

Quick Tips for Exam Success using Oracle 1z0-1057-25 Questions

We promise you will pass the exam and obtain the Oracle Project Management Cloud 2025 Implementation Professional certificate successfully with our help of 1z0-1057-25 exam questions. According to recent survey of our previous customers, 99% of them can achieve their goals, so believe that we can be the helping hand to help you achieve your ultimate goal. Besides we have high-quality 1z0-1057-25 test guide for managing the development of new knowledge, thus ensuring you will grasp every study points in a well-rounded way. On the other hand, if you fail to pass the exam with our 1z0-1057-25 Exam Questions unfortunately, you can receive a full refund only by presenting your transcript. At the same time, if you want to continue learning, our 1z0-1057-25 test guide will still provide free updates to you and you can have a discount more than one year. Finally our refund process is very simple. If you have any question about Oracle Project Management Cloud 2025 Implementation Professional study question, please contact us immediately.

Revised and updated according to the syllabus changes and all the latest developments in theory and practice, our 1z0-1057-25 dumps are highly relevant to what you actually need to get through the certifications tests. Moreover they impart you information in the format of 1z0-1057-25 questions and answers that is actually the format of your real certification test. Hence not only you get the required knowledge but also find the opportunity to practice real exam scenario. For consolidation of your learning, our 1z0-1057-25 Dumps PDF file also provide you sets of practice questions and answers. Doing them again and again, you enrich your knowledge and maximize chances of an outstanding exam success.

Splendid Oracle 1z0-1057-25 Exam Questions - Pass Exam Confidently [2025]

Customer first, service first is our principle of service. If you buy our 1z0-1057-25 study guide, you will find our after sale service is

so considerate for you. We are glad to meet your all demands and answer your all question about our 1z0-1057-25 Training Materials. So do not hesitate and buy our 1z0-1057-25 study guide, we believe you will find surprise from our products. you should have the right to enjoy the perfect after sale service and the high quality products!

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q30-Q35):

NEW QUESTION # 30

Your client is involved in automation control systems installation. Over the years, they have analyzed their total project spend on specific resource classes. They have identified that their cost spread distribution factor on a 10 spread point scale resembles: 0-4-10-11-14-13-10-4-0-0. Identify two ways to handle this kind of a spread on their budgets and forecasts. (Choose two)

- A. Use the predefined S-Curve spread with small deviations on the spread points.
- B. Use the predefined Bell Curve spread with small deviations on the spread points.
- C. Create a new spread curve or edit an existing spread curve to exactly match the spread points and attach to a project template.
- D. Create a new spread curve or edit an existing spread curve to exactly match the spread points and attach to the resource class.

Answer: C,D

Explanation:

To handle a custom spread on budgets and forecasts, you can either create a new spread curve or edit an existing one to match the desired spread points. Then, you can attach the spread curve to a project template or a resource class, depending on whether you want to apply it to all projects using that template or all transactions using that resource class. NEW QUESTION # 31

You have been hired as a project manager for implementing the Project Financial Management and Project Execution Management offering by an organization. The Chief Information Officer of the deploying organization has requested you to explain the benefits of using the implementation project-based approach over the functional area-based approach.

Which two are the main benefits of using the implementation projects within Functional Setup Manager?

(Choose two.)

- A. Implementation Project helps you to use the manage setup data entry in bulk option.
- B. Implementation Project helps in assigning responsibility of managing setup data to a broad group of users.
- C. Implementation Project helps you to monitor progress of the setup tasks.
- D. Implementation Project gives you the flexibility to set up different functional areas of the offering at different times.

Answer: B,C

Explanation:

Some of the main benefits of using the implementation projects within Functional Setup Manager are:

* Implementation Project helps in assigning responsibility of managing setup data to a broad group of users. You can assign tasks to different users who are responsible for entering and validating setup data for different functional areas of the offering.

* Implementation Project helps you to monitor progress of the setup tasks. You can track the status and completion percentage of each task and view the dependencies and prerequisites among tasks.

Implementation Project does not give you the flexibility to set up different functional areas of the offering at different times, as this is determined by the configuration package that you select for your implementation. Implementation Project does not help you to use the manage setup data entry in bulk option, as this is a separate feature that allows you to import and export setup data across instances using spreadsheets. Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/implement-project-financial-management-applications.html#OAPFM2356051>

NEW QUESTION # 32

Your customer wants to assign the Net 45 payment term to all sets except for the corporate business unit specific set, which is assigned the Net 15 payment term. At transaction entry, the list of values for payment terms consists of only one set of data: the set that is assigned to the transaction's business unit.

Which reference data sharing method would you set up to meet the customer requirement? (Choose the best answer.)

- **A. assignment to multiple sets; no common values allowed**
- B. assignment to one set only; no common values allowed
- C. assignment to multiple sets; common values allowed
- D. assignment to one set only with common values

Answer: A

Explanation:

Reference <https://docs.oracle.com/en/cloud/saas/applications-common/19b/facia/define-enterprise-structures.html#FACIA462453>

Reference Data Sharing Methods

Variations exist in the methods used to share data in reference data sets across different types of objects. The following list identifies the methods:

Assignment to one set only, no common values allowed. This method is the simplest form of sharing reference data that allows assigning a reference data object instance to one and only one set. For example, Asset Prorate Conventions are defined and assigned to only one reference data set. This set can be shared across multiple asset books, but all the values are contained only in this one set.

Assignment to one set only, with common values. This method is the most commonly used method of sharing reference data that allows defining reference data object instance across all sets. For example, Receivables Transaction Types are assigned to a common set that is available to all the business units. You need not explicitly assign the transaction types to each business unit. In addition, you can assign a business unit-specific set of transaction types. At transaction entry, the list of values for transaction types includes the following:

Transaction types from the set assigned to the business unit.

Transaction types assigned to the common set that is shared across all business units.

Assignment to multiple sets, no common values allowed. The method of sharing reference data that allows a reference data object instance to be assigned to multiple sets. For instance, Payables Payment Terms use this method. It means that each payment term can be assigned to one or more than one set. For example, you assign the payment term Net 30 to several sets but assign Net 15 to a set specific only to your business unit.

At transaction entry, the list of values for payment terms consists of only the set that is assigned to the transaction's business unit.

Note: Oracle Fusion Applications contains a reference data set called Enterprise. Define any reference data that affects your entire enterprise in this set. Also update the data set going forward as you create new reference data items.

NEW QUESTION # 33

Identify the valid approval group type applicable to Oracle Project Financial Management Cloud. (Choose the best answer.)

- A. Job
- B. Position
- C. Dynamic
- **D. Static**
- E. Flexfield

Answer: D

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/applications-common/19b/facia/define-approval-management.html#FACIA3124477>

Topic Approval Groups

Each approval group includes a set of users that you configure to act on tasks in a certain pattern. Tasks can be defined to get routed to an approval group instead of an individual user. You can nest approval groups within approval groups.

You have two options for defining the group:

* Static: Select the specific users to include in the group.

* Dynamic: Provide the logic to use to determine the users in the group.

NEW QUESTION # 34

Your client has implemented Oracle Cloud Applications with their United States business unit and United Kingdom business unit. After six months, they acquired another company in China and added a China business unit. A project accountant in your organization is authorized to access transactions for the US, UK, and China business units. The project accountant can see the transactions for the US and UK business units but not for the China business unit. Why is he not able to see the transactions for the

China business unit? (Choose the best answer.)

- A. The China business unit is associated with a different legal entity than the US and UK business units.
- B. The JOB role relevant to the China business unit is not assigned to the project accountant.
- C. The US and UK business units are linked to different ledgers than the China business unit.
- **D. The project accountant is not assigned to the external role that grants access to the China business unit.**

Answer: D

Explanation:

To access transactions for a business unit, the project accountant needs to be assigned to an external role that grants access to that business unit. The external role is defined by the security profile of the business unit and can be different for each business unit. The job role and the legal entity are not relevant for accessing transactions for a business unit. The ledger is relevant for accounting transactions, but not for project transactions. Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/set-up-project-financial-management.html#OAPFM2355903>

NEW QUESTION # 35

.....
