

Proven and Quick Way to Pass the CWNP CWDP-305 Exam

What's more, part of that Prep4sureGuide CWDP-305 dumps now are free: https://drive.google.com/open?id=1Pix_cYFmshzIJmsTVdzHabOzkMR434ir

We offer free demos of the CWDP-305 exam braindumps for your reference before you pay for them, for there are three versions of the CWDP-305 practice engine so that we also have three versions of the free demos. And we will send you the new updates if our experts make them freely. On condition that you fail the exam after using our CWDP-305 Study Guide unfortunately, we will switch other versions for you or give back full of your refund. All we do and the promises made are in your perspective.

CWNP CWDP-305 Exam Syllabus Topics:

Topic	Details
Topic 1	• Deploy the WLAN: This section of the exam measures the skills of a WLAN Implementation Specialist and involves overseeing the deployment phase of wireless networks. It focuses on understanding deployment procedures for various WLAN architectures, configuring supporting infrastructure, and verifying proper installation. The section also addresses physical installation checks, documentation handover, and quality assurance practices during ongoing installations.
Topic 2	• Define Specifications for the WLAN: This section of the exam measures the skills of a Wireless Network Planner and focuses on gathering business and technical requirements needed for designing wireless LANs. It includes understanding user needs, regulatory and safety constraints, and environmental factors. Candidates are expected to identify critical elements such as coverage, capacity, security, and device compatibility, and to analyse existing infrastructure and documentation to ensure a successful design strategy.
Topic 3	• Validate and Optimize the WLAN: This section of the exam measures the skills of a WLAN Optimization Specialist and assesses the ability to test, validate, and fine-tune wireless networks post-deployment. Key tasks include RF validation surveys, performance testing, troubleshooting connectivity and security issues, and applying appropriate physical or RF adjustments. It also involves client testing and final project handover, including documentation, knowledge transfer, and meetings to ensure long-term WLAN success.

Topic 4	• Design the WLAN: This section of the exam measures the skills of a WLAN Design Engineer and covers the process of selecting configurations, architecture types, and wireless components to meet business and technical requirements. It includes using design software, selecting access points and antennas, and applying methodologies such as predictive or measured design. Candidates must demonstrate the ability to produce effective documentation and configure features like QoS, roaming security, and network services for different types of client devices and applications.

CWNP CWDP-305 VCE & CWDP-305 exam simulator

Maybe now you are leading a quite comfortable life. But you also need to plan for your future. Getting the CWDP-305 training guide will enhance your ability. Also, various good jobs are waiting for you choose. Your life will become wonderful if you accept our guidance on CWDP-305 study questions. We warmly welcome you to try our free demo of the CWDP-305 preparation materials before you decide to purchase.

CWNP Certified Wireless Design Professional Sample Questions (Q47-Q52):

NEW QUESTION # 47

What functions may be performed by a WIPS? (Choose all that apply.)

- A. Performance monitoring and response
- B. Distributed protocol analysis
- C. Automated threat mitigation
- D. Data forensics and analysis
- E. Client access to the distribution system

Answer: A,B,C,D

Explanation:

A Wireless Intrusion Prevention System (WIPS) is a network security solution that monitors wireless LANs for unauthorized or malicious activity and provides real-time or automated responses. WIPS can perform a wide array of functions as outlined below:

A: Distributed protocol analysis:

WIPS sensors continuously scan wireless traffic and analyze frames to detect anomalies or policy violations in real time.

C: Performance monitoring and response:

WIPS can identify degradation in WLAN performance due to interference, misconfiguration, or rogue activity and alert administrators or take corrective action.

D: Data forensics and analysis:

WIPS platforms often include historical logging and reporting features that allow administrators to review past events and understand the timeline and impact of wireless threats.

E: Automated threat mitigation:

WIPS can automatically respond to threats by sending deauthentication frames, blocking MAC addresses, or disabling ports to mitigate rogue devices or attacks.

Note:

B: Client access to the distribution system is not a function of WIPS; it refers to client functionality in a WLAN, not a security service offered by WIPS.

"A WIPS performs functions such as rogue detection and mitigation, threat classification, forensic logging, and real-time protocol analysis. It can provide both historical analytics and proactive security enforcement."

NEW QUESTION # 48

Main Topic: Designing for Specific Applications

Question:

In the enterprise, when is WPA/WPA2-Personal generally a recommended solution? (Choose all that apply.)

- A. When the network security policy demands that each user have unique access credentials

- B. When client devices do not support 802.1X/EAP
- C. When mobile device applications require high-latency roaming times between APs
- D. When client devices are provisioned in bulk and would otherwise share 802.1X credentials

Answer: B,D

Explanation:

Comprehensive and Detailed Explanation:

WPA/WPA2-Personal is typically used in scenarios where:

A:Client devices lack support for 802.1X/EAP, making enterprise authentication methods unfeasible.

C:Devices are provisioned in bulk with shared credentials, simplifying deployment without the complexity of individual 802.1X configurations.

However:

B:High-latency roaming is undesirable; low-latency is preferred for seamless connectivity.

D:Requiring unique access credentials aligns more with WPA/WPA2-Enterprise, which supports individual authentication.

Reference:CWDP-305 Study Guide, Chapter on Designing for Specific Applications - Security Considerations.

NEW QUESTION # 49

Your customer requires a security solution in which client credentials are used and the authentication server must have a certificate with optional client certificate use. Which EAP method would be the best fit for their requirement?

- A. LEAP
- B. EAP-FAST
- C. EAP-TLS
- D. EAP-TTLS

Answer: D

Explanation:

EAP-TTLS (Extensible Authentication Protocol - Tunneled Transport Layer Security) is designed to provide secure authentication using a server-side certificate while allowing for optional client-side certificates. This flexibility makes it suitable for environments where client credentials (such as usernames and passwords) are used, and the server must present a certificate, but client certificates are not mandatory.

The CWDP-305 Official Study and Reference Guide explains:

"EAP-TTLS allows the use of server-side certificates to establish a secure tunnel, within which client authentication can occur using various methods, including username/password. Client certificates are optional, providing flexibility in deployment." Reference:

CWDP-305 Official Study and Reference Guide, Chapter on Designing for Specific Applications

NEW QUESTION # 50

A museum wants to offer Wi-Fi to its visitors. One of their requirements is to have the APs blend into the design of the museum. What should you do to meet this requirement?

- A. Lock the AP inside of a metal box
- B. Use an 802.11b AP, so it looks old enough to be in a museum
- C. Use a plastic cover that could blend in with the environment
- D. Place the APs in between walls and I-beams

Answer: C

NEW QUESTION # 51

As a device starts to shift to lower PHY rates, what factors usually influence a device decision to shift to lower PHY rates?(Choose all that apply.) Response:

- A. Signal degradation
- B. Retransmissions
- C. Interference
- D. Packet loss

Answer: A,B,C,D

NEW QUESTION # 52

All the CWDP-305 training files of our company are designed by the experts and professors in the field. The quality of our study materials is guaranteed. According to the actual situation of all customers, we will make the suitable study plan for all customers. If you buy the CWDP-305 Learning Materials from our company, we can promise that you will get the professional training to help you pass your CWDP-305 exam easily. By our professional training, you will pass your CWDP-305 exam and get the related certification in the shortest time.
