

QSA_New_V4 Schulungsangebot, QSA_New_V4 Testing Engine, Qualified Security Assessor V4 Exam Trainingsunterlagen

2025 Die neuesten Pass4Test QSA_New_V4 PDF-Versionen Prüfungsfragen und QSA_New_V4 Fragen und Antworten sind kostenlos verfügbar: https://drive.google.com/open?id=1xIC7SvSgzmP_oofEJCGrfmb8llxP5-M

Die Fragenkataloge zur PCI SSC QSA_New_V4 Prüfung von Pass4Test sind die besten im Vergleich zu den anderen Materialien. Wenn Sie Fragenkataloge suchen, wählen Sie doch die Fragenkataloge zur PCI SSC QSA_New_V4 Prüfung von Pass4Test. Und Sie würden viel davonprofitieren. Sonst würden Sie bereuen.

PCI SSC QSA_New_V4 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Real-World Case Studies: This section of the exam measures the skills of Cybersecurity Consultants and involves analyzing real-world breaches, compliance failures, and best practices in PCI DSS implementation. Candidates must review case studies to understand practical applications of security standards and identify lessons learned. One key skill evaluated is applying PCI DSS principles to prevent security breaches.
Thema 2	• PCI Validation Requirements: This section of the exam measures the skills of Compliance Analysts and evaluates the processes involved in validating PCI DSS compliance. Candidates must understand the different levels of merchant and service provider validation, including self-assessment questionnaires and external audits. One essential skill tested is determining the appropriate validation method based on business type.
Thema 3	• Payment Brand Specific Requirements: This section of the exam measures the skills of Payment Security Specialists and focuses on the unique security and compliance requirements set by different payment brands, such as Visa, Mastercard, and American Express. Candidates must be familiar with the specific mandates and expectations of each brand when handling cardholder data. One skill assessed is identifying brand-specific compliance variations.

Thema 4	• PCI DSS Testing Procedures: This section of the exam measures the skills of PCI Compliance Auditors and covers the testing procedures required to assess compliance with the Payment Card Industry Data Security Standard (PCI DSS). Candidates must understand how to evaluate security controls, identify vulnerabilities, and ensure that organizations meet compliance requirements. One key skill evaluated is assessing security measures against PCI DSS standards.
Thema 5	• PCI Reporting Requirements: This section of the exam measures the skills of Risk Management Professionals and covers the reporting obligations associated with PCI DSS compliance. Candidates must be able to prepare and submit necessary documentation, such as Reports on Compliance (ROCs) and Self-Assessment Questionnaires (SAQs). One critical skill assessed is compiling and submitting accurate PCI compliance reports.

PCI SSC QSA_New_V4 Prüfung Übungen und Antworten

Sie brauchen nicht so viel Geld und Zeit, nur ungefähr 30 Stunden spezielle Ausbildung, dann können Sie ganz einfach die PCI SSC QSA_New_V4 Zertifizierungsprüfung nur einmalig bestehen. Pass4Test bietet Ihnen die Prüfungsthemen, deren Ähnlichkeit mit den realen Prüfungsübungen sehr groß ist.

PCI SSC Qualified Security Assessor V4 Exam QSA_New_V4 Prüfungsfragen mit Lösungen (Q61-Q66):

61. Frage

According to Requirement 1, what is the purpose of "Network Security Controls"?

- A. Discover vulnerabilities and rank them.
- **B. Control network traffic between two or more logical or physical network segments.**
- C. Manage anti-malware throughout the CDE.
- D. Encrypt PAN when stored.

Antwort: B

Begründung:

According to Requirement 1.2.1 of PCI DSS v4.0.1, network security controls (NSCs), such as firewalls and segmentation controls, are used to restrict and control traffic between trusted and untrusted networks. This includes logical or physical network segmentation.

* Option A: Incorrect. Anti-malware is addressed in Requirement 5.

* Option B: Correct. NSCs control and restrict inbound and outbound traffic between logical and physical network segments.

* Option C: Incorrect. Vulnerability management is under Requirement 6.

* Option D: Incorrect. PAN encryption is covered in Requirement 3.5.

Reference: PCI DSS v4.0.1 - Requirement 1.2.1.

62. Frage

Where can live PANs be used for testing?

- **A. Pre-production environments that are located within the CDE.**
- B. Production (live) environments only.
- C. Pre-production (test) environments only if located outside the CDE.
- D. Testing with live PANs must only be performed in the QSA Company environment.

Antwort: A

Begründung:

Requirement 6.4.3.1 clarifies that if live PANs are to be used in testing, the test environment must meet all applicable PCI DSS controls. Thus, testing with live PAN is only allowed if the test environment is within the CDE and fully secured.

* Option A: #Incorrect. Testing should not happen in production.

- * Option B: Incorrect. It must be within the CDE if live PAN is involved.
 - * Option C: Correct. Live PANs can be used in pre-production environments within the CDE.
 - * Option D: Incorrect. There's no requirement to test only within QSA environments.
- Reference: PCI DSS v4.0.1 - Requirement 6.4.3.1 and its Applicability Note.

63. Frage

An internal NTP server that provides time services to the Cardholder Data Environment is?

- A. Only in scope if it stores, processes or transmits cardholder data.
- B. Not in scope for PCI DSS.
- C. Only in scope if it provides time services to database servers.
- **D. In scope for PCI DSS.**

Antwort: D

Begründung:

Scope definition in PCI DSS v4.0.1 (Section 4) includes any system that can impact the security of the CDE. Time synchronization servers such as NTP are critical to log integrity (Requirement 10.6), and if they provide services to CDE systems, they are in scope even if they do not directly process cardholder data.

* Option A: Incorrect. Scope is broader than just databases.

* Option B: Incorrect. Time servers impact log security, so they are in scope.

* Option C: Incorrect. PCI DSS scope includes systems that affect the security of CDE, not just those storing card data.

* Option D: Correct. Internal NTP servers providing services to the CDE are in scope.

References:

PCI DSS v4.0.1 - Section 4: Scope of PCI DSS Requirements;
Requirement 10.6.1.1.

64. Frage

Which of the following statements is true whenever a cryptographic key is retired and replaced with a new key?

- **A. The retired key must not be used for encryption operations.**
- B. Cryptographic key components from the retired key must be retained for 3 months before disposal.
- C. All data encrypted under the retired key must be securely destroyed.
- D. A new key custodian must be assigned.

Antwort: A

Begründung:

When a cryptographic key is retired and replaced, it is essential to ensure that the retired key is no longer used for encryption purposes to maintain the security of the cryptographic system.

* Option A: Correct. Retired keys must not be used for encryption operations to prevent potential security vulnerabilities. However, they may be retained for decryption purposes if necessary, such as decrypting existing data encrypted under the retired key.

* Option B: Incorrect. PCI DSS does not specify a mandatory retention period for retired cryptographic key components before disposal. Retention periods should align with the entity's data retention policies and legal requirements.

* Option C: Incorrect. Assigning a new key custodian is not a mandatory requirement upon key retirement and replacement, though proper key management practices should ensure that custodianship is clearly defined and documented.

* Option D: Incorrect. While data encrypted under a retired key should be re-encrypted with the new key or securely managed, PCI DSS does not mandate the destruction of such data solely due to key retirement.

For more information on cryptographic key management practices, refer to Requirement 3: Protect Stored Account Data in the PCI DSS v4.0.1 document. Wikipedia

65. Frage

Where can live PANs be used for testing?

- **A. Pre-production environments that are located within the CDE.**
- B. Production (live) environments only.
- C. Pre-production (test) environments only if located outside the CDE.
