

Professional-Cloud-Database-Engineer Exam Simulations | Reliable Professional-Cloud-Database-Engineer Study Guide

What's more, part of that Pass4Test Professional-Cloud-Database-Engineer dumps now are free: https://drive.google.com/open?id=1TGdq8Z7uYy5uPmMi88wvOL8US7_ZDcx

Pass4Test Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) practice test software is the answer if you want to score higher in the Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) exam and achieve your academic goals. Don't let the Professional-Cloud-Database-Engineer certification exam stress you out! Prepare with our Professional-Cloud-Database-Engineer exam dumps and boost your confidence in the Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) exam. We guarantee your road toward success by helping you prepare for the Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) certification exam. Use the best Pass4Test Google Professional-Cloud-Database-Engineer practice questions to pass your Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) exam with flying colors!

The Google Professional-Cloud-Database-Engineer Exam Tests the candidates' knowledge and skills in various areas related to database management, such as database design, data modeling, database administration, data security, and data analysis. It also covers topics related to Google Cloud Platform services, such as Cloud SQL, Cloud Spanner, Cloud Bigtable, and Cloud Datastore.

Google Professional-Cloud-Database-Engineer certification is recognized as a valuable credential by employers and IT professionals alike. It demonstrates that the holder has the skills and knowledge required to design, develop, and manage databases on the Google Cloud Platform. Google Cloud Certified - Professional Cloud Database Engineer certification can help individuals advance their careers and open up new opportunities for them in the field of cloud computing.

2025 Professional-Cloud-Database-Engineer Exam Simulations: Google Cloud Certified - Professional Cloud Database Engineer - High-quality

Google Reliable Professional-Cloud-Database-Engineer Study Guide

We are specializing in the career to bring all our clients pleasant and awarded study experience and successfully obtain their desired certification file. With our Professional-Cloud-Database-Engineer exam guide, your exam will become a piece of cake. We can proudly claim that you can be ready to pass your Professional-Cloud-Database-Engineer Exam after studying with our Professional-Cloud-Database-Engineer study materials for 20 to 30 hours. Since our professional experts simplify the content, you can easily understand and grasp the important and valid information.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q48-Q53):

NEW QUESTION # 48

You are managing two different applications: Order Management and Sales Reporting. Both applications interact with the same Cloud SQL for MySQL database. The Order Management application reads and writes to the database 24/7, but the Sales Reporting application is read-only. Both applications need the latest data. You need to ensure that the Performance of the Order Management application is not affected by the Sales Reporting application. What should you do?

- A. Create two separate databases in the instance, and perform dual writes from the Order Management application.
- B. Create a read replica for the Sales Reporting application.
- C. Queue up all the requested reports in PubSub, and execute the reports at night.
- **D. Use a Cloud SQL federated query for the Sales Reporting application.**

Answer: D

NEW QUESTION # 49

You are migrating a telehealth care company's on-premises data center to Google Cloud. The migration plan specifies: PostgreSQL databases must be migrated to a multi-region backup configuration with cross-region replicas to allow restore and failover in multiple scenarios.

MySQL databases handle personally identifiable information (PII) and require data residency compliance at the regional level. You want to set up the environment with minimal administrative effort. What should you do?

- **A. Set up different organizations for each database type, and apply policy constraints at the organization level.**
- B. Set up Cloud Logging and Cloud Monitoring with Cloud Functions to send an alert every time a new database instance is created, and manually validate the region.
- C. Set up Pub/Sub to ingest data from Cloud Logging, send an alert every time a new database instance is created, and manually validate the region.
- D. Set up different projects for PostgreSQL and MySQL databases, and apply organizational policy constraints at a project level.

Answer: A

NEW QUESTION # 50

During an internal audit, you realized that one of your Cloud SQL for MySQL instances does not have high availability (HA) enabled. You want to follow Google-recommended practices to enable HA on your existing instance. What should you do?

- A. Create a new Cloud SQL for MySQL instance, enable HA, and use Cloud Data Fusion to migrate your data.
- B. Create a new Cloud SQL for MySQL instance, enable HA, and use the export and import option to migrate your data.
- C. Shut down your existing Cloud SQL for MySQL instance, and enable HA.
- **D. Use the `gcloud instances patch` command to update your existing Cloud SQL for MySQL instance.**

Answer: D

Explanation:

Creating a new instance and migrating data can be time-consuming and disruptive to your application's availability. Shutting down the existing instance is not a recommended approach, as it will cause downtime for your application.

The recommended approach is to use the `gcloud instances patch` command to enable high availability on your existing Cloud SQL for MySQL instance. This command updates the instance's configuration to enable the failover replica, configure it, and enable automatic failover.

By following this approach, you can ensure minimal downtime, and your application can continue to operate during the process.

NEW QUESTION # 51

You are managing a small Cloud SQL instance for developers to do testing. The instance is not critical and has a recovery point objective (RPO) of several days. You want to minimize ongoing costs for this instance. What should you do?

- A. Turn on automated backup, and turn off transaction log retention.
- B. Turn on automated backup, and turn on transaction log retention.
- **C. Take one manual backup per day, and turn off transaction log retention.**
- D. Take no backups, and turn off transaction log retention.

Answer: C

NEW QUESTION # 52

Your customer has a global chat application that uses a multi-regional Cloud Spanner instance. The application has recently experienced degraded performance after a new version of the application was launched. Your customer asked you for assistance. During initial troubleshooting, you observed high read latency. What should you do?

- A. Use query parameters to speed up frequently executed queries.
- B. Use SQL statements to analyze SPANNER_SYS.QUERY_STATS* tables.
- **C. Change the Cloud Spanner configuration from multi-region to single region.**
- D. Use SQL statements to analyze SPANNER_SYS.READ_STATS* tables.

Answer: C

NEW QUESTION # 53

.....

When you are struggling with those troublesome reference books; when you feel helpless to be productive during the process of preparing different exams (such as Professional-Cloud-Database-Engineer exam); when you have difficulty in making full use of your sporadic time and avoiding procrastination. It is time for you to realize the importance of our Professional-Cloud-Database-Engineer Test Prep, which can help you solve these annoyance and obtain a Professional-Cloud-Database-Engineer certificate in a more efficient and productive way. As long as you study with our Professional-Cloud-Database-Engineer exam questions for 20 to 30 hours, you will be confident to take and pass the Professional-Cloud-Database-Engineer exam for sure.
