NEW QUESTION # 174

An earned value-based project control system can use either of which two budgets as the basis of its calculations?

- A. Linear feet or dollars.
- B. Labor hours or dollars.
- C. Earned or budgeted cost yearly.
- D. Direct or indirect cost.

Answer: B

Explanation:

An earned value management (EVM) system can base its calculations on labor hours or monetary values, depending on the nature of the project. Both methods are valid for tracking performance and forecasting outcomes.

* Option B (direct or indirect cost) does not align with EVM's focus on performance metrics.

* Option C confuses timeframes with budgeting principles.

* Option D (linear feet or dollars) applies to physical progress tracking but not directly to EVM systems.

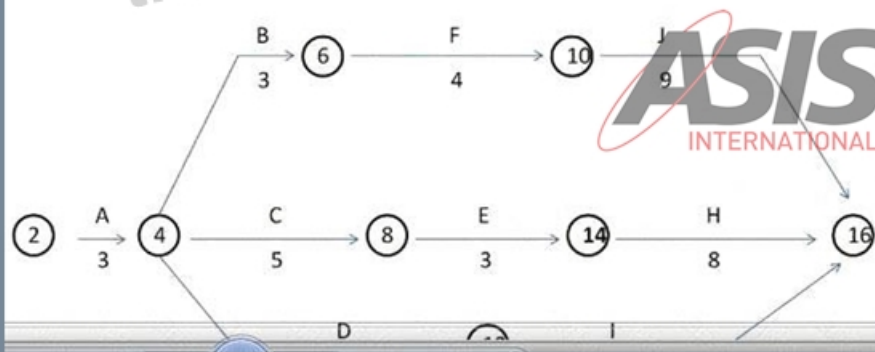

This is consistent with EVM principles as outlined in project control methodologies within the PSP materials.
