Acquia Certified Site Builder - Drupal 8 Sample Questions (Q49-Q54):

NEW QUESTION # 49

A page has been added for a new product, and the marketing team wants you to add it to the main navigation menu, as a child of the "Products" page. During a promotion period, the team also wants you to add a link to the new page as a child of the "What's New"

page.

What is the best way to add both links to the main navigation menu?

- A. Edit the new page, add a link in Menu Settings and select "Products" as the Parent item In the Main navigation menu, add a new link to the page and select "What's New" as the parent item When the promotion is over, delete the second link from the menu.
- B. Edit the new page and create two links in the Menu Settings section, one with "Products" as the parent page and the other with "What's New" as the parent page When the promotion is over, delete the second menu link
- C. In the Main navigation menu, add two links to the new page, one with "Products" as the parent page and the other with "What's New" as the parent page Set the second link to expire on the date the promotion ends
- D. Edit the new page, add a link in Menu Settings, and select "Products" as the Parent item Clone the new page, and set the menu link parent to the "What's New" page. When the promotion is over, delete the cloned page

Answer: A

NEW QUESTION # 50

You are building a site for a membership organization, which will include a member directory The directory will show each member's name, local chapter, and the U.S. state the chapter is in. Members are users, who select a local chapter when they register Each chapter has a page with a photo There are no pages for states; but other kinds of content are associated with states

- A. "State" is a content type with an entity reference field to Chapter "Chapter" is a content type with an entity reference field to Member "Member" is a content type with a user reference field.
- B. "State" is a taxonomy, with terms for U.S. state names "Chapter" is a content type with a taxonomy term reference field to "State" and an image field for the photo In Account settings there is a content reference field to "Chapter"
- C. "State" is a taxonomy, with terms for U.S. state names "Chapter" is a content type with a taxonomy term reference field to "State," an image field for the photo, and a multi-select user reference field
- D. "State" is a content type, with nodes for each state. "Chapter" is a content type with a taxonomy term reference field to "State" and an image field for the photo In Account settings there is a content reference field to "Chapter."

Answer: A

NEW QUESTION # 51

You are asked to require a site visitor to enter First name and Last name when creating a new account How can you do this in Drupal?

- A. Create a block type with fields for First name and Last name, set them to "required" and add the block to the /user/register page.
- B. In Account settings, go to Manage fields and add fields for First name and Last name. Set them to "required."
- C. In Account settings, under "Who can register accounts?" select "Visitors, but full name is required"
- D. In Permissions, check "Require first and last name for user registrations"

Answer: B

NEW QUESTION # 52

Your company has multiple offices around the world, each of which has its own detail page on the company website Offices will be added regularly by the content maintenance team, with each office assigned to one of a limited number of global regions You've been asked to create a directory page listing all of these offices, grouped by region In order to keep the list of regions small, you've been asked to make sure that only site administrators can create, modify, or delete regions.

What kind of Drupal content architecture would best support this?

- A. Create an "Office" content type and a "Region" content type The "Region" content type includes a node reference field that can contain multiple office nodes.
- B. Create an "Office" content type and a "Regions" taxonomy vocabulary Office nodes are assigned to regions using a term reference field on the "Office" content type
- C. Create a "Regions" taxonomy vocabulary Each office is a "Basic page" node, assigned to its region using a term reference

field added to the "Basic page" content type

- D. Each office is a "Basic page" node The office's regional location should be listed in the node's body text

Answer: A

NEW QUESTION # 53

A "Case Study" content type includes an entity reference field "field_related_product," to associate each Case Study with a "Product" node You are asked to add a sidebar block to the Product node display that shows a list of related case studies How can you build this functionality?

- **A. Add "field_related_product" to the Product content type and use css to display the field in the sidebar region**
- B. Create a View of Case Study nodes, with a relationship to content referenced from field_related_product, and a contextual filter by ID using the relationship, set to use "Content ID from URL." Add the block to the Product nodes display
- C. Add *ne "show related content" block to the Product nodes display Set it to include only nodes of type "Case Study."
- D. Create a view of Product nodes, with a relationship to field_related_product, and add the title field using the relationship Add the block to the Product nodes display

Answer: A

NEW QUESTION # 54
