Netskope NSK300 Exam Syllabus Topics:

Topic	Details
Topic 1	Security Policy Management: One of the main competencies evaluated in this topic is the creation and management of granular security rules for cloud resources and applications.
Topic 2	Advanced Threat Protection: This topic explores how Netskope detects and mitigates sophisticated threats, such as malware and cloud data breaches.
Topic 3	Netskope Platform Monitoring and Troubleshooting: It focuses on monitoring Netskope's health, identifying possible problems, and successfully resolving them.
Topic 4	Designing and Implementing Netskope Security: Your ability to build and configure Netskope for a variety of security requirements, such as SaaS access control, data security, and cloud workload protection, will be evaluated in this topic.

Netskope Certified Cloud Security Architect Sample Questions (Q47-Q52):

NEW QUESTION # 47

You are building an architecture plan to roll out Netskope for on-premises devices. You determine that tunnels are the best way to achieve this task due to a lack of support for explicit proxy in some instances and IPsec is the right type of tunnel to achieve the desired security and steering.

What are three valid elements that you must consider when using IPsec tunnels in this scenario? (Choose three.)

- A. Netskope Client behavior when on-premises
- B. cipher support on tunnel-initiating devices
- C. the impact of threat scanning performance
- D. bandwidth considerations
- E. the categories to be blocked

Answer: A,B,D

NEW QUESTION # 48

You just deployed and registered an NPA publisher for your first private application and need to provide access to this application for the Human Resources (HR) users group only. How would you accomplish this task?

- A. 1. Enable private app steering in the Steering Configuration assigned to the HR group.
2. Create a new Private App.
3. Create a new Real-time Protection policy as follows:
Source = HR user group Destination = Private App Action = Allow
- B. 1. Create a new private app and assign it to the HR user group.
2. Create a new Real-time Protection policy as follows:
Source = HR user group Destination = Private App Action = Allow.
- C. 1. Enable private app steering in the Steering Configuration assigned to the HR group.
2. Create a new private app and assign it to the HR user group
3. Create a new Real-time Protection policy as follows:
Source = HR user group Destination = Private App Action = Allow
- D. 1. Enable private app steering in Tenant Steering Configuration.
2. Create a new private app and assign it to the HR user group.

Answer: A

NEW QUESTION # 49

Your organization's software deployment team did the initial install of the Netskope Client with SCCM. As the Netskope administrator, you will be responsible for all up-to-date upgrades of the client.

Which two actions would be required to accomplish this task? (Choose two.)

- A. In the Client Configuration, set Upgrade Client Automatically to Latest Release.

- B. In the Client Configuration, set Upgrade Client Automatically to Specific Golden Release.
- C. Set the installmode-IDP flag during the original Install.
- D. Set the autoupdate-on flag during the original Install.

Answer: A,D

Explanation:

To ensure that the Netskope Client is always up-to-date with the latest upgrades, two actions are required. First, in the Client Configuration, the administrator should set the option to Upgrade Client Automatically to Latest Release. This setting ensures that the client will automatically update to the most recent version available. Second, during the original installation of the Netskope Client, the autoupdate-on flag should be set. This flag enables the auto-update feature, allowing the client to receive and apply updates as they are released.

NEW QUESTION # 50

Your organization's software deployment team did the initial install of the Netskope Client with SCCM. As the Netskope administrator, you will be responsible for all up-to-date upgrades of the client. Which two actions would be required to accomplish this task? (Choose two.)

- A. In the Client Configuration, set Upgrade Client Automatically to Latest Release.
- B. In the Client Configuration, set Upgrade Client Automatically to Specific Golden Release.
- C. Set the installmode-IDP flag during the original Install.
- D. Set the autoupdate-on flag during the original Install.

Answer: A,D

Explanation:

To ensure that the Netskope Client is always up-to-date with the latest upgrades, two actions are required.

First, in the Client Configuration, the administrator should set the option to Upgrade Client Automatically to Latest Release. This setting ensures that the client will automatically update to the most recent version available. Second, during the original installation of the Netskope Client, the autoupdate-on flag should be set.

This flag enables the auto-update feature, allowing the client to receive and apply updates as they are released.

The information is based on the Netskope Client deployment options and upgrade process as detailed in the Netskope Knowledge Portal

NEW QUESTION # 51

You are asked to create a customized restricted administrator role in your Netskope tenant for a newly hired employee. Which two statements are correct in this scenario? (Choose two.)

- A. The scope of the data shown in the UI can be restricted to specific events.
- B. Obfuscation can be applied to all functional areas.
- C. All role privileges default to Read Only for all functional areas.
- D. An admin role prevents admins from downloading and viewing file content by default.

Answer: A,B

NEW QUESTION # 52
