## Salesforce Process Automation Accredited Professional Sample Questions (Q143-Q148):

#### NEW QUESTION # 143

Universal Containers is evaluating Flow Orchestration to automate a complex business process that involves multiple users. The users are organized in groups, and the work is assigned in a way that any user in a given group can complete it. Which can help the Administrator support the requirement?

- A. Work Groups
- B. Work Items
- C. Work Stages
- D. Work Queues

**Answer: A**

#### NEW QUESTION # 144

Universal Containers (UC) is automating its employee offboarding process. Payroll information is stored in an external system. What could UC use to make an automatic update to the payroll system when an employee is offboarded?

- A. API Connect
- B. JSON Auto Connector
- C. Salesforce Handler
- D. Outbound Message Action

**Answer: D**

#### NEW QUESTION # 145

The Administrator is creating a login flow for a new application which will be deployed on Salesforce. The ..... create an automation logic to help validate the credentials and access. What is the right design for this ....?

- A. Leverage Screen Flow for displaying the input fields and for handling the post login and process.
- B. Leverage Process Builder with Workflow rules for displaying the input fields and for handling the post login and process.
- C. Leverage Screen Flow for displaying the input fields and autolaunched flow for handling the post login and process
- D. Leverage Screen Flow for displaying the input fields and custom apex triggers for the post login and process.

**Answer: A**

#### NEW QUESTION # 146

If an admin distributes a flow on an Account record page, how can the admin pass the account's ID into the flow?

- A. By checking "Available for output" checkbox.
- B. By selecting "Allow multiple values".
- C. By using "Get Record",
- D. By checking "Available for input" checkbox.

**Answer: D**

Explanation:

If an admin distributes a flow on an Account record page and needs to pass the account's ID into the flow, they can achieve this by checking the "Available for input" checkbox (A) for the variable that will hold the Account ID. This setting allows the flow to accept input values from the context in which it's running, such as a record page, enabling the flow to use the Account ID in its operations. Reference: Salesforce Help Documentation on Flow Variables and Record-Triggered Flows.

#### NEW QUESTION # 147

An Administrator at Universal Containers is designing a flow to use while provisioning new laptops. When the end user tries to run the flow, they get an error. What could be causing the issue?

- A. The Administrator did not set API access for the running user.
- B. The Administrator did not set the object and field level security for the running user.

- Answer: B**
