored but does not itself define the consistent elements.

This consistent application of practices supports governance, transparency, and control, critical for successful project outcomes.

NEW QUESTION # 62

Which statement about the 'protect the level of quality' target is CORRECT?

- A. It allows change at the detailed level to be handled dynamically
- B. It avoids the use of extra people to improve progress during a timebox
- **C. It is achieved by ensuring that all features are delivered**
- D. It is unlikely to be achieved if incomplete user documentation is provided

Answer: C

NEW QUESTION # 63

When tailoring the plans theme in an agile environment, what is recommended about using a Gantt chart?

- A. It should be used when planning at the delivery level
- B. It should be used when controlling the quality of the products delivered
- C. It should be used when monitoring the amount of products delivered
- **D. It should be used when planning at the project level**

Answer: D

NEW QUESTION # 64

What is an epic?

- A. A detailed feature
- B. A low-level requirement
- C. A fine-grained user story
- **D. A high-level requirement**

Answer: D

NEW QUESTION # 65

In which step of the risk management technique do teams consider probability and impact of a risk?

- **A. Assess**
- B. Implement
- C. Plan
- D. Identify

Answer: A

Explanation:

The assess step involves evaluating the probability and impact of identified risks to determine their severity and prioritize them for management. This step is crucial for effective risk control and helps allocate resources appropriately.

Planning relates to defining how to manage risks, identification involves discovering risks, and implementation concerns applying risk responses.
