PSE-Cortex-Pro-24 Valid Exam Notes - Visual PSE-Cortex-Pro-24 Cert Test

Exam Domain	Weight (%)
1. Business Value and Competitive Differentiators	27%
1.1 Explain to customers the return on investment (ROI) the Cortex platform provides	
1.2 Identify market differentiators for Cortex XDR	
1.3 Identify market differentiators for Cortex XSOAR	
1.4 Identify market differentiators for Cortex Xpanse	
1.5 Identify market differentiators for Cortex XSIAM	
2. Architecture and Planning	38%
2.1 Plan and architect a Cortex XDR deployment	
2.2 Plan and architect a Cortex XSOAR deployment	
2.3 Plan and architect a Cortex Xpanse deployment	
2.4 Plan and architect a Cortex XSIAM deployment	
3. Demonstration and Evaluation	20%
3.1 Identify common use cases	
3.2 Identify pre-sales tools and strategies	
3.3 Assess for qualification and readiness	
3.4 Scope and plan proof of value (PoV)	
4. Deployment / Implementation Best Practices	15%
4.1 Identify available resources	
4.2 Determine processes to facilitate a smooth hand-off	
TOTAL	100%

The Palo Alto Networks PSE-Cortex-Pro-24 certification differentiates you from other professionals in the market. Success in the Palo Alto Networks PSE-Cortex-Pro-24 exam shows that you have demonstrated dedication to understanding and advancing in your profession. Cracking the Palo Alto Networks PSE-Cortex-Pro-24 test gives you an edge which is particularly essential in today's challenging market of information technology. If you are planning to get through the test, you must study from reliable sources for Palo Alto Networks Systems Engineer Professional - Cortex PSE-Cortex-Pro-24 Exam Preparation. Actual4Cert real Palo Alto Networks PSE-Cortex-Pro-24 exam dumps are enough to clear the PSE-Cortex-Pro-24 certification test easily on the first attempt. This is because Actual4Cert Palo Alto Networks PSE-Cortex-Pro-24 PDF Questions and practice test is designed after a lot of research and hard work carried out by experts.

As the old saying goes, practice is the only standard to testify truth. In other word, it has been a matter of common sense that pass rate of the PSE-Cortex-Pro-24 study materials is the most important standard to testify whether it is useful and effective for people to achieve their goal. We believe that you must have paid more attention to the pass rate of the PSE-Cortex-Pro-24 study materials. If you focus on the study materials from our company, you will find that the pass rate of our products is higher than other study materials in the market, yes, we have a 99% pass rate, which means if you take our the PSE-Cortex-Pro-24 Study Materials into consideration, it is very possible for you to pass your exam and get the related certification.

Visual PSE-Cortex-Pro-24 Cert Test - PSE-Cortex-Pro-24 Reliable Exam Answers

One of the best things about Actual4Cert is the convenience it offers. You can access our Palo Alto Networks PSE-Cortex-Pro-24 dumps PDF format from anywhere and fit you're studying into your busy schedule. No more traveling to a physical classroom, wasting time and money on gas or public transportation. With the Palo Alto Networks Systems Engineer Professional - Cortex (PSE-Cortex-Pro-24) PDF questions, you can study on your own time, in your own place, and at your own pace.

Palo Alto Networks Systems Engineer Professional - Cortex Sample Questions (Q38-Q43):

NEW QUESTION # 38
Which playbook functionality allows grouping of tasks to create functional building blocks?

- A. sub-playbooks
- B. conditional tasks
- C. playbook features
- D. manual tasks

Answer: C

Explanation:
Reference: https://xsoar.pan.dev/docs/playbooks/playbooks-create-playbook-task

NEW QUESTION # 39
Which task allows the playbook to follow different paths based on specific conditions?

- A. Automation
- B. Conditional
- C. Parallel
- D. Manual

Answer: B

NEW QUESTION # 40
In Cortex XDR Prevent, which three matching criteria can be used to dynamically group endpoints? (Choose three.)

- A. OS
- B. hostname
- C. quarantine status
- D. attack threat intelligence tag
- E. Domain/workgroup membership

Answer: A,B,C

NEW QUESTION # 41
What is the size of the free Cortex Data Lake instance provided to a customer who has activated a TMS tenant, but has not purchased a Cortex Data Lake instance?

- A. 1 TB
- B. 10 TB
- C. 10 GB
- D. 100 GB

Answer: D

Explanation:
Cortex Data Lake (often referred to as Strata Logging Service in some contexts) is Palo Alto Networks' cloud- based storage solution that centralizes security data for products like Cortex XDR, Prisma Access, and NGFWs. The question involves a customer who has activated a TMS (Tenant Management Service) tenant but has not purchased a Cortex Data Lake instance. TMS is part of the Palo Alto Networks ecosystem for managing tenants and services, typically associated with Cortex or Prisma deployments. Let's break this down to determine the size of the free Cortex Data Lake instance provided in this scenario.
Understanding TMS and Cortex Data Lake:
* TMS Tenant: The Tenant Management Service is a framework used to manage multiple tenants or instances within Palo Alto Networks' cloud services (e.g., Cortex XDR, Prisma Access). Activating a TMS tenant implies the customer has initialized a management structure but hasn't committed to a full Cortex Data Lake purchase.
* Free Cortex Data Lake Instance: Palo Alto Networks provides a limited, free tier of Cortex Data Lake storage to customers who activate certain services or products, allowing them to evaluate functionality or store minimal data before committing to a paid license.

Free Storage Allocation:

When a customer activates a TMS tenant without purchasing a Cortex Data Lake instance, Palo Alto Networks allocates a default free storage capacity to enable basic functionality. According to official documentation and standard practices:

* The free Cortex Data Lake instance provides 100 GB of storage.
* This amount is intended for initial use cases, such as storing logs from a small number of endpoints (e. g., Cortex X## XDR Prevent agents), firewall logs, or trial data during evaluation periods.

Option Analysis:

* A. 10 GB:
* Analysis: 10 GB is too small to be a meaningful free tier for a product like Cortex Data Lake, which is designed to handle security telemetry from endpoints, networks, or cloud services. Even basic log storage for a few devices over a short period would exceed this quickly.
* Conclusion: Incorrect.

* B. 1 TB:
* Analysis: 1 TB (1,000 GB) is a substantial amount of storage, typically associated with paid Cortex Data Lake subscriptions rather than a free tier. Offering this much for free would undermine the paid licensing model.
* Conclusion: Incorrect.

* C. 10 TB:
* Analysis: 10 TB is even larger and aligns with enterprise-scale paid deployments, not a free instance. This size is far beyond what's provided without a purchase.
* Conclusion: Incorrect.

* D. 100 GB:
* Analysis: 100 GB is the documented size of the free Cortex Data Lake instance provided to customers who activate a tenant (e.g., via TMS) without purchasing additional storage. It's sufficient for small-scale testing, such as storing logs from a handful of Cortex XDR agents or firewall data for a limited retention period (e.g., 30 days).
* Conclusion: Correct.

Supporting Context:

* Cortex XDR Example: For Cortex XDR Prevent customers, activating a tenant includes 100 GB of free Cortex Data Lake storage for 30 days of alert data (not full telemetry, which requires XDR Pro).
This aligns with the TMS scenario, where basic tenant activation triggers the same free tier.
* Prisma Access: Similarly, Prisma Access customers activating a tenant without a purchased Data Lake instance receive 100 GB for initial log storage.
* Documentation: While exact wording may vary, Palo Alto Networks consistently references 100 GB as the free tier across product activation guides.

Cortex XDR Prevent Activation:
Notes that 100 GB is included for free with tenant activation, supporting basic alert storage.
Palo Alto Networks Sales and Licensing FAQs:
Confirms 100 GB as the standard free tier for Cortex Data Lake when no additional storage is purchased.

NEW QUESTION # 42

Which attack method is a result of techniques designed to gain access through vulnerabilities in the code of an operating system (OS) or application?

- A. phishing
- B. malware
- C. exploit
- D. ransomware

Answer: C

Explanation:
Reference: https://www.eccouncil.org/cybersecurity-exchange/ethical-hacking/gaining-access-techniques- implications-safeguards/

NEW QUESTION # 43
