Acquia Certified Site Builder - Drupal 8 Sample Questions (Q10-Q15):

NEW QUESTION # 10

You are pitching for development of a Drupal based website to your new customer. You want to emphasize how flexible Drupal is.

Which THREE points would support your case? Choose 3 answers

- A. Drupal allows you to create customized and branded site designs.
- B. Drupal allows you to directly rename database columns from the UI.
- C. Drupal.org has an online store where you can purchase modules and themes.
- D. Drupal has configurable content types and field types for modeling content.
- E. Drupal allows you to build pages containing lists of content using UL

Answer: A,D,E

NEW QUESTION # 11

Your product branding team has asked you to reconfigure all image fields in all places where they are used, to remove "gif" from the Allowed file extensions.

How can you find all the places an image field is being used?

- A. Go to Content , Files, and for each row of Mime type "image," check the "Used in" column
- B. Go to Structure , Content types and for each one, click "Manage fields" and find any fields of type "Image."
- C. Go to Reports , Field list, and find each row where Field type is "Image (moduleimage)"
- D. Go to Content, and filter by Field type = Image

Answer: B

NEW QUESTION # 12

You are having trouble using a certain contributed module. You have read the module's documentation and ensured it is configured correctly.

How should you find help? Choose 2 answers

- A. Create a comment of type "support request" on the module's project page
- B. Ask questions in the #drupal-support channel on IRC or in the #support channel on Drupal Slack group
- C. Email the module's maintainer and ask for help
- D. Search for answers and ask questions in the module's issue queue on drupal.org

Answer: C,D

NEW QUESTION # 13

A "Case Study" content type includes an entity reference field "field_related_product," to associate each Case Study with a "Product" node. You are asked to add a sidebar block to the Product node display that shows a list of related case studies. How can you build this functionality?

- A. Add "field_related_product" to the Product content type and use CSS to display the field in the sidebar region
- B. Create a View of Case Study nodes, with a relationship to content referenced from field_related_product, and a contextual filter by ID using the relationship, set to use "Content ID from URL." Add the block to the Product nodes display
- C. Create a view of Product nodes, with a relationship to field_related_product, and add the title field using the relationship. Add the block to the Product nodes display
- D. Add *ne "show related content" block to the Product nodes display. Set it to include only nodes of type "Case Study."

Answer: A

NEW QUESTION # 14

The marketing department wants to drive social engagement by collecting users' social profile links every time they comment on a blog post. You've been asked to make sure that this only happens on blog post comments; comments on other content types should not collect this information. How can you make this possible?

- A. Custom comment types per content type are not supported in Drupal 8

- B. Add custom fields for collecting social profile links to the default comment type. When configuring each field's visibility settings, go to "Content types" and make sure only the blog post content type is selected.
- C. Create a custom comment type with the appropriate custom fields for collecting social profile links. Add a Comments field to the blog post content type, making sure it uses your new custom comment type.
- D. In the blog post content type's "Manage form display" section, go to the settings for the "Comment" field and select "collect social profile information."
