We will provide you with 24 hours of free online services. All our team of experts and service staff are waiting for your mail all the time.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q163-Q168):

NEW QUESTION # 163

Which of the following SAFe Lean-Agile principles involves delivering a continuous flow of value to customers in the shortest sustainable lead time?

- A. Decentralized decision-making
- B. Take an economic view
- C. Make value flow without interruptions

- D. Apply systems thinking

Answer: C

Explanation:

= The SAFe Lean-Agile principle that involves delivering a continuous flow of value to customers in the shortest sustainable lead time is "Make value flow without interruptions". This principle is based on the Lean concept of optimizing the whole value stream, from concept to cash, by eliminating delays, queues, handoffs, and rework. By applying practices such as limiting work in progress (WIP), reducing batch sizes, managing queue lengths, and implementing continuous integration and continuous delivery (CI/CD), SAFe teams and trains can accelerate the flow of value and feedback, improve quality and reliability, and reduce waste and overhead. NEW QUESTION # 164

Architectural Runway must be continuously maintained

- A. FALSE
- **B. TRUE**

Answer: B

NEW QUESTION # 165

What does a program board help teams identify?

- A. Each teams tasks
- B. Program-level risks
- C. Work breakdowns
- **D. Dependencies between teams**

Answer: D

Explanation:

A program board is a visual summary of the features or goals, when they need to be reached, and any cross- team dependencies impacting their delivery. The program board helps teams within the Agile Release Train (ART) to coordinate their work and communicate their plan to the entire organization. One of the main purposes of the program board is to help teams identify and manage dependencies between teams, which can affect the delivery of value and increase the risk of delays or failures. By visualizing and tracking dependencies on the program board, teams can avoid or resolve them during the Program Increment (PI) planning event or throughout the PI execution. NEW QUESTION # 166

What is one benefit of Design Thinking?

- A. The Solution is accountable
- **B. The Solution is actionable**
- C. The Solution is reliable
- D. The Solution is sustainable

Answer: B

Explanation:

Design Thinking is a methodology that helps teams solve complex problems and create innovative solutions that meet the needs and desires of the users. One of the benefits of Design Thinking is that it produces solutions that are actionable, meaning that they can be implemented and tested in the real world. Actionable solutions are based on a deep understanding of the problem, a wide range of possible ideas, and iterative prototyping and testing. Actionable solutions are also aligned with the vision, values, and goals of the organization and the stakeholders. NEW QUESTION # 167

Which of the following aspects of the continuous delivery pipeline focuses on getting to production early for verification?

- A. Continuous Integration
- B. Release on Demand
- **C. Continuous Deployment**
- D. Continuous Exploration

Answer: C

Explanation:

Continuous Deployment is the aspect of the continuous delivery pipeline that focuses on getting to production early for verification. It is the process of automatically releasing every change that passes the Continuous Integration tests to a staging or production environment. This enables faster feedback and validation from the end users and stakeholders, as well as reducing the risks and costs associated with manual deployments.
