## New ISO-IEC-27001-Foundation Exam Duration | Reliable ISO-IEC-27001-Foundation Test Syllabus

If you download our study materials successfully, you can print our study materials on pages by the PDF version of our ISO-IEC-27001-Foundation exam torrent. We believe these special functions of the PDF version will be very useful for you to prepare for your exam. We hope that you will like the PDF version of our ISO-IEC-27001-Foundation question torrent. If you try to get the ISO/IEC 27001 (2022) Foundation Exam certification that you will find there are so many chances wait for you. You can get a better job; you can get more salary. But if you are trouble with the difficult of ISO/IEC 27001 (2022) Foundation Exam exam, you can consider choose our ISO-IEC-27001-Foundation Exam Questions to improve your knowledge to pass ISO/IEC 27001 (2022) Foundation Exam exam, which is your testimony of competence.

### APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q19-Q24):

#### NEW QUESTION # 19

Identify the missing words in the following sentence.

The organization shall establish, implement, maintain and [ ? ] an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document.

- A. report on
- **B. continually improve**
- C. enforce standards for
- D. communicate the importance of

**Answer: B**

Explanation:

Clause 4.4 of ISO/IEC 27001:2022 states:

"The organization shall establish, implement, maintain and continually improve an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document." This requirement highlights that an ISMS is not static; it must evolve continuously to adapt to new risks, technologies, and business changes. Options A, C, and D are not mentioned in the clause. The continual improvement cycle is central to ISO standards, aligning with the Plan-Do-Check-Act (PDCA) model.

Thus, the missing words are "continually improve."

#### NEW QUESTION # 20

What activity is done first when preparing for an initial certification audit?

- A. Provide documents to the Certification Body auditor for the Stage 1 audit
- B. Provide evidence that nonconformities from an internal audit have been actioned
- C. Provide records to the Certification Body auditor for the Stage 2 audit
- **D. Agree the scope of the ISMS with the Certification Body auditor**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001:2022 standards and certification guidance:

Before a certification audit can begin, the scope of the ISMS must be clearly defined and agreed with the Certification Body.

ISO/IEC 27001 Clause 4.3 requires: "The scope shall be available as documented information." Certification Bodies require this scope statement to plan audit duration, resources, and coverage. Only after the scope is agreed does the Stage 1 audit begin, which reviews documented information and readiness. Stage

2 focuses on implementation and effectiveness. Evidence of corrective actions (C) is checked at Stage 2 if issues were identified earlier. Records provision (D) occurs during Stage 2, not first.

Thus, the first step in preparing for certification is A: Agreeing the scope of the ISMS with the Certification Body auditor.

### NEW QUESTION # 21

To whom does the scope of the Terms and conditions of employment control apply?

- A. Contractors only
- **B. All employees, contractors and third-party users**
- C. Personnel and the organization
- D. Employees only

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is D.

### NEW QUESTION # 22

Which of the following statements about the relationship between ISO/IEC 27001 and ISO/IEC 27002 is true?

\* ISO/IEC 27002 provides implementation advice on the controls selected during the ISO/IEC 27001 information security risk management process

\* ISO/IEC 27002 provides a process for information security risk management which implements the requirements of ISO/IEC 27001

- A. Only 2 is true
- B. Neither 1 or 2 is true
- **C. Only 1 is true**
- D. Both 1 and 2 are true

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001 & 27002:2022 standards:

ISO/IEC 27001 Annex A lists reference controls. ISO/IEC 27002 provides detailed guidance on the implementation of those controls, including purpose, guidance, and examples. Clause 6.1.3 of ISO/IEC

27001 makes the link explicit: controls from Annex A are referenced, but ISO/IEC 27002 explains how to implement them.

However, ISO/IEC 27002 does not provide a process for risk management—that is covered by ISO/IEC

27005. Risk management requirements are in ISO/IEC 27001 (Clauses 6.1.2 and 6.1.3).

Therefore, statement 1 is true, but statement 2 is false. Correct answer: A.

### NEW QUESTION # 23

Which statement describes the Classification of information control in Annex A of ISO/IEC 27001?

- A. Ensures the rules to control physical and logical access apply to assets
- **B. Ensures that information is classified based on confidentiality, integrity and availability**
- C. Ensures that security perimeters are used to protect assets
- D. Ensures that all information assets are labelled with their classification

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.12 (Classification of information) states:

"Information should be classified according to the information security needs of the organization based on confidentiality, integrity and availability." This aligns directly with option B. Option A (labelling) is a separate control (Annex A.5.13). Option C (security

perimeters) is under physical controls (Annex A.7.1). Option D (access control rules) relates to Annex A.5.15 and A.8.2. Thus, the verified correct statement for the Classification of information control is B.

### NEW QUESTION # 24
