Professional-Data-Engineer Online Lab Simulation | Professional-Data-Engineer Reliable Exam Registration

Our Professional-Data-Engineer test torrent was designed by a lot of experts in different area. You will never worry about the quality and pass rate of our Professional-Data-Engineer study materials, it has been helped thousands of candidates pass their Professional-Data-Engineer exam successful and helped them find a good job. If you choose our Professional-Data-Engineer study torrent, we can promise that you will not miss any focus about your Professional-Data-Engineer exam. It is proved that our Professional-Data-Engineer learning prep has the high pass rate of 99% to 100%, you will pass the Professional-Data-Engineer

exam easily with it.

Google Certified Professional Data Engineer Exam Sample Questions (Q143-Q148):

NEW QUESTION # 143

Which action can a Cloud Dataproc Viewer perform?

- A. Create a cluster.
- **B. List the jobs.**
- C. Delete a cluster.
- D. Submit a job.

Answer: B

Explanation:

Explanation

A Cloud Dataproc Viewer is limited in its actions based on its role. A viewer can only list clusters, get cluster details, list jobs, get job details, list operations, and get operation details.

Reference:

https://cloud.google.com/dataproc/docs/concepts/iam#iam_roles_and_cloud_dataproc_operations_summary

NEW QUESTION # 144

In order to securely transfer web traffic data from your computer's web browser to the Cloud Dataproc cluster you should use a(n) _____.

- **A. SSH tunnel**
- B. Special browser
- C. VPN connection
- D. FTP connection

Answer: A

Explanation:

Explanation

To connect to the web interfaces, it is recommended to use an SSH tunnel to create a secure connection to the master node.

Reference:

https://cloud.google.com/dataproc/docs/concepts/cluster-web-interfaces#connecting_to_the_web_interfaces

NEW QUESTION # 145

Which action can a Cloud Dataproc Viewer perform?

- A. Create a cluster.
- **B. List the jobs.**
- C. Delete a cluster.
- D. Submit a job.

Answer: B

Explanation:

A Cloud Dataproc Viewer is limited in its actions based on its role. A viewer can only list clusters, get cluster details, list jobs, get job details, list operations, and get operation details.

https://cloud.google.com/dataproc/docs/concepts/iam#iam_roles_and_cloud_dataproc_operations_summary

NEW QUESTION # 146

You are operating a streaming Cloud Dataflow pipeline. Your engineers have a new version of the pipeline with a different windowing algorithm and triggering strategy. You want to update the running pipeline with the new version. You want to ensure that no data is lost during the update. What should you do?

- A. Stop the Cloud Dataflow pipeline with the Drain option. Create a new Cloud Dataflow job with the updated code
- B. Stop the Cloud Dataflow pipeline with the Cancel option. Create a new Cloud Dataflow job with the updated code
- C. Update the Cloud Dataflow pipeline inflight by passing the --update option with the --jobName set to the existing job name
- D. Update the Cloud Dataflow pipeline inflight by passing the --update option with the --jobName set to a new unique job name

Answer: C

Explanation:

References:

NEW QUESTION # 147

You are updating the code for a subscriber to a Pub/Sub feed. You are concerned that upon deployment the subscriber may erroneously acknowledge messages, leading to message loss. Your subscriber is not set up to retain acknowledged messages. What should you do to ensure that you can recover from errors after deployment?

- A. Create a Pub/Sub snapshot before deploying new subscriber code. Use a Seek operation to re-deliver messages that became available after the snapshot was created
- B. Set up the Pub/Sub emulator on your local machine. Validate the behavior of your new subscriber togs before deploying it to production
- C. Enable dead-lettering on the Pub/Sub topic to capture messages that aren't successful acknowledged if an error occurs after deployment, re-deliver any messages captured by the dead-letter queue
- D. Use Cloud Build for your deployment if an error occurs after deployment, use a Seek operation to locate a timestamp logged by Cloud Build at the start of the deployment

Answer: A

NEW QUESTION # 148

.....

In this age of advanced network, there are many ways to prepare Google Professional-Data-Engineer certification exam. Real4Prep provides the most reliable training questions and answers to help you pass Google Professional-Data-Engineer Certification Exam. Real4Prep have a variety of Google certification exam questions, we will meet you all about IT certification.
