

Professional Latest PSE-Strata-Pro-24 Test Dumps Offers Candidates The Best Actual Palo Alto Networks Palo Alto Networks Systems Engineer Professional - Hardware Firewall Exam Products

P.S. Free & New PSE-Strata-Pro-24 dumps are available on Google Drive shared by PDFDumps: https://drive.google.com/open?id=1GUNO2ez_0O9CyMRSolHRmFxDHjOnqI4h

Our online version of PSE-Strata-Pro-24 learning guide does not restrict the use of the device. You can use the computer or you can use the mobile phone. You can choose the device you feel convenient at any time. Once you have used our PSE-Strata-Pro-24 exam training in a network environment, you no longer need an internet connection the next time you use it, and you can choose to use PSE-Strata-Pro-24 Exam Training at your own right. Our PSE-Strata-Pro-24 exam training do not limit the equipment, do not worry about the network, this will reduce you many learning obstacles, as long as you want to use PSE-Strata-Pro-24 test guide, you can enter the learning state.

The Palo Alto Networks Systems Engineer Professional - Hardware Firewall (PSE-Strata-Pro-24) study material of PDFDumps is available in three different and easy-to-access formats. The first one is printable and portable Palo Alto Networks Systems Engineer Professional - Hardware Firewall (PSE-Strata-Pro-24) PDF format. With the PDF version, you can access the collection of actual Palo Alto Networks Systems Engineer Professional - Hardware Firewall (PSE-Strata-Pro-24) questions with your smart devices like smartphones, tablets, and laptops.

>> Latest PSE-Strata-Pro-24 Test Dumps <<

Official PSE-Strata-Pro-24 Practice Test, Vce PSE-Strata-Pro-24 Test Simulator

There are many benefits after you pass the PSE-Strata-Pro-24 certification such as you can enter in the big company and double your wage. Our PSE-Strata-Pro-24 study materials boost high passing rate and hit rate so that you needn't worry that you can't pass the test too much. We provide free tryout before the purchase to let you decide whether it is valuable or not by yourself. To further understand the merits and features of our PSE-Strata-Pro-24 Practice Engine, you should try it first!

Palo Alto Networks Systems Engineer Professional - Hardware Firewall Sample Questions (Q54-Q59):

NEW QUESTION # 54

A prospective customer has provided specific requirements for an upcoming firewall purchase, including the need to process a minimum of 200,000 connections per second while maintaining at least 15 Gbps of throughput with App-ID and Threat Prevention enabled.

What should a systems engineer do to determine the most suitable firewall for the customer?

- A. Download the firewall sizing tool from the Palo Alto Networks support portal.
- **B. Use the product selector tool available on the Palo Alto Networks website.**
- C. Upload 30 days of customer firewall traffic logs to the firewall calculator tool on the Palo Alto Networks support portal.
- D. Use the online product configurator tool provided on the Palo Alto Networks website.

Answer: B

NEW QUESTION # 55

Which action can help alleviate a prospective customer's concerns about transitioning from a legacy firewall with port-based policies to a Palo Alto Networks NGFW with application-based policies?

- **A. Discuss the PAN-OS Policy Optimizer feature as a means to safely migrate port-based rules to application-based rules.**
- B. Recommend deploying a new NGFW firewall alongside the customer's existing port-based firewall until they are comfortable removing the port-based firewall.
- C. Reassure the customer that the NGFW supports the continued use of port-based rules, as PAN-OS automatically translates these policies into application-based policies.
- D. Assure the customer that the migration wizard will automatically convert port-based rules to application-based rules upon installation of the new NGFW.

Answer: A

Explanation:

A: Discuss the PAN-OS Policy Optimizer feature as a means to safely migrate port-based rules to application-based rules.

* PAN-OS includes the Policy Optimizer tool, which helps migrate legacy port-based rules to application-based policies incrementally and safely. This tool identifies unused, redundant, or overly permissive rules and suggests optimized policies based on actual traffic patterns.

Why Other Options Are Incorrect

* B: The migration wizard does not automatically convert port-based rules to application-based rules.

Migration must be carefully planned and executed using tools like the Policy Optimizer.

* C: Running two firewalls in parallel adds unnecessary complexity and is not a best practice for migration.

* D: While port-based rules are supported, relying on them defeats the purpose of transitioning to application-based security.

* Palo Alto Networks Policy Optimizer

NEW QUESTION # 56

According to a customer's CIO, who is upgrading PAN-OS versions, "Finding issues and then engaging with your support people requires expertise that our operations team can better utilize elsewhere on more valuable tasks for the business." The upgrade project was initiated in a rush because the company did not have the appropriate tools to indicate that their current NGFWs were reaching capacity.

Which two actions by the Palo Alto Networks team offer a long-term solution for the customer? (Choose two.)

- **A. Suggest the inclusion of training into the proposal so that the operations team is informed and confident in working on their firewalls.**
- **B. Propose AI Ops Premium within Strata Cloud Manager (SCM) to address the company's issues from within the existing technology.**
- C. Inform the CIO that the new enhanced security features they will gain from the PAN-OS upgrades will fix any future problems with upgrading and capacity.
- D. Recommend that the operations team use the free machine learning-powered AI Ops for NGFW tool.

Answer: A,B

Explanation:

The customer's CIO highlights two key pain points: (1) the operations team lacks expertise to efficiently manage PAN-OS upgrades and support interactions, diverting focus from valuable tasks, and (2) the company lacked tools to monitor NGFW capacity, leading to a rushed upgrade. The goal is to recommend long-term solutions leveraging Palo Alto Networks' offerings for Strata Hardware Firewalls. Options B and D—training and AI Ops Premium within Strata Cloud Manager (SCM)—address these issues by enhancing team capability and providing proactive management tools. Below is a detailed explanation, verified against official documentation.

Step 1: Analyzing the Customer's Challenges

* Expertise Gap: The CIO notes that identifying issues and engaging support requires expertise the operations team doesn't fully

have or can't prioritize. Upgrading PAN-OS on Strata NGFWs involves tasks like version compatibility checks, pre-upgrade validation, and troubleshooting, which demand familiarity with PAN-OS tools and processes.

* Capacity Visibility: The rushed upgrade stemmed from not knowing the NGFWs were nearing capacity (e.g., CPU, memory, session limits), indicating a lack of monitoring or predictive analytics.

Long-term solutions must address both operational efficiency and proactive capacity management, aligning with Palo Alto Networks' ecosystem for Strata firewalls.

Reference: PAN-OS Administrator's Guide (11.1) - Upgrade Overview

"Successful upgrades require planning, validation, and monitoring to avoid disruptions and ensure capacity is sufficient." Step 2:

Evaluating the Recommended Actions Option A: Recommend that the operations team use the free machine learning-powered AIOps for NGFW tool.

Analysis: AIOps for NGFW (free version) is a cloud-based tool that uses machine learning to monitor firewall health, detect anomalies, and provide upgrade recommendations. It offers basic telemetry (e.g., CPU usage, session counts) and alerts, which could have flagged capacity issues earlier. However, it lacks advanced features like automated remediation, detailed capacity planning, or integration with Strata Cloud Manager, limiting its long-term impact. Additionally, it doesn't address the expertise gap, as the team still needs knowledge to interpret and act on insights.

Conclusion: Helpful but not a comprehensive long-term solution.

Reference: AIOps for NGFW Documentation

"The free version provides basic health monitoring and ML-driven insights but lacks premium features for proactive management."

Option B: Suggest the inclusion of training into the proposal so that the operations team is informed and confident in working on their firewalls.

Analysis: Palo Alto Networks offers training through the Palo Alto Networks Authorized Training Partners and Cybersecurity Academy, covering PAN-OS administration, upgrades, and troubleshooting. For Strata NGFWs, courses like "Firewall Essentials: Configuration and Management (EDU-210)" teach upgrade best practices, capacity monitoring (e.g., via Device > High Availability > Resources), and support engagement.

How It Solves the Issue:

Reduces reliance on external expertise by upskilling the team.

Enables efficient upgrade planning (e.g., using Best Practice Assessment (BPA) tool).

Frees the team for higher-value tasks by minimizing support escalations.

Long-Term Benefit: A trained team can proactively manage upgrades and capacity, addressing the CIO's concern about expertise allocation.

Conclusion: A strong long-term solution.

Reference: Palo Alto Networks Training Catalog

"Training empowers operations teams to confidently manage NGFWs, including upgrades and capacity planning." Option C: Inform the CIO that the new enhanced security features they will gain from the PAN-OS upgrades will fix any future problems with upgrading and capacity.

Analysis: New PAN-OS versions (e.g., 11.1) bring features like enhanced App-ID, decryption, or ML-based threat detection, improving security. However, these don't inherently solve upgrade complexity or capacity visibility. Capacity issues depend on hardware limits (e.g., PA-5200 Series max sessions), not software features, and upgrades still require expertise. This response oversells benefits without addressing root causes.

Conclusion: Not a valid long-term solution.

Reference: PAN-OS 11.1 Release Notes

"New features enhance security but do not automate upgrade processes or capacity monitoring." Option D: Propose AIOps Premium within Strata Cloud Manager (SCM) to address the company's issues from within the existing technology.

Analysis: AIOps Premium, integrated with Strata Cloud Manager (SCM), is a subscription-based service for managing Strata NGFWs. It provides:

Predictive Analytics: Forecasts capacity needs (e.g., CPU, memory, sessions) using ML.

Upgrade Planning: Recommends optimal upgrade paths and validates configurations.

Proactive Alerts: Identifies issues before they escalate, reducing support calls.

Centralized Management: Monitors all firewalls from SCM, integrating with existing PAN-OS deployments.

How It Solves the Issue:

Prevents rushed upgrades by predicting capacity limits (e.g., via Capacity Saturation Reports).

Simplifies upgrade preparation with automated insights, reducing expertise demands.

Aligns with existing Strata technology, enhancing ROI.

Long-Term Benefit: Offers a scalable, proactive toolset to manage NGFWs, addressing both capacity and operational efficiency.

Conclusion: A robust long-term solution.

Reference: Strata Cloud Manager AIOps Premium Documentation

"AIOps Premium provides advanced capacity planning and upgrade readiness, minimizing operational burden." Step 3: Why B and D Are the Best Choices

B (Training): Directly tackles the expertise gap, empowering the team to handle upgrades and capacity monitoring independently. It's a foundational fix, ensuring long-term self-sufficiency.

D (AIOps Premium in SCM): Provides a technological solution to preempt capacity issues and streamline upgrades, reducing the need for deep expertise and support escalations. It complements training by automating complex tasks.

Synergy: Together, they address both human (expertise) and systemic (tools) challenges, aligning with the CIO's goals of operational efficiency and business value.

Step 4: How These Actions Integrate with Strata NGFWs

Training: Teaches use of PAN-OS tools like System Resources (CLI: show system resources) and Dynamic Updates for capacity and upgrade prep.

AIOps Premium: Enhances Strata NGFW management via SCM, pulling telemetry (e.g., from Device > Setup > Telemetry) to predict and resolve issues.

Reference: PAN-OS Administrator's Guide (11.1) - Monitoring

"Combine training and tools like AIOps to optimize NGFW performance and upgrades."

NEW QUESTION # 57

The PAN-OS User-ID integrated agent is included with PAN-OS software and comes in which two forms?

(Choose two.)

- A. Integrated agent
- B. Windows-based agent
- C. Cloud Identity Engine (CIE)
- D. GlobalProtect agent

Answer: A,B

Explanation:

User-ID is a feature in PAN-OS that maps IP addresses to usernames by integrating with various directory services (e.g., Active Directory). User-ID can be implemented through agents provided by Palo Alto Networks. Here's how each option applies:

* Option A: Integrated agent

* The integrated User-ID agent is built into PAN-OS and does not require an external agent installation. It is configured directly on the firewall and integrates with directory services to retrieve user information.

* This is correct.

* Option B: GlobalProtect agent

* GlobalProtect is Palo Alto Networks' VPN solution and does not function as a User-ID agent.

While it can be used to authenticate users and provide visibility, it is not categorized as a User-ID agent.

* This is incorrect.

* Option C: Windows-based agent

* The Windows-based User-ID agent is a standalone agent installed on a Windows server. It collects user mapping information from directory services and sends it to the firewall.

* This is correct.

* Option D: Cloud Identity Engine (CIE)

* The Cloud Identity Engine provides identity services in a cloud-native manner but is not a User-ID agent. It synchronizes with identity providers like Azure AD and Okta.

* This is incorrect.

References:

* Palo Alto Networks documentation on User-ID

* Knowledge Base article on User-ID Agent Options

NEW QUESTION # 58

What does Policy Optimizer allow a systems engineer to do for an NGFW?

- A. Identify Security policy rules with unused applications
- B. Act as a migration tool to import policies from third-party vendors
- C. Recommend best practices on new policy creation
- D. Show unused licenses for Cloud-Delivered Security Services (CDSS) subscriptions and firewalls

Answer: A

Explanation:

Policy Optimizer is a feature designed to help administrators improve the efficiency and effectiveness of security policies on Palo Alto Networks Next-Generation Firewalls (NGFWs). It focuses on identifying unused or overly permissive policies to streamline and optimize the configuration.

* Why "Identify Security policy rules with unused applications" (Correct Answer C)? Policy Optimizer provides visibility into existing

security policies and identifies rules that have unused or outdated applications. For example:

- * It can detect if a rule allows applications that are no longer in use.
- * It can identify rules with excessive permissions, enabling administrators to refine them for better security and performance. By addressing these issues, Policy Optimizer helps reduce the attack surface and improves the overall manageability of the firewall.
- * Why not "Recommend best practices on new policy creation" (Option A)? Policy Optimizer focuses on optimizing existing policies, not creating new ones. While best practices can be applied during policy refinement, recommending new policy creation is not its purpose.
- * Why not "Show unused licenses for Cloud-Delivered Security Services (CDSS) subscriptions and firewalls" (Option B)? Policy Optimizer is not related to license management or tracking. Identifying unused licenses is outside the scope of its functionality.
- * Why not "Act as a migration tool to import policies from third-party vendors" (Option D)? Policy Optimizer does not function as a migration tool. While Palo Alto Networks offers tools for third-party firewall migration, this is separate from the Policy Optimizer feature.

Reference: The Palo Alto Networks Policy Optimizer documentation highlights its primary function of identifying unused or overly broad policy rules to optimize firewall configurations.

NEW QUESTION # 59

.....

All points of questions are correlated with the newest and essential knowledge. The second one of PSE-Strata-Pro-24 test guide is emphasis on difficult and hard-to-understand points. Experts left notes for your reference, and we believe with their notes things will be easier. In addition, the new supplementary will be sent to your mailbox if you place order this time with beneficial discounts at intervals. So our PSE-Strata-Pro-24 Exam Questions mean more intellectual choice than other practice materials.

Official PSE-Strata-Pro-24 Practice Test: <https://www.pdf.dumps.com/PSE-Strata-Pro-24-valid-exam.html>

That is because our aims are helping our candidates pass PSE-Strata-Pro-24 test braindumps: Palo Alto Networks Systems Engineer Professional - Hardware Firewall and offering the best service, Interactive PDFDumps Official PSE-Strata-Pro-24 Practice Test testing engine lets you practice in exam environment so that you take the real exam without any unseen stuff, Also if you purchase our PSE-Strata-Pro-24 guide torrent you don't need to worry about that, Palo Alto Networks Latest PSE-Strata-Pro-24 Test Dumps In this era, human society has been developing at a high speed.

Even so, he considers himself to be mainly a developer, PSE-Strata-Pro-24 By Greg Gibson, a pioneer in the rapidly emerging science of evolutionary quantitative genomics, That is because our aims are helping our candidates pass PSE-Strata-Pro-24 Test Braindumps: Palo Alto Networks Systems Engineer Professional - Hardware Firewall and offering the best service.

Excellent Palo Alto Networks PSE-Strata-Pro-24 Practice Material's 3 formats

Interactive PDFDumps testing engine lets you practice in exam environment so that you take the real exam without any unseen stuff, Also if you purchase our PSE-Strata-Pro-24 guide torrent you don't need to worry about that.

In this era, human society has been developing at a high speed, They find our PSE-Strata-Pro-24 VCE dumps and prepare for the PSE-Strata-Pro-24 real exam, then they pass exam with a good passing score.
