## CompTIA A+ Certification Exam: Core 2 Sample Questions (Q54-Q59):

### NEW QUESTION # 54

A technician is reviewing an organization's current incident management policy. The organization uses a third- party vendor to protect the organization's assets with multiple tools. Which of the following service types is the organization using?

- A. MDR
- B. PaaS
- C. EDR
- D. XDR

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

MDR (Managed Detection and Response) provides outsourced threat monitoring and response using multiple tools. The use of a third-party provider for protection and incident handling confirms MDR.

From Quentin Docter - CompTIA A+ Study Guide:

"MDR provides 24/7 threat detection and response through outsourced experts using advanced tools across client environments."

#### NEW QUESTION # 55

Which of the following is the best reason for a network engineering team to provide a help desk technician with IP addressing information to use on workstations being deployed in a secure network segment?

- A. The network allow list is set to a specific address.
- B. NAC servers only allow for security updates to be installed.
- **C. DHCP services are not enabled for this subnet.**
- D. Only specific DNS servers are allowed outbound access.

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In secure or isolated network segments, DHCP may be disabled to reduce the risk of unauthorized device connections or to maintain strict IP assignment control. In such cases, the help desk technician must manually configure IP settings (including IP address, subnet mask, gateway, and DNS servers). This ensures the workstation communicates properly within that segment.

A: DNS server restriction is unrelated to manual IP configuration.

B: Allow lists refer to traffic access, but manual IP assignment is due to lack of DHCP, not allow lists.

D: NAC servers control access but don't replace the need for IP addressing.

Reference:

CompTIA A+ 220-1102 Objective 1.7: Given a scenario, troubleshoot common operating system and network issues.

Study Guide Section: IP configuration and DHCP-related deployment scenarios

#### NEW QUESTION # 56

Performance on a user's smartphone is degrading. Applications take a long time to start, and switching between apps is slow. Which of the following diagnostic steps should a mobile technician take first?

- A. Restart the phone
- B. Check the phone's battery state
- C. Restore the phone to factory settings
- **D. Uninstall unneeded applications**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

One of the most common causes for performance degradation on smartphones is storage or memory overload due to excessive apps. Uninstalling unused apps is a basic but effective first diagnostic step.

From Travis Everett - All-in-One Exam Guide:

"Start troubleshooting sluggish smartphones by clearing unused apps and files before performing advanced diagnostics or resets."

#### NEW QUESTION # 57

A user reports that their corporate mobile phone is lost. Which of the following protects the data locally on the phone from unauthorized access?

- A. Degaussing
- B. Antivirus
- **C. Remote wipe**
- D. Password manager

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Remote wipe is a mobile device management (MDM) feature that allows administrators to erase data remotely if a device is lost or stolen, preventing unauthorized access to corporate or personal information.

From Quentin Docter - CompTIA A+ Complete Study Guide:

"Remote wipe features enable a device to be cleared of all sensitive data if it is lost or stolen. This is one of the most effective ways to prevent unauthorized access to corporate resources."

### NEW QUESTION # 58

A technician needs to disable guest log-ins on domain-joined desktop machines. Which of the following should the technician use?

- A. Firewall
- **B. Group Policy**
- C. Microsoft Management Control
- D. MSConfig

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Group Policy is the standard administrative tool for enforcing security and configuration settings across domain-joined systems, including disabling guest accounts.

From Quentin Docter - CompTIA A+ Study Guide:

"Disabling guest accounts and applying consistent security policies across multiple machines is best achieved through Group Policy on a Windows domain."

### NEW QUESTION # 59

.....

Maybe life is too dull; people are willing to pursue some fresh things. If you are tired of the comfortable life, come to learn our 220-1202 exam guide. Learning will enrich your life and change your views about the whole world. Also, lifelong learning is significant in modern society.
