

Quiz 1Z0-1072-25 - Useful New Oracle Cloud Infrastructure 2025 Architect Associate Exam Review

What's more, part of that Test4Cram 1Z0-1072-25 dumps now are free: <https://drive.google.com/open?id=1xI2YaDCZ2FQWVZSZNO0rcpBbA9-C1fYm>

Test4Cram, as a provider, specializing in providing all candidates with 1Z0-1072-25 exam-related materials, focus on offering the most excellent dumps for the candidates. In contrast with other websites, Test4Cram is more trustworthy. Why? Because Test4Cram has many years of experience and our Oracle experts have been devoted themselves to the study of Oracle certification exam and summarize 1Z0-1072-25 Exam rules. Thus, Test4Cram exam dumps have a high hit rate. Meanwhile, it guarantees the qualification rate in the exam. Therefore, Test4Cram got everyone's trust.

Because the effect is outstanding, the 1Z0-1072-25 study materials are good-sale, every day there are a large number of users to browse our website to provide the 1Z0-1072-25 study materials, through the screening they buy material meets the needs of their research. Every user cherishes the precious time, seize this rare opportunity, they redouble their efforts to learn, when others are struggling, why do you have any reason to relax? So, quicken your pace, follow the 1Z0-1072-25 Study Materials, begin to act, and keep moving forward for your dreams!

Exam 1Z0-1072-25 Simulator Fee & 1Z0-1072-25 Reliable Exam Pass4sure

Our Oracle Cloud Infrastructure 2025 Architect Associate study question is compiled and verified by the first-rate experts in the industry domestically and they are linked closely with the real exam. Our products' contents cover the entire syllabus of the exam and refer to the past years' exam papers. Our test bank provides all the questions which may appear in the real exam and all the important information about the exam. You can use the practice test software to test whether you have mastered the Oracle Cloud Infrastructure 2025 Architect Associate test practice dump and the function of stimulating the exam to be familiar with the real exam's pace, atmosphere and environment. So our 1Z0-1072-25 Exam Questions are real-exam-based and convenient for the clients to prepare for the exam.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which authentication option should you use to ensure third-party APIs communicate with OCI resources?

- A. API Signing Key
- B. Auth Tokens
- C. SSH Key Pair with 2048-bit algorithm
- D. OCI Username and Password

Answer: A

Explanation:

When ensuring that third-party APIs communicate securely with OCI resources, the appropriate authentication option is API Signing Key.

API Signing Key: This method uses an RSA key pair to authenticate and sign API requests. The API signing key provides a secure and reliable way to ensure that the API requests to OCI are coming from an authorized source. It is commonly used for programmatic access to OCI services.

Other Options:

SSH Key Pair: Primarily used for secure shell access to compute instances, not for API authentication.

Auth Tokens: Typically used for authentication in environments where APIs don't support the API Signing Key, such as OCI CLI or

SDKs.

OCI Username and Password: Generally used for the Console login, not for securing API communications.

Relevant OCI Documentation:

API Signing Key Authentication

This documentation provides details on using API Signing Keys for secure API communication in OCI.

NEW QUESTION # 12

Which TWO statements are NOT correct regarding the Oracle Cloud Infrastructure (OCI) burstable instances?

- A. If the instance's average CPU utilization is below the baseline, it can burst above the baseline.
- B. Burstable instances cost less than regular instances.
- C. Burstable instances are charged according to the baseline OCPU.
- D. Baseline utilization is a fraction of each CPU core.

Answer: B,C

Explanation:

The following statements about OCI burstable instances are NOT correct:

A . Burstable instances cost less than regular instances: This is incorrect because burstable instances are not necessarily cheaper; the cost depends on the baseline utilization. While they allow for cost efficiency when running at a lower CPU baseline, they can become more expensive if frequently bursting above the baseline.

B . Burstable instances are charged according to the baseline OCPU: This is incorrect because burstable instances are billed based on actual OCPU usage, which includes both baseline and burst usage. If an instance frequently operates above its baseline, the cost will reflect this higher usage.

Correct Concepts:

C . Burstable instances can temporarily use more CPU than their baseline if the average CPU utilization is below the baseline.

D . Baseline utilization is a fraction of each CPU core, which determines the level of consistent performance available without bursting.

Reference:

Oracle Cloud Infrastructure Documentation: Burstable Instances

NEW QUESTION # 13

How can OCI IAM be configured to facilitate cross-region access?

- A. The administrator can grant users permissions to access specific resources in the other region.
- B. The identity domain automatically replicates to the other region.
- C. Identity domain replication must be enabled.
- D. Users can access resources in all regions by default.

Answer: A

Explanation:

In Oracle Cloud Infrastructure (OCI), cross-region access is facilitated by configuring IAM policies that grant users or groups permissions to access resources in other regions. IAM policies in OCI are global, meaning they apply across all regions by default. However, an administrator can specifically configure these policies to allow or restrict access to resources in different regions.

Example: An administrator can write a policy that allows a user to manage compute instances in a specific region by including the region's name in the policy statement.

Reference:

Oracle Cloud Infrastructure Documentation: IAM Policies

NEW QUESTION # 14

You enabled Cross Region Replication for the volume and selected US West (San Jose) as the destination region. What should you do to create a new volume from the volume replica?

- A. Trigger the replica.
- B. No action required. By default, the replica is available as a block volume.
- C. Activate the replica.

- D. Initiate the replica.

Answer: B

Explanation:

When Cross-Region Replication is enabled for a block volume in Oracle Cloud Infrastructure (OCI), the replication process automatically creates and maintains a synchronized copy of the block volume in the selected destination region (in this case, US West (San Jose)).

Replica Availability: The replicated volume is immediately available as a block volume in the destination region. You do not need to take any additional action to activate or trigger the replica.

Creating New Volumes: Since the replica is automatically available as a block volume, you can directly use it to create a new volume in the destination region without any manual intervention.

Relevant OCI Documentation:

Cross-Region Block Volume Replication

This documentation outlines how cross-region replication works and confirms that no additional steps are needed to create a new volume from a replica

NEW QUESTION # 15

Which OCI service would you use to apply kernel security updates to all instances?

- A. Data Safe
- B. Container Registry
- **C. OS Management Service**
- D. Artifact Registry

Answer: C

Explanation:

The OS Management Service in Oracle Cloud Infrastructure (OCI) is designed to manage and maintain the operating systems of your compute instances. This service allows you to apply kernel security updates, manage package installations, and monitor the status of updates across all instances in your environment.

Kernel Security Updates: With OS Management Service, you can automate and schedule kernel updates, ensuring that all instances are up-to-date with the latest security patches. This helps maintain the security and integrity of your infrastructure without needing to manually update each instance.

Other Options:

Container Registry: Used for storing and managing container images, not for applying OS updates.

Data Safe: A service focused on database security, not applicable for OS-level updates.

Artifact Registry: A repository for storing and managing software artifacts, not related to OS management.

Relevant OCI Documentation:

OS Management Service Overview

This documentation provides details on how to use OS Management Service to handle kernel security updates and other OS-level management tasks.

NEW QUESTION # 16

.....

To ensure your success, you require Oracle 1Z0-1072-25 Exam Questions that provide comprehensive and relevant information for a fully prepared approach to the Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) exam. While numerous online guides offer 1Z0-1072-25 Exam Questions, caution is necessary to avoid falling victim to online scams. Trust Test4Cram for the ultimate preparation experience with their Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) exam questions.

Exam 1Z0-1072-25 Simulator Fee: https://www.test4cram.com/1Z0-1072-25_real-exam-dumps.html

Our 1Z0-1072-25 test braindump are created based on the real test, Oracle New 1Z0-1072-25 Exam Review Now, in our company, the customer base is stable and extended gradually through the efforts of all of our staffs, our company has become the bellwether in this field, To tell the truth, the price lower than 1Z0-1072-25 actual exam material can't be the same high quality as it, Oracle New 1Z0-1072-25 Exam Review The valid and useful reference material is critical in your preparation.

100% Pass 2025 Oracle Updated 1Z0-1072-25: New Oracle Cloud Infrastructure 2025 Architect Associate Exam Review

To tell the truth, the price lower than 1Z0-1072-25 actual exam material can't be the same high quality as it, The valid and useful reference material is critical in your preparation.
