Scrum Professional Scrum Product Owner II Sample Questions (Q73-Q78):

NEW QUESTION # 73

Which of the following statements is TRUE about the Sprint Backlog? (choose the best answer)

- A. The Developers commit to completing the Sprint Backlog by the end of the Sprint time-box.
- B. It is helpful to have the Sprint Backlog defined before the Sprint Planning.
- **C. The Developers own the Sprint Backlog.**
- D. The Product Owner has the final say on the scope and the ordering of the Sprint Backlog

Answer: C

NEW QUESTION # 74

You have many customers on different versions of the same product. Most of your time and effort is spent maintaining all of the product variations. This leaves you with little time to invest in product improvements.

Which of the following would best help you improve effectiveness to deliver new value? (choose the best answer)

- A. Examining Current Value measures.
- **B. Examining Ability to Innovate measures.**
- C. Examining Time to Market measures
- D. None of the above.
- E. Examining Unrealized Value measures.
- F. All of the above.

Answer: B

NEW QUESTION # 75

The Scrum Guide defines that a separate Product Backlog is needed for every_____ (choose the best answer)

- A. Scrum Team
- B. Design Team
- C. All of the above.
- D. Portfolio
- E. None of the above
- **F. Product**

Answer: F

NEW QUESTION # 76

A user satisfaction gap exists when there is a difference between:
(choose the best two answers)

- A. The total market size.

- B. The user's desired outcome.
- C. The user's actual experience.
- D. The market share of the product.

Answer: B,C

Explanation:

Explanation

A user satisfaction gap exists when there is a difference between what the user expects from a product or service and what the user actually experiences¹². The user's desired outcome is the goal or benefit that the user wants to achieve by using the product or service³. The user's actual experience is the perception and evaluation of the product or service by the user⁴. If the user's actual experience does not meet or exceed the user's desired outcome, the user will be dissatisfied and may switch to a different product or service.

- * 3: [Outcome-Driven Innovation]
- * 4: [User Experience]
- * : Measure Business Opportunities with Unrealized Value

NEW QUESTION # 77

The smallest product Increment that is valuable enough to release is one that:
(choose the best answer)

- A. Delivers a single new or improved outcome.
- B. Delivers all "must do" Product Backlog items.
- C. Fixes at least one defect.
- D. Adds a new feature.

Answer: A

Explanation:

The smallest product Increment that is valuable enough to release is one that delivers a single new or improved outcome for the customers or users of the product. This is because the outcome is the ultimate measure of value, not the output or the features¹. An outcome is a change in behavior, attitude, or situation that results from using the product². An outcome can be achieved by delivering a single feature, fixing a defect, or improving an existing functionality, as long as it meets the Definition of Done and the Sprint Goal³. Therefore, the best answer is A.

The other options are not correct because:

B) Adds a new feature. This is not a sufficient condition, as a new feature may not deliver a valuable outcome if it is not aligned with the product vision, the customer needs, or the market conditions⁴.

C) Fixes at least one defect. This is not a necessary condition, as a defect may not affect the value of the product if it is minor, rare, or irrelevant to the customer⁵.

D) Delivers all "must do" Product Backlog items. This is not a realistic condition, as the Product Backlog is a dynamic and emergent artifact that changes based on feedback, learning, and discovery. There is no fixed set of "must do" items that can guarantee the delivery of value. Reference: 1: Outcome vs. Output, 2: What is an Outcome?, 3: The Definition of Done, 4: Feature vs. Outcome, 5: Defect vs. Value, : The Product Backlog

NEW QUESTION # 78

.....
