

Quiz 2025 2V0-17.25: High Pass-Rate VMware Cloud Foundation 9.0 Administrator Guaranteed Success

The VMware is committed to making the VMware 2V0-17.25 certification exam journey simple, smart, and easiest. The mock VMware Cloud Foundation 9.0 Administrator exams that will give you real-time environment for VMware 2V0-17.25 exam preparation. To keep you updated with latest changes in the 2V0-17.25 Test Questions, we offer one-year free updates in the form of new questions according to the requirement of 2V0-17.25 real exam. Updated 2V0-17.25 PDF dumps ensure the accuracy of learning materials and guarantee success of in your first attempt.

VMware 2V0-17.25 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none">Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments. |
| Topic 2 | <ul style="list-style-type: none">IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies. |
| Topic 3 | <ul style="list-style-type: none">VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment. |
| Topic 4 | <ul style="list-style-type: none">Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation. |

Reliable Exam 2V0-17.25 Pass4sure & 2V0-17.25 Test Discount

As a result, it gives you a feeling of taking the actual test. The VMware 2V0-17.25 desktop practice exam software runs on computers and laptops with a Windows operating system and it requires no internet. Since Exams-boost always assists its customers, you can contact our team 24/7 to address your issues.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q73-Q78):

NEW QUESTION # 73

What prerequisite must an administrator complete in VCF before configuring Provider Networking in VCF Automation?

- A. Create a T0 Gateway in the Organization.
- **B. Create a T0 Gateway in NSX Manager.**
- C. Create a vDS in Provider Management.
- D. Create a vDS in vCenter.

Answer: B

Explanation:

Before you can configure Provider Networking, an active Tier-0 (T0) Gateway must be created in NSX Manager and associated with the Provider region. This gateway provides external routing and forms the foundation for VPC and tenant networking.

NEW QUESTION # 74

Which option should be chosen when placing a vSAN host into maintenance mode to ensure all data remains accessible during maintenance, while minimizing the time required to complete the operation?

- **A. Ensure Accessibility**
- B. Quick Migration
- C. Full Data Migration
- D. No Data Migration

Answer: A

Explanation:

When placing a vSAN host into maintenance mode, choosing "Ensure Accessibility" ensures that all data remains accessible during the maintenance operation. It moves data off the host only if necessary, prioritizing accessibility while minimizing downtime. This option is designed to minimize the time required to complete the operation compared to "Full Data Migration."

NEW QUESTION # 75

An administrator must deploy a new VMware Cloud Foundation (VCF) instance using a supported VCF Operations model with the smallest possible resource footprint. Which VCF Operations deployment model should be used?

- A. Stretched Cluster
- B. High Availability
- C. Continuous Availability
- **D. Simple**

Answer: D

Explanation:

VCF 9.0 documents two Operations for Logs/Operations models--Simple (Standard) and High Availability (Cluster)--and highlight that Simple is the minimal footprint option intended for test/dev: "Architecture flexibility: Can be deployed in a Simple or Highly Available Cluster deployment. Recommended deployment is a HA Cluster... Simple deployment is for test/dev environments, it is not for production use cases." By contrast, HA/clustered models increase resources to provide redundancy at scale. Since the

requirement is the smallest resource footprint, the Simple model is the correct selection.
(Stretched/Continuous Availability options are not listed VCF Operations models in this context.)

NEW QUESTION # 76

An administrator is tasked to converge an existing VMware vSphere environment to VMware Cloud Foundation (VCF). The following information has been provided to the administrator for this task:

- Three VMware vCenters in Enhanced Linked Mode.
- Five vSphere clusters per vCenter.
- Lifecycle Manager configured with baselines and images.
- Each VMware ESX host has 10 Gbps uplinks.
- All ESX hosts are configured with LACP.
- All clusters within a vCenter share a single vSphere Distributed Switch.

Which two configurations need to be changed before the environment is converged? (Choose two.)

- A. Create a vSphere Standard Switch per host.
- B. Add an additional VMkernel interface per host for vMotion traffic.
- C. Enhanced Linked Mode needs to be deactivated.
- D. Lifecycle Manager needs to be configured with Images only.
- E. All ESX hosts must have a minimum of 25 Gbps uplinks.

Answer: C,D

Explanation:

Enhanced Linked Mode (ELM) must be removed:

VCF does not support multiple vCenters joined in Enhanced Linked Mode. Each workload domain has its own dedicated vCenter instance, managed by SDDC Manager.

Before convergence, Enhanced Linked Mode must be deactivated. VCF requires independent vCenters for each workload domain. Lifecycle Manager must use Images only: VCF lifecycle operations are exclusively image-based.

Baselines are not supported. "All clusters managed by VCF must be converted to vSphere Lifecycle Manager image-based lifecycle management prior to convergence."

NEW QUESTION # 77

When creating a new distributed port group, which of the following port binding or policy configurations are possible in vSphere?

- A. Port-level VLAN settings to isolate traffic
- B. Host-only binding to bypass vCenter management
- C. Ephemeral binding for short-lived or temporary VMs
- D. Static binding for VM network adapters

Answer: A,C,D

Explanation:

Distributed port groups can be set to static or ephemeral binding (A, B), and each port group can define VLAN tagging or trunking at the port level (D). "Host-only binding" (C) is not a standard vSphere feature.

NEW QUESTION # 78

.....

It is estimated conservatively that the passing rate of the exam is over 98 percent with our 2V0-17.25 study materials as well as considerate services. We not only provide all candidates with high pass rate study materials, but also provide them with good service. The thoughtfulness of our 2V0-17.25 Study Materials services is insuperable. What we do surly contribute to the success of 2V0-17.25 practice materials.
