PSE-Cortex Study Materials: Palo Alto Networks System Engineer - Cortex Professional & PSE-Cortex Certification Training

We consider the actual situation of the test-takers and provide them with high-quality learning materials at a reasonable price. Choose the PSE-Cortex test guide absolutely excellent quality and reasonable price, because the more times the user buys the PSE-Cortex test guide, the more discounts he gets. In order to make the user's whole experience smoother, we also provide a thoughtful package of services. Once users have any problems related to the PSE-Cortex learning questions, our staff will help solve them as soon as possible.

The Palo Alto Networks PSE-Cortex exam covers various topics related to Cortex security, automation, and integration with other security solutions. PSE-Cortex exam is designed to test the knowledge of professionals in areas such as Cortex XSOAR, Cortex Data Lake, and Cortex XDR. PSE-Cortex Exam also covers topics related to Cortex security operations, such as threat intelligence, incident response, and security automation.

Palo Alto Networks System Engineer - Cortex Professional Sample Questions (Q130-Q135):

NEW QUESTION # 130

Which description applies to the features of the Cortex platform as a holistic ecosystem?

- A. It primarily focuses on endpoint prevention without addressing other security aspects
- B. It provides a partial security solution, leaving some steps of the security process uncovered.
- C. It offers an end-to-end security solution, covering every step of security processes.
- D. It is solely focused on reactive security measures, neglecting proactive approaches.

Answer: C

Explanation:

The Cortex platform is designed as a holistic ecosystem that offers an end-to-end security solution, covering every step of the security process. This includes prevention, detection, investigation, and response, integrating multiple technologies and services to provide comprehensive protection across the entire security lifecycle.

NEW QUESTION # 131

Where is the output of the task visible when a playbook task errors out?

- **A. War Room of the incident**
- B. playbook editor
- C. /var/log/messages
- D. XSOAR audit log

Answer: A

Explanation:

Reference: <https://xsoar.pan.dev/docs/playbooks/playbooks-field-reference>

NEW QUESTION # 132

Which two types of indicators of compromise (IOCs) are available for creation in Cortex XDR? (Choose two.)

- A. registry
- **B. hash**
- **C. file path**
- D. hostname

Answer: B,C

NEW QUESTION # 133

Which solution profiles network behavior metadata, not payloads and files, allowing effective operation regardless of encrypted or unencrypted communication protocols, like HTTPS?

- **A. Network Detection and Response (NDR)**
- B. Security Information and Event Management (SIEM)
- C. endpoint detection and response (EDR)
- D. endpoint protection platform (EPP)

Answer: A

NEW QUESTION # 134

A Cortex XSIAM customer is unable to access their Cortex XSIAM tenant.

Which resource can the customer use to validate the uptime of Cortex XSIAM?

- A. Administrator Guide
- B. Release Notes
- C. LIVEcommunity
- **D. Palo Alto Networks Status Page**

Answer: D

Explanation:

The Palo Alto Networks Status Page provides real-time information about the uptime and operational status of Cortex XSIAM. It can be used by customers to validate whether there are any ongoing service interruptions or issues affecting their access to the tenant.
