- A. Add the "PSA Workspace Navigation Apex Class" Permission Set to the User

Answer: B

NEW QUESTION # 52

You are in the process of setting up your organization's Resources and learn that Resources in France will be working a 35-hour work week.

What will you need to do to set them up with the proper work calendar?

- A. As the Work Calendar mostly impacts Utilization, set them up with a 40-work calendar, and then include the 35-hour hour work week in your utilization calculations.
- B. As PSA only allows one work calendar, it is best to implement a 40-hour work calendar and then create a validation rule to only allow 35 hours a week.
- **C. Create a separate 35-hour work calendar and associate it to the French Resources, including any specific French Holidays.**

Answer: C

Explanation:

PSA allows for the creation of multiple work calendars to accommodate different regional working hours. The best approach to handle the 35-hour work week for French Resources is:

- * Create a separate Work Calendar specifically for France with a 35-hour work week.
- * Define the correct daily working hours (e.g., 7 hours per day for a standard 5-day workweek).
- * Include French holidays in the work calendar to ensure scheduling accuracy.
- * Assign the work calendar to all French resources so that utilization calculations and resource assignments reflect the correct working hours.
- * Option A (PSA only allows one work calendar) is incorrect because PSA supports multiple work calendars.
- * Option B (using a 40-hour calendar and adjusting utilization calculations manually) is incorrect because it leads to inconsistent resource utilization and planning errors.

Thus, the correct answer is C.
